TRANSACTIONS

OF THE

AMERICAN ELECTROCHEMICAL SOCIETY

GENERAL INDEX

Volumes I-XX, 1902-1911

PUBLISHED BY
THE AMERICAN ELECTROCHEMICAL SOCIETY
LEHIGH UNIVERSITY, SOUTH BETHLEHEM, PA.
1913

Copyright, 1913, by the American Electrochemical Society.

One copy of each volume of the *Transactions* is supplied gratis to each member of the Society in good standing.

Prices of Volumes I to XX (excepting Vols. I and III), to non-members, $3.00 per copy; to members (extra copies), $2.50; to public libraries, colleges, scientific societies and journals, $2.00. Volumes I and III, double above prices. Prices are for volumes bound in cloth, and include delivery within the postal union.

Non-members may obtain complete sets at 25 percent discount on above prices; members may obtain the volumes necessary to complete their sets at 25 percent reduction on above prices; public libraries, etc., purchasing complete sets to date, are allowed 10 percent reduction from above prices.

WARE BROS. COMPANY, PRINTERS
1010 ARCH ST., PHILA.

TABLES OF CONTENTS

AND

GENERAL INDEX

VOLUMES I—XX (1902—1911)

Papers will be found indexed under the author's name and the exact title of the paper, and cross-indexed under all of the principal sub-topics in the title. Joint authorship papers are indexed under each author's name. The volume number is in full-faced type, the page number in ordinary type, and the year in parentheses.

For example, the paper by C. F. Burgess and S. G. Engle, entitled "Observations on the Corrosion of Iron by Acids," will be found in the index as follows:

Acids, Observations on the Corrosion of Iron by—C. F. Burgess and S. G. Engle.....**9**, 199 (1906)
Burgess, C. F., and Engle, S. G.—Observations on the Corrosion of Iron by Acids.....**9**, 199 (1906)
Corrosion of Iron by Acids, Observations on the—C. F. Burgess and S. G. Engle.....**9**, 199 (1906)
Engle, S. G., and Burgess, C. F.—Observations on the Corrosion of Iron by Acids.....**9**, 199 (1906)
Iron, Corrosion of, by Acids, Observations on—C. F. Burgess and S. G. Engle **9**, 199 (1906)
Observations on the Corrosion of Iron by Acids—C. F. Burgess and S. G. Engle.....**9**, 199 (1906)

Discussions are indexed under the name of the author of the discussion, and not under the paper being discussed.

Following the heading "*Discussions*," the abbreviation "*et seq.*" refers to the fact that further remarks by the same person may be found on immediately-succeeding pages of discussion of the same paper.

Vol. VI contains two parts with separate pagings; these parts are indicated in the index after the number of the volume by the numerals (I) or (II), *i. e.*, **6** (I) or **6** (II).

For convenience in referring to the contents of a volume, the Tables of Contents of all the volumes are included.

VOL. I—1902

Philadelphia Meeting, April 4-5, 1902

TABLE OF CONTENTS

Portrait of President Joseph W. Richards, Ph.D.....*Frontispiece*
The American Electrochemical Society. Introductory.....J. W. Richards
Historical Sketch.
Proceedings.
Constitution.
Catalogue of Charter Members, Alphabetical and Geographical.

PAPERS

A University Course in Electrochemistry.....J. W. Richards
Graphite Electrodes in Electro-Metallurgical Processes.....C. L. Collins
Note on the Gladstone-Tribe Couple.....W. D. Bancroft
The Nascent State.....C. J. Reed
The Electrical Reduction of Lead.....P. G. Salom
Electrolytic Refining of Composite Metals.....T. Ulke
A Novel Concentration Cell.....H. S. Carhart
The Manufacture of Bisulphide of Carbon in the Electric Furnace, E. R. Taylor
Current Electrochemical Theories.....L. Kahlenberg
A Zinc-Bromide Storage Battery.....H. H. Dow
Continuous Electrolysis of Solutions of Metals.....N. S. Keith
A Method of Electrolytic Production of Zinc from Its Ores...S. S. Sadtler
The Electrolytic Rectifier.....C. F. Burgess and C. Hambuechen
Caustic Alkalies and Chlorine by the Dry Electrolytic Process..C. E. Acker
On the Relative Velocities of the Ions in Solutions of Silver Nitrate in Pyridine and Acetonitrile.....H. Schlundt
On a New Type of Electrolytic Meter.....K. Norden
The Reversible Copper Oxide Plate.....W. McA. Johnson
A Thermodynamical Note on the Theory of the Edison Accumulator .....E. F. Roeber
Electrolysis by an Alternating Current.....J. W. Richards
The Atom of Electrochemistry.....A. Reuterdahl
Obituary Notice of Charles T. Child.
Index.
Advertisements.

VOL. II—1902

Niagara Falls Meeting, September 15-18, 1902

TABLE OF CONTENTS

Proceedings of Second General Meeting.
Abstract of Proceedings of Board of Directors.
Catalogue of Members, Alphabetical and Geographical.

PAPERS

On the Testing of Carbon Electrodes.....F. A. J. FitzGerald
The Efficiency of Electric Furnaces.....J. W. Richards
Cathodic Reduction.....A. T. Weightman
Differences of Potential Between Metallic Cadmium and Solutions of Cadmium Iodide in Various Solvents.....L. Kahlenberg
Developments in the Electro-Metallurgy of Iron and Steel..M. Ruthenberg
On the Fusion of Quartz in the Electric Furnace.....R. S. Hutton
Voltaic Cells with Fused Electrolytes.....E. A. Byrnes
A Thermo-Electric Theory of Concentration Cells.....H. S. Carhart
An Electrochemical Paradox.....Carl Hering
Electrochemistry at the World's Fair, St. Louis.....W. E. Goldsborough
The Electronic Hypothesis and Its Applications.....A. Reuterdahl
The Electrolytic Dissolution of Soluble Metallic Anodes..W. McA. Johnson
Storage Battery Invention.....H. Rodman
Some Advances in the Closed and Continuous-Working Electric Furnace .....E. R. Taylor
The Phenomenon of the Formation of Metallic Dust from Cathodes.F. Haber
The Theory and Practice of Continuous-Flow Electric Calorimetry, H. T. Barnes
A Unit of Electrical Quantity for Use in Electrochemical Calculations .....A. H. Cowles
Pumps and Other Accessories in Electrolytic Plants, D. H. Browne and L. R. Vorce
Some Phenomena of Electrolytic Conduction.....C. J. Reed
Electrochemical Polarization.....J. W. Langley
A Contribution to the Electrochemistry of Barium Compounds..M. M. Haff
Index.
Advertisements.

VOL. III—1903

New York Meeting, April 16-18, 1903

TABLE OF CONTENTS

Proceedings of Third General Meeting.
Abstract of Proceedings of Board of Directors.
Catalogue of Members, Alphabetical and Geographical.

PRESIDENTIAL ADDRESS

Conditions of Progress in Electrochemistry.....President J. W. Richards

PAPERS

Determination of Vapor Densities in an Electric Furnace.....W. Nernst
Constant Voltage and Constant Current Separations.....W. D. Bancroft
An Experimental Study of Some Electrode Effects, H. M. Tory and H. T. Barnes

Free Ions in Aqueous Solutions.....W. R. Whitney
The Electrolysis of Water.....J. W. Richards and W. S. Landis
Experiments with Metallic Diaphragms.....W. D. Bancroft
Thermo-Electromotive Force Without Difference of Temperature,
H. S. Carhart
The Protective Action of Zinc Chloride on Metallic Iron.....C. J. Reed
Insulating Materials, a Field for the Chemist.....M. von Recklinghausen
An Historical Review of the Storage Battery.....H. B. Coho
The Use of Pyroxyline in Electric Storage Batteries.....E. A. Sperry
Concentration Changes in the Electrolysis of Brine.....W. H. Walker
The Influence of Some Impurities in Salt upon the Yield of Caustic
Soda by the Amalgam Process.....J. W. Walker and C. S. Paterson
Corrosion of Metals by Electrolysis.....A. A. Knudson
Note on Corrosion of Aluminum.....J. A. Steinmetz
Notes on Modern Electrolytic Copper Refining.....T. Ulke
Notes on the Composition of Electroplating Solutions.....N. S. Keith
Electro-Deposition on Rotating Cathodes.....J. G. Zimmerman
Notes on the Electro-Deposition of Nickel.....W. McA. Johnson
Note on Electrical Endosmose.....W. D. Bancroft
Ions and Electrons.....L. A. Parsons
On the Formation of Nitric Acid by Electric Energy.....C. W. Volney
Uniformity in Electrochemical Equivalents.....Carl Hering
Electromotive Force of Alloys.....W. D. Bancroft
Electrolytic Production of Metallic Compounds,
C. F. Burgess and C. Hambuechen
Single Potentials of Zinc in Aqueous Solutions,
H. E. Patten and W. R. Mott
Electrolytic Conduction Without Electrodes.....A. B. Marvin
Note on a Laboratory Furnace.....B. MacNutt
Appendix. Lecture on Radio-Active Substances, Selenium, Etc.,
W. J. Hammer

Index.
Advertisements.

VOL. IV—1903

Niagara Falls Meeting, September 17-19, 1903

TABLE OF CONTENTS

Proceedings of Fourth General Meeting.
Abstract of Proceedings of Board of Directors.

PAPERS

Note on Some Theoretical Considerations in the Construction of
Resistance Furnaces.....F. A. J. FitzGerald
Advances in Electro-Metallurgy of Iron Production.....M. Ruthenberg
A Practical Utilization of the Passive State of Iron.....C. F. Burgess

An Experiment on the Electrolytic Determination of the Basicity of Acids.....I. J. Moltkehansen
Note on the Electro-Metallurgy of Gold.....W. H. Walker
Electrolytic Copper Refining.....W. D. Bancroft
Efficiency of the Nickel-Plating Tank.....O. W. Brown
A New Type of Electrolytic Cell.....P. G. Salom
Electrolysis of Sodium Hydroxide by Alternating Current..C. Hambuechen
The Electrolysis of Water (Paper II)...J. W. Richards and W. S. Landis
On the Supposed Electrolysis of Water Vapor.....F. A. Lidbury
Note on Metallic Diaphragms.....E. A. Byrnes
The Thermochemistry of the Theory of Electrolytic Dissociation, J. W. Richards
Berthelot's Law Relative to the Electromotive Force of Cells, Based on the Reciprocal Action of Saline Solutions and Soluble Electrolytes .....C. J. Reed
Theoretical Properties of Free Ions in Solutions.....E. F. Roeber
Present Status of the Electrolytic Dissociation Theory....W. D. Bancroft
General Discussion of the Theory of Electrolytic Dissociation.
Index.
Advertisements.

VOL. V—1904

Washington Meeting, April 7-9, 1904

TABLE OF CONTENTS

Portrait of President Henry S. Carhart, LL.D.....*Frontispiece*
Proceedings of Fifth General Meeting.
Abstract of Proceedings of Board of Directors.
Catalogue of Members, Alphabetical and Geographical.

PRESIDENTIAL ADDRESS

The Continuous Advance of Electrochemistry.....President J. W. Richards

PAPERS

The Standard Cell.....F. A. Wolff
Preparation of Materials for Standard Cells and Their Construction.....H. S. Carhart and G. A. Hulett
Single Potentials of the Halogen Elements.....W. R. Mott
The Composition and Resolution of Voltages.....J. W. Richards
Molecular Conductivity.....C. J. Reed
The Economic Balance in Electrolytic Copper Refining.....L. Addicks
Remarks on Prof. Richards' Theory of Heat of Neutralization as Presented to the Society, September 19, 1903.....G. M. Westman
The Energy of Ions.....L. A. Parsons
The Aluminum Electrolytic Condenser.....C. I. Zimmerman
A Contribution to the Study of the Electric Arc.....W. S. Weedon

Some Phenomena Observed in Connection with the Use of a Copper Voltameter.....I. Adams and B. MacNutt
Electrolytic Iron.....C. F. Burgess and C. Hambuechen
The Thermo-Electric Determination of the Reduction Temperature of Zinc Oxide.....W. McA. Johnson
Exhibition of Porous Plate.....S. S. Sadtler
An Index to Electrochemistry and Its Application.....A. L. Voege
Observations on the Preparation of Electrolytic White Lead..C. F. Carrier
Electric Smelting Experiments for the Manufacture of Ferro-Nickel from Pyrrhotite.....E. A. Sjöstedt
Dissociation by Means of the Alternating Current.....W. H. Davis
Notes on the Industrial Electrolysis of Water.....W. S. Landis
The Thermochemistry of Electrolytic Dissociation.....C. J. Reed
A Strange Observation.....I. J. Moltkehansen
Exhibit of Ferro-Metals, Made Electrically, and of Other Electric Furnace Products.....A. J. Rossi
Index.
Advertisements.

VOL. VI—1904

St. Louis Meeting, September 15-16, 1904

TABLE OF CONTENTS

Portrait of C. J. Reed, Secretary 1902-1904.....*Frontispiece*
Proceedings of Sixth General Meeting.
Abstract of Proceedings of Board of Directors.

PAPERS

PART I.

An Analytical Study of the Deposition of Aluminum from Ethyl Bromide Solution.....H. E. Patten
The Aluminum Rectifier.....W. D. Bancroft
Some Aspects of Applied Electrochemistry.....W. McA. Johnson
The Use of Carbon for the Study of Temperatures in the Electric Furnace.....F. A. J. FitzGerald
The Electrolytic Purification of Cobalt and Nickel.....W. D. Bancroft
Electrochemical Exhibits at the Louisiana Purchase Exposition, St. Louis, 1904.....S. S. Sadtler

PART II.

Papers read in Joint Sessions of Section C of the Fifth International Electrical Congress and the American Electrochemical Society.
The Relation of the Hypothesis of Compressible Atoms to Electrochemistry.....T. W. Richards
Electrical Extraction of Nitrogen from the Air.....J. S. Edström
The Chemistry of Electroplating.....W. D. Bancroft

The Carbon Cell.....F. Haber and L. Bruner
The Electrochemical Series of the Metals.....L. Kahlenberg
The Lead Voltameter.....A. G. Betts and E. F. Kern
Chlorine in Metallurgy.....J. Swinburne
Aluminothermics .....H. Goldschmidt
The Silver Voltameter.....K. E. Guthe
A Study of the Materials Used in Standard Cells and Their Preparation.....H. S. Carhart and G. A. Hulett
The Electro-Metallurgy of Iron and Steel.....P. L. T. Héroult
The Present Status of the Edison Storage Battery, A. E. Kennelly and S. E. Whiting
Electrolytic Conduction.....J. W. Richards
On the Electrolysis of Fused Salts.....R. Lorenz
Electrolysis and Catalysis.....W. Ostwald
Index.
Advertisements.

VOL. VII—1905

Boston Meeting, April 25-27, 1905

TABLE OF CONTENTS

Portrait of President Wilder D. Bancroft, Ph.D.....*Frontispiece*
Proceedings of Seventh General Meeting.
Abstract of Proceedings of the Board of Directors.

PRESIDENTIAL ADDRESS

Revisions of the Theory of Electrolysis.....President H. S. Carhart, LL.D.

PAPERS

Reversible and Irreversible Electrolytic Polarization, W. S. Franklin and L. A. Freudenberger
Notes on Economic Temperatures of Copper Refining Solutions, C. F. Burgess
A Diaphragm Cell for Electrolysis of Sodium Chlorid Solutions, C. P. Townsend
Conduction in Fused and Solid Electrolytes.....J. W. Richards
Notes on Nernst Filaments.....C. I. Zimmerman
On Billitzer's Method for Determining Absolute Potential Difference.....H. M. Goodwin and R. B. Sosman
On the Edison Storage Battery.M. deK. Thompson, Jr., and H. K. Richardson
Chromium and the Electrolysis of Chromic Acid, H. R. Carveth and B. E. Curry
Electrolytic Precipitation of Silver.....R. C. Snowdon
Some Results of Experiments with the Electro-Deposition of Metals on Aluminum .....A. Lodyguine
Some Results of Experiments with the Reduction of Titaniferous Ores .....A. Lodyguine

On the Specific Inductive Capacity of Oleic Acid and Its Salts. L. Kahlenberg
The Rotating Diaphragm.....W. D. Bancroft
On the Heat of Solution of Aluminum Bromide in Ethyl Bromide, H. E. Patten
The Interdependence of the Atomic Weights and the Electrochemical Equivalents .....A. Reuterdahl
Notes on the Utilization of Blast Furnace Gases in Connection with the Electric Smelting of Iron.....A. J. Rossi
The Electrostatic Treatment of Ore.....L. I. Blake
Experiments with the Reduction of Different Oxides of Lead by Electric Current .....A. Lodyguine
Colloids .....W. R. Whitney
An Electrolytic Switch.....W. S. Horry
Production of Silicon in the Electric Furnace.....F. J. Tone
The Microstructure of Silicon and Alloys Containing Silicon...A. B. Albro
The Mercury Arc.....E. Weintraub
Arcs .....W. R. Whitney
The Electrolytic Precipitation of Nickel on Nickel.....R. C. Snowdon
An Optical Method for Observing the Diffusion in Electrolytes, C. Hambuechen
The Aluminum Electrolytic Condenser.....C. I. Zimmerman
A Low Voltage Standard Cell.....G. A. Hulett
Index.
Advertisements.

VOL. VIII—1905

Bethlehem Meeting, September 18-20, 1905

TABLE OF CONTENTS

Portrait of Prof. Dr. Wilhelm Ostwald.....*Frontispiece*
Proceedings of Eighth General Meeting.
Abstract of Proceedings of Board of Directors.
Directory of Members, Alphabetical and Geographical.

PAPERS

The Precipitation of Colloidal Solutions by Centrifugal Force, W. S. Franklin and L. A. Freudenberger
The Chemistry of Electrochemistry.....W. D. Bancroft
Phenomena of Metal Depositing.....A. G. Betts
Notes on the Use of Aluminum as a Reducing Agent.....O. P. Watts
New Gin Process for the Electrical Manufacture of Steel.....G. Gin
An Electrolytic Process for Refining Silver.....A. G. Betts
Electrolytic *vs.* Sulphuric Acid Parting of Bullion.....F. D. Easterbrooks
Insulating Paints .....Maximilian Toch
The Utilization of Active Oxygen, Electrically and Chemically Produced .....R. von Foregger

Report on Proposed Card Catalogue of Electrochemistry..C. F. Carrier, Jr.
Some Observations on the Influence of Arsenic in Pickling Solutions.....C. F. Burgess
The Electric Smelting of Zinc.....O. W. Brown and W. F. Oesterle
Contribution to Discussion of Brown and Oesterle's Paper.W. McA. Johnson
Notes on the Electro-Metallurgy of Antimony.....A. G. Betts
A Standard Method of Determining the Specific Resistance of Electrolytes .....R. Threlfall
Electrochemistry in 1904 as Represented at the St. Louis Exposition.
Reversible and Irreversible Electrolytic Polarization, W. S. Franklin and L. A. Freudenberger
Ammeters for Electrolytic Work.....Lawrence Addicks
Thermodynamics of the Electric Incandescent Lamp (With Demonstrations) .....E. F. Roeber
On the Chemical Separation of the Excited Activity of Thorium, H. Schlundt and R. B. Moore
The Electrolytic Preparation of Iodoform from Acetone.....G. A. Roush
Note on the Electrical Resistivity of Iron and of Steel at High Temperatures .....Gustave Gin
On the Radioactivity of Some Natural Waters of Missouri, R. B. Moore and H. Schlundt
Index.
Advertisements.

VOL. IX.—1906

Ithaca Meeting, May 1-3, 1906

TABLE OF CONTENTS

Portrait of President Carl Hering.....*Frontispiece*
Proceedings of the Ninth General Meeting.
Abstract of Proceedings of the Board of Directors.

PRESIDENTIAL ADDRESS

The Electrochemistry of Chemistry.....President W. D. Bancroft

PAPERS

An Instructive Laboratory Experiment in Applied Electrochemistry.....W. H. Walker
Some Principles of Resistor Furnace Design.....C. L. Collens, 2nd
Electrolyte Density in Storage Batteries.....Lamar Lyndon
Electrolytic Corrosion of Structural Steel.....Maximilian Toch
On the Physical Properties of Fused Magnesium Oxide, H. M. Goodwin and R. D. Mailey
A New Silicide of Molybdenum.....O. P. Watts
The Reduction of Metal Sulphides.....O. W. Brown
Cathodic Disintegration of Carbon in Electrolyte of Fused Sodium Chloride .....G. I. Kemmerer

Sodium Production; a New Process.....E. A. Ashcroft
Laboratory Resistance Furnaces.....G. R. White
Electrochemical Processes as Station Load Equalizers.....E. A. Sperry
The Electric Vacuum Furnace.....W. C. Arsem
Electrolytic Corrosion of the Bronzes.....B. E. Curry
Observations on the Corrosion of Iron by Acids,
C. F. Burgess and S. G. Engle
The Development of the Nickel-Plating Industry.....Isaac Adams
Electrolytic Precipitation of Lead from Acetate Solutions...R. C. Snowdon
Structure of Electro-Deposits.....C. F. Burgess and O. P. Watts
The Cadmium Standard Cell.....G. A. Hulett
Electrolytic Precipitation of Bronzes.....B. E. Curry
Ferromanganese Anodes in Caustic Soda Solutions.....G. R. White
The Settling of Suspensions.....E. Buckingham
The Migration and Flocculation of Colloids Considered as an
Absorption Phenomenon.....H. E. Patten
Report of Experiments with Fused Sodium Peroxide for the Regen-
eration of Air for Submarines..G. F. Brindley and R. von Foregger
Alternating Current Electrolysis with Cadmium Electrodes..G. R. White
Electrolytic Chromium.....M. LeBlanc
Lecture-Room Switchboard.....W. D. Bancroft
The Free Energy of Some Halogen and Oxygen Compounds, Com-
puted from the Results of Potential Measurements.M. deK. Thompson
The Electrolysis of Caustic Soda.....J. W. Richards
Differences of Potential Between Manganese and Lead Peroxides
and Various Aqueous and Non-Aqueous Solutions,
L. Kahlenberg and A. S. McDaniel
A New Electrolyte for the Silver Coulometer,
H. S. Carhart, H. H. Willard and W. D. Henderson
Errors in Pyrometry.....E. S. Shepherd
Index.
Advertisements.

VOL. X.—1906

New York Meeting, October 8-9, 1906

TABLE OF CONTENTS

Proceedings of the Tenth General Meeting.
Directory of Members, Alphabetical and Geographical.

PAPERS

Formula for the Helmholtz Concentration Cell.....H. S. Carhart
Visible Migration of Particles Between Electrodes.....Carl Hering
Some Small Laboratory Appliances for Electric Fusion Work and
Other Work.....S. S. Sadtler
Copper Cathodes in Nitric Acid.....J. W. Turrentine

An Aluminum and Magnesium Cell.....H. T. Barnes and G. H. Cole
Melting Points of Some Cryolite-Alumina Mixtures.....F. R. Pyne
Some Surface Factors Affecting Distribution.....H. E. Patten
Pyrometers .....E. F. Roeber
A Thermo-Electric Pyrometer for General Industrial Applications,
E. F. Schuetz
The Heræus "LeChatelier Pyrometer".....R. Moldenke
Communicated Discussion Descriptive of the Price Pyrometer,
Electric Dental Supply Co.
Discussion on Special Forms of Pyrometers.....R. P. Brown
The Decker Primary Battery.....F. B. Crocker
Ultra-Violet Light in the Laboratory and in Practice.....C. Baskerville
Index.
Advertisements.

VOL. XI.—1907

Philadelphia Meeting, May 2-4, 1907

TABLE OF CONTENTS

Portrait of President Charles F. Burgess.....*Frontispiece*
Proceedings of the Eleventh General Meeting.
Report of the Board of Directors.
Members Elected and Qualified.

PRESIDENTIAL ADDRESS.

The American Electrochemical Society.....President Carl Hering

PAPERS

The Electrolytic Corrosion of Brasses.....A. T. Lincoln
Electric Conduction.....C. P. Steinmetz
Recent Improvements in Electrochemical Analysis.....General Discussion
Electrodeposition of Zinc.....Ralph C. Snowdon
The Electrolytic Deposition of Nickel-Zinc Alloys—II,
E. P. Schoch and Alcan Hirsch
The Effect of Stress upon the Electromotive Force of Soft Iron,
W. H. Walker and Colby Dill
Changes of Concentration and Migration Velocities.....C. J. Reed
Polarization Voltages of Silver Nitrate Solutions,
J. A. Wilkinson and H. W. Gillett
Electrolytic Pickling of Steel.....C. J. Reed
The Work Done in Electrolysis.....Jos. W. Richards
The Current Efficiency of an Electrolytic Cell.....Wm. Roy Mott
On the Density, Electrical Conductivity, and Viscosity of Fused
Salts.....H. M. Goodwin and R. D. Mailey
The Rapid Measurement of Electrolytic Resistance.....C. F. Burgess

Henri Moissan.....G. F. Kunz
On the Estimation of High Temperatures.....George K. Burgess
A Bomb Calorimeter for Use with Substances Whose Oxides are Solids.....Henry N. Potter
The Electro-Metallurgy of Zinc and Its Relation to Present Practice.....W. McA. Johnson
The Action of Carbon on Magnesia at High Temperatures.Oliver P. Watts
On the Electrical Reduction of Titaniferous Iron Ores.....Gustave Gin
A Closed Electric Furnace for Reducing and Distilling Metals from Their Ores.....E. R. Taylor
Electric Tube Furnace for Temperature Measurements.....S. A. Tucker
A Granular Carbon Resistance Furnace.....S. A. Tucker
On Carbons for Electro-Metallurgy.....F. A. J. FitzGerald and J. Forssell
A Practical Limitation of Resistance Furnaces; the "Pinch" Phenomenon .....Carl Hering
Power Costs.....C. E. Lucke
Electrochemical Processes as Station Load Equalizers.....John Meyer
The Helion Lamp.....H. C. Parker
Surface Properties of Aluminum and Zinc.....W. J. Hammer
Energy Changes Accompanying Absorption.....H. E. Patten

APPENDIX.

A Brief Description of the Working Models of Electric Furnaces. Electrolytic Processes for Refining Gold and Silver. Electrical Plant for the Purification of Water by Ozone.
Index.
Advertisements.

VOL. XII—1907

New York Meeting, October 17-19, 1907

TABLE OF CONTENTS

Flashlight Photograph of Banquet, Twelfth Meeting.....*Frontispiece*
Proceedings of the Twelfth General Meeting.
Members Elected and Qualified.
Directory of Members, Alphabetical and Geographical.

PAPERS

Deflocculated Graphite.....E. G. Acheson
The Diamond and Moissanite; Natural, Meteoric and Artificial.G. F. Kunz
On the Electrothermic Reduction of Iron Ores, A. E. Greene and F. S. MacGregor
Discussion of the Experiments Made at Sault Ste. Marie on the Electrical Reduction of Iron Ores.....J. W. Richards
Mathematics of the Induction Furnace.....Gustave Gin

The Electro-Metallurgy of Zinc.....Gustave Gin
The Metals in Order of Their Boiling Points, as Arranged from Moissan's Experiments in the Distillation of Metals and Alloys .....O. P. Watts
A New Application of Chlorine in Metallurgy.....C. E. Baker
On the Heat Conductivity of Carbon.....F. A. J. FitzGerald
Granular Carbon Resistors.....S. A. Tucker, A. Doty and R. W. Cauchois
Silicon Monoxide .....H. N. Potter
"Monox" .....H. N. Potter
The Production of "Monox," a New Electric Furnace Product.H. N. Potter
The Analysis of Silicon Compounds.....A. Bliss Albro
Electrochemical Methods for the Qualitative and Quantitative Determination of Free Silicon in the Presence of Silica, Silicates, Oxides, Free Carbon and Silicon Carbide.....W. R. Mott
Electroscopic Determination of the Radium Present in Some Tufa Deposits from Hot Springs, Ark.....H. Schlundt
The Electrolytic Separation of Silver and Copper.....H. W. Gillett
Studies on the Silver Coulometer.....L. H. Duschak and G. H. Hulett
Electrolytic and Chemical Action of Ammonium Persulphate on Metals.....J. W. Turrentine
The Electrolytic Determination of Minute Quantities of Copper..E. E. Free
The Treatment of Storage Battery Elements Before Putting Them Out of Commission.....O. W. Brown and R. R. Sayers
On the Electrolytic Reduction of Nitric Acid.....H. E. Patten
A Further Contribution to the Study of Concentration Cells, H. S. Carhart and F. J. Mellencamp
The Electrolytic Theory of the Corrosion of Iron.....A. S. Cushman
Memoir on the Methods of Treatment of Simple and Complex Ores of Molybdenum, Tungsten, Uranium, Vanadium—Part I, Molybdenum .....Gustave Gin
Index.
Advertisements.

VOL. XIII—1908

Albany Meeting, April 30, May 1-2, 1908

TABLE OF CONTENTS

Portrait of President Edward Goodrich Acheson.....*Frontispiece*
Proceedings of the Thirteenth General Meeting.
Report of the Board of Directors.
Members Elected and Qualified.

PRESIDENTIAL ADDRESS.

The Corrosion of Iron from the Electrochemical Standpoint..C. F. Burgess

PAPERS

Electrochemical Corrosion of the Rochester Steel Conduit....R. H. Gaines
Electrolytic Refining of Iron.....E. F. Kern
Electrical Testing of Iron During the Annealing.....E. E. F. Creighton
Electric Furnace Conversion of Iron Pyrites into a Magnetic Form .....O. L. Kowalke
The Alloying of Calcium and Iron.....Alcan Hirsch and James Aston
The Preparation of Calcium Alloys for Aluminothermic Work, O. P. Watts and J. M. Breckenridge
Industrial Applications of Aluminum.....E. Blough
The Nature of the Surface Film Formed on Aluminum, and the Aluminum-Magnesium Cell.....H. T. Barnes and G. W. Shearer
The Use of Dry Cells on Ignition Service.....J. W. Brown
The Temperature Formula for the Weston Standard Cell.....F. A. Wolff
The Principles Involved in the Selection and Definition of the Fundamental Units to be Proposed for International Adoption.....F. A. Wolff
The Construction and Accurate Measurement of Resistances of the Order of One Hundred Thousand Megohms.....H. L. Bronson
The Electrochemistry of Light.....W. D. Bancroft
On the Nature of Electrolytic Conductors.....L. Kahlenberg
Direct Currents in Electrolytes Without Electrodes.....Carl Hering
Reversed Electrolysis.....J. W. Turrentine
Electrolysis of Nitric Acid Using a Mercury Cathode.....J. A. Wilkinson
Copper Anodes in Chloride Solutions.....Saul Dushman
The Solubilities of Boric, Camphoric, Benzoic and Salicylic Acids in Aqueous Ethyl Alcohol Solutions at 25°.....Atherton Seidell
Additional Experiments on the Electrolytic Corrosion of Brasses, A. T. Lincoln and G. C. Bartells, Jr.
The Early Work of Joseph Henry.....J. F. McElroy
Robert Hare's Electric Furnace.....C. A. Doremus
On the Direct Synthesis of Hydrocyanic Acid.E. W. Smith and R. S. Hutton
Distillation of Turpentine by Electricity.....F. T. Snyder
Power for Electrochemical Industries.....John Meyer
Forestry, Water Storage, Power and Navigation.....E. R. Taylor
Kinetic Molecular Energy.....C. P. Steinmetz
The Absorption of the Radio-Active Emanations by Charcoal..R. W. Boyle
Electrochemical Patents, and Some Needs of the United States Patent System.....A. B. Marvin, Jr.
The Latent Heat of Vaporization of Metals and Other Substances, J. W. Richards
Bibliography of Electrochemistry and Allied Subjects.....P. F. Mottelay
Memoir on the Methods of Treatment of Simple and Complex Ores of Molybdenum, Tungsten, Uranium and Vanadium—Part II, Tungsten.....Gustave Gin
Index.
Advertisements.

VOL. XIV—1908

New York Meeting, October 30-31, 1908

TABLE OF CONTENTS

Group Photograph of Fourteenth General Meeting.....*Frontispiece*
Proceedings of the Fourteenth General Meeting.
Members and Guests Registered.
Directory of Members, Alphabetical and Geographical.

PAPERS

Chemical Energy.....J. E. Mills
The Use of a Mercury Cathode in the Determination of Metals, A. H. Porter and F. C. Frary
The Determination of Zinc with the Aid of the Mercury Cathode and Rotating Anode.....L. G. Kollock and E. F. Smith
Equilibria in Standard Cells.....G. A. Hulett
The Behavior of the Nickel Anode and Its Bearing on Passivity.E. P. Schoch
The Formation of Nitric Oxide from the Air by Means of a Current of Electricity of Low Voltage.....G. W. Morden
The Theory of Electrolytic Paints.....W. D. Bancroft
The Corrosion of Iron—A General Discussion Opened by.....A. F. Ganz
The Function of Oxygen in the Corrosion of Metals.....Wm. H. Walker
Electrolytic Corrosion of the Bottoms of Oil Tanks and of Other Structures.....A. A. Knudson
The Protection of Steel Against Corrosion.....M. Toch
Heat Conductances Through the Walls of Furnaces.....Carl Hering
The Lash Steel Process and the Electric Furnace.....F. A. J. FitzGerald
Calculation of the Latent Heat of Vaporization of Zinc..W. McA. Johnson
Power for Electrochemical Industries.....John Meyer
Utilization of Power Stations for Electrochemical and Electrothermal Processes During Periods of Low Load.....E. A. Sperry
Index.
Advertisements.

VOL. XV—1909

Niagara Falls Meeting, May 6-8, 1909

TABLE OF CONTENTS

Portrait of President L. H. Baekeland.....*Frontispiece*
Proceedings of the Fifteenth General Meeting.
Report of the Board of Directors.
List of Members and Guests Registered.

PRESIDENTIAL ADDRESS.

The Electrochemist and the Conservation of Our Natural Resources. President E. G. Acheson

PAPERS

The Electric Shaft Furnace of the Aktiebolaget Elektrometall, Ludviga, Sweden.....Eugene Haanel
Electric Furnace Pig Iron in California.....P. McN. Bennie
The Noble Electric Steel Co.'s Plant.....Dorsey A. Lyon
The Electric Furnace Reduction of Iron Ore.....J. W. Richards
The Application of the Electric Furnace to Siderurgy...Ernesto Stassano
A Contribution to the Study of Electric Furnaces as Applied to the Manufacture of Iron and Steel.....C. A. Keller
The Girod Electric Furnace for the Manufacture of Steel.....Paul Girod
The Héroult Electric Steel Furnace.....Robert Turnbull
The Application of the Lash Process to the Electric Furnace, F. A. J. FitzGerald
Large Electric Furnaces in the Electro-Metallurgy of Iron and Steel .....Remo Catani
The Kjellin and Röchling-Rodenhauser Electric Furnaces....F. A. Kjellin
The Self-Circulating Gin Furnace for the Electric Manufacture of Steel .....Gustave Gin
Calculations of a Gin Self-Circulating Induction Steel Furnace.Gustave Gin
Decarburization of Ferro-Alloys.....Gustave Gin
Preparation of Ferro-Vanadium by Electrolysis.....Gustave Gin
Note upon the Manufacture of Silico-Vanadium.....Gustave Gin
The Present Value of Electric Structural Steel.....H. D. Hibbard
The Electro-Metallurgy of Iron and Steel.....A General Discussion
The Working Limit in Electrical Furnaces Due to the "Pinch" Phenomenon .....Carl Hering
Furnace Electrode Losses.....C. A. Hansen
A New Type of Ammeter for the Accurate Measurement of Alternating Currents Above 1,000 Amperes.....E. F. Northrup
Cooling Curves and a New Type of Apparatus for Their Autographic Registration .....E. F. Northrup
A New Radiation Pyrometer.....C. E. Foster
Observations on Alloys of Electrolytic Iron with Arsenic and Bismuth.....C. F. Burgess and Jas. Aston
Protection of Steel Against Corrosion—II.....Maximilian Toch
Some Physical Properties of Crystalline Silicon.....C. I. Zimmerman
Relative Efficiency of the Arc and Resistance Furnace for the Manufacture of Calcium Carbide, S. A. Tucker, W. A. Alexander and H. K. Hudson
Further Experiments with Calcium Alloys as Reducing Agents, O. P. Watts and E. R. Suhm
Electromagnetic Separation of Non-Magnetic, Non-Conducting Substances.....A. P. Steckel
Thermodynamics of the Weston Standard Cell.....G. A. Hulett
The Function of Addition Agents in Electrolytes.....E. F. Kern
Electrolytic Deposition of Lead and Zinc as Affected by the Addition of Certain Organic Compounds.S. A. Tucker and E. G. Thomssen

The Electrolytic Production of White Lead.....J. A. Yunck
Rapid Electrochemical Analysis; a Comparison of Several Methods,
L. S. Palmer and R. C. Palmer
The Deposition of Aluminium from Aqueous Solutions, Using
Rotating Cathodes.....S. A. Tucker and E. G. Thomssen
A Graphite Cathode Dish.....J. W. Turrentine
A Modified Oxy-Hydrogen Gas Coulometer.....J. W. Turrentine
The Electrolytic Deposition of Platinum.....W. J. McCaughey
Electro-Deposition of Some Metals from Acetone Solution,
H. E. Patten and W. R. Mott
On the Electrolytic Reduction of Nitric Acid—II,
H. E. Patten and W. J. McCaughey
Electrochemical Methods in Soil Investigations.....F. K. Cameron
Over-Voltage as a Factor in the Corrosion of Metals.....W. R. Mott
The Probable Electrical Nature of Chemical Energy.....A. H. Patterson
The Use of Bakelite for Electrical and Electrochemical Purposes,
L. H. Baekeland
Index.
Advertisements.

VOL. XVI—1909

New York Meeting, October 28-30, 1909

TABLE OF CONTENTS

Group Photograph at Sixteenth General Meeting.....*Frontispiece*
Proceedings of the Sixteenth General Meeting.
List of Members and Guests Registered.
Members Elected and Qualified.
Constitution of the Society.
By-Laws and Sundry Regulations.
Directory of Members, Alphabetical and Geographical.

PAPERS

Recent Advances in Electrochemical Analysis.....E. F. Smith
A New Electrolytic Method for the Preparation of Explosive
Antimony.....R. C. Palmer and L. S. Palmer
The Practical Conductance of Electrolytes.J. W. Richards and W. S. Landis
Certain Characteristics of Dry Cells.....C. F. Burgess and C. Hambuechen
Dry Cell Tests.....F. H. Loveridge
Power for Electrolytic Copper Refining.....W. L. Spalding
The Manufacture of Air-Saltpeter by the Process of the Badische
Analin and Soda-Fabrik.....Dr. Schönherr
Preparation and Properties of Pure Boron.....E. Weintraub
The Preparation of Calcium.....F. C. Frary and W. L. Badger
Preparation and Properties of Calcium Carbide.....M. deK. Thompson

The Preparation of Silundum,
S. A. Tucker, H. F. Kudlich and E. M. Heumann
The Titanium Arc.....W. S. Weedon
Contribution to the Electric Smelting of Iron Ore.....E. F. Taylor
Physical Properties of Iron-Copper Alloys...C. F. Burgess and Jas. Aston
Electro-Cementizing. A Process for Simultaneously Annealing, Cleaning and Zinc-Coating Wire.....A. Sang
Laws of Electrode Losses in Electric Furnaces.....Carl Hering
A New Method of Measuring Mean Thermal and Electrical Conductivities of Furnace Electrodes.....Carl Hering
Furnace Electrode Losses.....C. A. Hansen
Electrode Losses in Electric Furnaces.....E. F. Roeber
Memoir on the Methods of Treatment of Simple and Complex Ores of Molybdenum, Tungsten, Uranium, Vanadium—Part III, Vanadium .....G. Gin
Index.
Advertisements.

VOL. XVII—1910

Pittsburgh Meeting, May 4-7, 1910

TABLE OF CONTENTS

Portrait of President W. H. Walker, Ph.D.....*Frontispiece*
Proceedings of the Seventeenth General Meeting.
Report of the Board of Directors.
Members and Guests Registered.
Members Elected and Qualified.

ADDRESSES.

Science and Industry.....President L. H. Baekeland
The Conservation and Utilization of Natural Sources of Power.J. H. Finney
What Electrochemistry Is Accomplishing.....J. W. Richards

PAPERS

Possibilities of Cheap Power in the Pittsburgh District.....F. Crabtree
Induction Furnace Progress.....T. Rowlands
A New Electric Steel Furnace.....A. L. Queneau
The Presence and Influence of Gases in Steel.....P. L. T. Héroult
A Study in Heavy Alternating Current Conductors for Electric Furnaces .....K. C. Randall
Determination of the Constants of Materials for Furnace Electrodes .....Carl Hering
Empirical Laws of Furnace Electrodes.....Carl Hering
A New Radiation Pyrometer.....C. E. Foster
Ductile Tungsten and Molybdenum.....C. G. Fink
A New Method for the Electrolytic Winning and Refining of Metals.....E. M. Chance

A New Process for the Treating of Cobalt-Nickel Ores, Rich in Silver and Arsenic, by Combined Melting and Electrolytic Operations.....C. C. Cito
The Electrolytic Preparation of Magnesium..S. A. Tucker and F. L. Jouard
Electrodeposition of Lead from Perchlorate Baths.....F. C. Mathers
The Electrodeposition of Platinum—II..W. J. McCaughey and H. E. Patten
The Conductivity and Electrolysis of Cuprous Chloride Solutions, M. deK. Thompson and E. R. Hamilton
Comparison of Rapid Electro-Analytical Methods—I—The Determination of Copper.....F. C. Frary and A. P. Peterson
A Rotating Graphite Anode.....J. W. Turrentine
The Townsend Cell: Its Behavior Under Various Current Densities.....H. K. Richardson and R. L. Patterson
The Whiting Electrolytic Cell.....J. Whiting
Some Characteristics of the Modern Dry Cell.....D. L. Ordway
Electrochemical Potentials and Electrical Conductivity of Aluminum-Calcium Alloys.....J. M. Breckenridge
On the Electrolytic Reduction of Nitric Acid—III, H. E. Patten and W. J. McCaughey
The Effect of Moisture and of Solutions upon the Electric Conductivity of Soils.....R. O. E. Davis
The Separation of Oil from Condenser Water by Electrolysis, H. M. Goodwin and R. Ellis
Index.
Advertisements.

VOL. XVIII—1910

Chicago Meeting, October 13-15, 1910

TABLE OF CONTENTS

Photograph Taken at Eighteenth General Meeting.....*Frontispiece*
Proceedings of the Eighteenth General Meeting.
Members and Guests Registered.
Members Elected and Qualified.
Directory of Members, Alphabetical and Geographical.

PAPERS

The Evolution of the Lead Storage Battery.....Pedro G. Salom
The Self-Discharge of Planté and Faure Storage Batteries, O. W. Brown and W. G. Bowers
A New Secondary Cell.....D. J. Block
On the Electrolysis of Some Cyanides.....H. E. Patten and W. R. Mott
Some Practical Applications of Over-Voltage Phenomena..Carl Hambuechen
The Corrosion of Metallic Food Containers—Causes and Prevention .....Edward Gudeman

On the Relative Basicity of the Metals as Shown by Their Power to Replace One Another in Chemical Compounds.....L. Kahlenberg
Crystallization Through Porous Diaphragms.....J. H. Walton, Jr.
On the Effect of Water in Causing Chemical Reactions.....David Klein
Efficiency in the Electrolytic Production of Metallic Calcium, F. C. Frary, H. R. Bicknell and C. A. Tronson
The Electrolytic Preparation of Calcium.....A. R. Johnson
Electrochemistry of Polonium and Other Radio-Active Elements, A. R. Johnson
The Present Status of Ozone with Reference to Air Purification.R. D. Small
Electric Smelting Furnaces and Their Applications....Marcus Ruthenburg
The Hiorth Electric Steel Furnace.....J. W. Richards
Reduction of Tin Dross in an Electric Furnace.....R. S. Wile
Cast Copper of High Electrical Conductivity.....E. Weintraub
Method for Determining Thermal Conductivities.....Carl Hering
The Flow of Heat Through Furnace Walls.....F. T. Snyder
Some Alloys for Permanent Magnets.....C. F. Burgess and Jas. Aston
Applications of Electrostatic Separation to Ore Dressing..F. S. MacGregor
Notes on Tribo-Luminescence.....W. S. Andrews
The Unit Charge in Gaseous Ionization.....R. A. Millikan
Index.
Advertisements.

VOL. XIX—1911

New York City Meeting, April 6-8, 1911

TABLE OF CONTENTS

Portrait of President W. R. Whitney, Ph.D.....*Frontispiece*
Proceedings of the Nineteenth General Meeting.
Report of the Board of Directors.
Members and Guests Registered.
Members Elected and Qualified.

PRESIDENTIAL ADDRESS.

Chemical Research and Industrial Progress.....President W. H. Walker

PAPERS

Dry Cell Testing.....W. B. Pritz
The Tate Bifunctional Accumulator Plate.....A. O. Tate
Some Unsolved Problems in Electroplating.....G. B. Hogaboom
The Electrolytic Corrosion of Electroplated Objects.....W. S. Landis
Mercurous Perchlorate Electrolytic Meter, F. C. Mathers and A. F. O. Germann
Electrical Heating as a Means of Prevention of Superheating of Liquids .....J. H. Mathews
Polarization in Its Relation to the Decomposition Pressure of Electrolytes.....O. P. Watts

Electric Discharges in Gases at Reduced Pressure.....L. A. Parsons
The Mechanism of Electrolytic Transfer.....J. W. Richards
The Electrolytic System of Amalgamating Gold Ores.....E. E. Carey
The Clancy Electrochemical Cyanide Process.....J. C. Clancy
Some Observations on Laboratory Production of Aluminium,
H. K. Richardson
An Electrolytic Furnace Method for Producing Metals.....J. W. Beckman
Electrolytic Refining as a Step in the Production of Steel...C. F. Burgess
The Reliability of Electric Furnaces for Commercial Work...F. T. Snyder
The Electric Furnace for the Manufacture of Iron and Steel...Jas. Lyman
A Few Experiences with the 15-Ton Héroult Electric Furnace at
South Chicago.....C. G. Osborne
Electric Steel Processes as Competitors of the Bessemer and Open
Hearth.....A. E. Greene
A New Type of Electric Furnace.....Carl Hering
A New Electric Resistance Furnace.....F. A. J. FitzGerald
An Electric Furnace for Heating Bars and Billets.....T. F. Baily
A Replaceable Unit System of Electric Heating Apparatus....M. M. Kohn
The Johnson Electric Zinc Furnace.....J. W. Richards
The Condensation of Zinc Vapor from Electric Furnaces.....F. T. Snyder
Electrically Fused Alumina—"Alundum"—as a Refractory.L. E. Saunders
The Advantages of Keokuk, Iowa, for Electrochemical Industries,
F. P. H. Knight
The Advantages of Maine for Electrochemical Industries...C. Vey Holman
On the Relation of Surface Action to Electrochemistry.....H. E. Patten
The Clancy Electrochemical Cyanide Process.....Belated Discussion
Index.
Advertisements.

VOL. XX—1911

Toronto Meeting, September 21-23, 1911

TABLE OF CONTENTS

Group at Twentieth General Meeting.....*Frontispiece*
Proceedings of the Twentieth General Meeting.
Members and Guests Registered.
Members Elected and Qualified.
Directory of Members, Alphabetical and Geographical.

PAPERS

The Preparation and Properties of Metallic Cerium.....Alcan Hirsch
Transformation of Other Forms of Carbon into Graphite.....W. C. Arsem
The Effect of Organic and Inorganic "Addition Agents" upon the
Electro-Deposition of Copper from Electrolytes Containing
Arsenic.....Ching Yu Wen and E. F. Kern

The Conductivity of Mixtures of Copper Sulphate and Sulphuric Acid.....H. K. Richardson and F. D. Taylor
New Data on Some Electrical Properties of Sodium, Potassium and Their Alloy.....E. F. Northrup
The Electrical Resistance of Iron Alloys...Chas. F. Burgess and Jas. Aston
Thermal Conduction and Convection in Gases at Extremely High Temperatures .....Irving Langmuir
On the Measurement of Very Small Gas Pressures.....C. F. Hale
Galvanizing Wire in Zinc-Dust.....Alfred Sang
Titanium in Iron and Steel.....Chas. V. Slocum
Note on an Unsuccessful Furnace Experiment.....F. A. J. FitzGerald
Small Electric Furnace with Heating Element of Ductile Tungsten or Ductile Molybdenum.....R. Winne and C. Dantsizen
Design of a 30-Ton Induction Electric Furnace.....Albert Hiorth
Electric Furnace Treatment of Nickel Ore, and the Development of a Commercial Process.....W. L. Morrison
The Direct Production of Molybdenum Steel in the Electric Furnace.....E. J. Dittus and R. G. Bowman
Recent Progress in Electrical Iron Smelting in Sweden....T. D. Robertson
The Electrochemical Industries of Norway.....J. W. Richards
Electrochemical and Electrometallurgical Developments in Canada, Saul Dushman
The Mineral Resources of Ontario.....T. W. Gibson
Transforming Stations of Niagara Electrochemical and Electrometallurgical Industries.....A. J. Jones
Index.
Advertisements.

GENERAL INDEX

A Bomb Calorimeter for Use with Substances Whose Oxides Are Solids—H. N. Potter **11**, 259 (1907)
A Brief Description of the Working Models of Electric Furnaces, **11**, 411 (1907)
Absolute Potential Difference, Billitzer's Method for Determining —H. M. Goodwin and R. B. Sosman.....**7**, 83 (1905)
Absorption, Energy Changes Accompanying—H. E. Patten.**11**, 387 (1907)
Absorption of Radio-Active Emanations by Charcoal—R. W. Boyle, **13**, 429 (1908)
Absorption Phenomenon, The Migration and Flocculation of Colloids Considered as an—H. E. Patten.....**9**, 277 (1906)
Accessories in Electrolytic Plants, Pumps and Other—D. H. Browne and L. R. Vorce.....**2**, 219 (1902)
Accumulator Plate, The Tate Bifunctional—A. O. Tate....**19**, 47 (1911)
Accumulator, Theory of the Edison—E. F. Roeber.....**1**, 195 (1902)
Acetate Solutions, Electrolytic Precipitation of Lead from—R. C. Snowdon **9**, 223 (1906)
Acetone, Electrolytic Preparation of Iodoform from—G. A. Roush, **8**, 281 (1905)
Acetone Solution, Electro-Deposition of Some Metals from—H. E. Patten and W. R. Mott.....**15**, 529 (1909)
Acheson, E. G.—Address **13**, 7 (1908)
Acheson, E. G.—Deflocculated Graphite **12**, 29 (1907)
Acheson, E. G.—*Discussions*, **12**, 37 (1907); **13**, 49 (1908); **14**, 261 (1908)
Acheson, E. G.—*Portrait of* .....*Frontispiece*, **13** (1908)
Acheson, E. G.—The Electrochemist and the Conservation of Our Natural Resources—*Presidential Address*.....**15**, 17 (1909)
Acheson Graphite Company—Products.....**6** (I), 49 (1904)
Acid, Chromic, Electrolysis of—H. R. Carveth and B. E. Curry, **7**, 115 (1905)
Acid, Hydrocyanic, Direct Synthesis of—E. W. Smith and R. S. Hutton **13**, 359 (1908)
Acid, Nitric, Copper Cathodes in—J. W. Turrentine.....**10**, 49 (1906)
Acid, Nitric, Electrolytic Reduction of—H. E. Patten...**12**, 325 (1907)
Acid, Nitric, Electrolytic Reduction of—H. E. Patten and W. J. McCaughey **15**, 535 (1909)
Acid, Nitric, Electrolysis of, Using a Mercury Cathode—J. A. Wilkinson **13**, 309 (1908)

Acid, Nitric, Formation of, by Electric Energy—C. W. Volney, **3**, 285 (1903)
Acid, Sulphuric, Conductivity of Mixtures of Copper Sulphate and —H. K. Richardson and F. D. Taylor.....**20**, 179 (1911)
Acids, Basicity of, An Experiment on the Electrolytic Determination of the—I. J. Moltkehansen.....**4**, 39 (1903)
Acids, Observations on the Corrosion of Iron by—C. F. Burgess and S. G. Engle.....**9**, 199 (1906)
Acker, C. E.—Caustic Alkalies and Chlorine by the Dry Electrolytic Process **1**, 165 (1902)
Acker, C. E.—*Discussions*, **9**, 82 *et seq.*; 137 *et seq.* (1906); **10**, 40 (1906)
Acker Process Co.—Products.....**6** (I), 46 (1904)
A Closed Electric Furnace for Reducing and Distilling Metals from Their Ores—E. R. Taylor.....**11**, 295 (1907)
A Contribution to the Electrochemistry of Barium Compounds—M. M. Haff.....**2**, 267 (1902)
A Contribution to the Study of the Electric Arc—W. S. Weedon, **5**, 171 (1904)
A Contribution to the Study of Electric Furnaces as Applied to the Manufacture of Iron and Steel—C. A. Keller....**15**, 87 (1909)
Action, Electrolytic and Chemical, of Ammonium Persulphate on Metals—J. W. Turrentine.....**12**, 297 (1907)
Action of Carbon on Magnesia at High Temperatures—O. P. Watts **11**, 279 (1907)
Action, Protective, of Zinc Chloride on Metallic Iron—C. J. Reed, **3**, 149 (1903)
Adams, Isaac—The Development of the Nickel-Plating Industry, **9**, 211 (1906)
Adams, Isaac and MacNutt, Barry—Some Phenomena Observed in Connection with the Use of a Copper Voltameter...**5**, 191 (1904)
Addicks, Lawrence—Ammeters for Electrolytic Work....**9**, 239 (1906)
Addicks, Lawrence—*Discussions*, **4**, 75 (1903); **5**, 96 *et seq.* (1904); **7**, 61 (1905); **8**, 242 (1905); **14**, 164, 170 (1908)
Addicks, Lawrence—The Economic Balance in Electrolytic Copper Refining **5**, 119 (1904)
Addition Agents in Electrolytes, Function of—E. F. Kern.**15**, 441 (1909)
"Addition Agents" upon the Electro-Deposition of Copper from Electrolytes Containing Arsenic, The Effect of Organic and Inorganic—C. Y. Wen and E. F. Kern.....**20**, 121 (1911)
Addition of Certain Organic Compounds, Electrolytic Deposition of Lead and Zinc as Affected by the—S. A. Tucker and E. G. Thomssen **15**, 477 (1909)
Additional Experiments on the Electrolytic Corrosion of Brasses—A. T. Lincoln and G. C. Bartells, Jr.....**13**, 331 (1908)
Additions, Final, in Manufacturing Electric Steel.....**15**, 137 (1909)
Address of President Needham.....**5**. 1 (1904)

Address, Presidential—E. G. Acheson.....**15**, 17 (1909)
Address, Presidential—L. H. Baekeland.....**17**, 37 (1910)
Address, Presidential—W. D. Bancroft.....**9**, 13 (1906)
Address, Presidential—C. F. Burgess.....**13**, 17 (1908)
Address, Presidential—H. S. Carhart.....**7**, 15 (1905)
Address, Presidential—C. Hering **11**, 17 (1907)
Address, Presidential—J. W. Richards....**3**, 59 (1903); **5**, 37 (1904)
Address, Presidential—W. H. Walker.....**19**, 17 (1911)
A Diaphragm Cell for Electrolysis of Sodium Chloride Solutions—C. P. Townsend **7**, 63 (1905)
Advance Copies of Papers, Regulations Concerning.....**16**, 26 (1909)
Advances in Electrometallurgy of Iron Production—M. Ruthenburg **4**, 19 (1903)
Advances, Recent, in Electrochemical Analysis—E. F. Smith,.. **16**, 65 (1909)
Advances, Some, in the Closed and Continuous-Working Electric Furnace—E. R. Taylor.....**2**, 185 (1902)
Advantages of Keokuk, Iowa, for Electrochemical Industries—F. P. H. Knight.....**19**, 345 (1911)
Advantages of Maine for Electrochemical Industries—C. Vey Holman **19**, 351 (1911)
Advertisements in the Bulletin, Regulations Concerning...**16**, 27 (1909)
A Few Experiences with the 15-Ton Héroult Electric Furnace at South Chicago—C. G. Osborne.....**19**, 205 (1911)
A Further Contribution to the Study of Concentration Cells—H. S. Carhart and F. J. Mellencamp.....**12**, 399 (1907)
Agents, Addition, Function of, in Electrolytes—E. F. Kern**15**, 441 (1909)
A Granular Carbon Resistance Furnace—S. A. Tucker...**11**, 307 (1907)
A Graphite Cathode Dish—J. W. Turrentine.....**15**, 505 (1909)
Air, Formation of Nitric Oxide from, by Low Voltage Current—G. W. Morden.....**14**, 113 (1908)
Air, Purification of, by Ozone—R. D. Small.....**18**, 171 (1910)
Air-Saltpeter, Manufacture of—Dr. Schönherr.....**16**, 131 (1909)
Aktiebolaget Elektrometall, Electric Shaft Furnace of—E. Haanel, **15**, 25 (1909)
Albro, A. B.—*Discussion* **7**, 271 (1905)
Albro, A. B.—The Analysis of Silicon Compounds.....**11**, 229 (1907)
Albro, A. B.—The Microstructure of Silicon and Alloys Containing Silicon **7**, 251 (1905)
Alcohol Solutions at 25 Degrees, Solubility of Boric, Camphoric, Benzoic and Salicylic Acids in Aqueous Ethyl—Atherton Seidell **13**, 319 (1908)
Aldrich, R. C.—*Discussion* **16**, 120, 256 (1909)
Alexander, W. A., Tucker, S. A., and Hudson, H. K.—Relative Efficiency of Arc and Resistance Furnaces for Calcium Carbide **15**, 411 (1909)

Alkalies and Chlorine by the Dry Electrolytic Process—C. E. Acker **1**, 165 (1902)
Allegheny Plate Glass Company, Glassmere, Pa.....**17**, 16 (1910)
Alloying of Calcium and Iron—Alcan Hirsch and Jas. Aston, **13**, 143 (1908)
Alloys, Calcium, as Reducing Agents, Further Experiments with—O. P. Watts and E. R. Suhm.....**15**, 421 (1909)
Alloys Containing Silicon, Microstructure of Silicon and—A. B. Albro **7**, 251 (1905)
Alloys, Copper-Iron, Physical Properties of—C. F. Burgess and Jas. Aston **16**, 241 (1909)
Alloys, Deoxidizing, Used in Manufacture of Steel.....**15**, 138 (1909)
Alloys, Electrochemical Potential and Electrical Conductivity of Aluminum-Calcium—J. M. Breckenridge.....**17**, 367 (1910)
Alloys, Electrolytic Deposition of Nickel-Zinc—E. P. Schoch and A. Hirsch **11**, 135 (1907)
Alloys, Electromotive Force of—W. D. Bancroft.....**3**, 297 (1903)
Alloys, Ferro-, Decarburization of—G. Gin.....**15**, 225 (1909)
Alloys for Aluminothermic Work, The Preparation of Calcium—O. P. Watts and J. M. Breckenridge.....**13**, 153 (1908)
Alloys for Permanent Magnets, Some—C. F. Burgess and Jas. Aston **18**, 255 (1910)
Alloys, Iron, Electrical Resistance of—C. F. Burgess and J. Aston, **20**, 205 (1911)
Alloys of Electrolytic Iron with Arsenic and Bismuth—C. F. Burgess and Jas. Aston.....**15**, 369 (1909)
A Low Voltage Standard Cell—G. A. Hulett.....**7**, 333 (1905)
Alphabetical List of Members, **1**, 19 (1902); **2**, 9 (1902); **3**, 17 (1903); **5**, 15 (1904); **8**, 7 (1905); **10**, 8 (1906); **12**, 5 (1907); **14**, 8 (1908); **16**, 28 (1909); **18**, 10 (1910); **20**, 12 (1911)
Alternating Current Conductors for Electric Furnaces, A Study in Heavy—K. C. Randall.....**17**, 139 (1910)
Alternating Current, Dissociation by—W. H. Davis.....**5**, 241 (1904)
Alternating Current, Electrolysis by an—Jos. W. Richards.**1**, 221 (1902)
Alternating Current, Electrolysis of Sodium Hydroxide by—C. Hambuechen 4, 105 (1903)
Alternating Current Electrolysis with Cadmium Electrodes—G. R. White **9**, 305 (1906)
Alternating Currents, A New Type of Ammeter for—E. F. Northrup **15**, 303 (1909)
Alumina-Cryolite Mixtures, Melting Points of Some—F. R. Pyne, **10**, 63 (1906)
Alumina, Electrically-Fused (Alundum), as a Refractory—L. E. Saunders **19**, 333 (1911)
Aluminium, Deposition of, from Aqueous Solutions—S. A. Tucker and E. G. Thomssen.....**15**, 497 (1909)

~~4316~~
12336

Aluminium, Some Observations on Laboratory Production of—H. K. Richardson.....**19**, 159 (1911)
Aluminothermics—H. Goldschmidt .....**6** (II), 85 (1904)
Aluminothermic Work, Preparation of Calcium Alloys for—O. P. Watts and J. M. Breckenridge.....**13**, 153 (1908)
Aluminum, Analytical Study of the Deposition of, from Ethyl Bromide Solution—H. E. Patten.....**6** (I), 9 (1904)
Aluminum and Its Compounds.....**6**, (I), 47, 48 (1904)
Aluminum and Magnesium Cell, An—H. T. Barnes and G. H. Cole **10**, 55 (1906)
Aluminum and Zinc, Surface Properties of—W. J. Hammer, **11**, 383 (1907)
Aluminum as a Reducing Agent—O. P. Watts.....**8**, 101 (1905)
Aluminum Bromide, Heat of Solution of, in Ethyl Bromide—H. E. Patten **7**, 177 (1905)
Aluminum-Calcium Alloys, Electrochemical Potentials and Electrical Conductivity of—J. M. Breckenridge.....**17**, 367 (1910)
Aluminum, Corrosion of—J. A. Steinmetz.....**3**, 217 (1903)
Aluminum Electrolytic Condenser—C. I. Zimmerman.....**5**, 147 (1904)
Aluminum Electrolytic Condenser—C. I. Zimmerman.....**7**, 309 (1905)
Aluminum, Industrial Application of—E. Blough.....**13**, 165 (1908)
Aluminum-Magnesium Cell, etc.—H. T. Barnes and C. W. Shearer, **13**, 169 (1908)
Aluminum Rectifier—W. D. Bancroft.....**6** (I), 13 (1904)
Aluminum, Some Results of Experiments with the Electrodeposition of Metals on—A. Lodyguine.....**7**, 153 (1905)
Aluminum, The Nature of the Surface Film Formed on, etc.—H. T. Barnes and G. W. Shearer.....**13**, 169 (1908)
"Alundum," Electrically Fused Alumina, as a Refractory—L. E. Saunders **19**, 333 (1911)
Amalgam Process, The Influence of Some Impurities in Salt upon the Yield of Caustic Soda by the—J. W. Walker and C. S. Paterson **3**, 185 (1903)
Amalgamating Gold Ores, The Electrolytic System of—Elmer E. Carey **19**, 127 (1911)
Amberg, R.—*Discussion* **17**, 136 (1910)
Amendment to the Constitution of the Society..**5**, 4 (1904); **7**, 7 (1907)
American Electrochemical Society—C. Hering **11**, 17 (1907)
American Electrochemical Society—J. W. Richards.....**1**, 1 (1902)
A Method of Electrolytic Production of Zinc from Its Ores—S. S. Sadtler **1**, 141 (1902)
Ammeter, A New Type of—E. F. Northrup.....**15**, 303 (1909)
Ammeters for Electrolytic Work—L. Addicks.....**8**, 239 (1905)
Ammonium Persulphate, Electrolytic and Chemical Action of, on Metals—J. W. Turrentine.....**12**, 297 (1907)
A Modified Oxy-Hydrogen Gas Coulometer—J. W. Turrentine, **15**, 515 (1909)

An Aluminum and Magnesium Cell—G. H. Cole and H. T. Barnes, **10**, 55 (1906)
Analysis, Electrochemical—*General Discussion* **11**, 115 (1907)
Analysis, Electrochemical, Recent Advances in—E. F. Smith, **16**, 65 (1909)
Analysis of Silicon Compounds—A. B. Albro.....**12**, 229 (1907)
Analysis, Rapid Electrochemical—L. C. Palmer and R. C. Palmer, **15**, 489 (1909)
An Analytical Study on the Deposition of Aluminium from Ethyl Bromide Solution—H. E. Patten.....**6** (I), 9 (1904)
Andrews, W. S.—Notes on Tribo-Luminescence.....**18**, 279 (1910)
An Electric Furnace for Heating Bars and Billets—Thaddeus F. Baily **19**, 285 (1911)
An Electrochemical Paradox—C. Hering **2**, 139 (1902)
An Electrolytic Furnace Method for Producing Metals—John Woods Beckman **19**, 171 (1911)
An Electrolytic Process for Refining Silver—A. G. Betts..**8**, 121 (1905)
An Electrolytic Switch—W. S. Horry.....**7**, 237 (1905)
A New Application of Chlorine in Metallurgy—C. E. Baker, **12**, 155 (1907)
A New Electric Resistance Furnace—F. A. J. FitzGerald.**19**, 273 (1911)
A New Electric Steel Furnace—A. L. Queneau.....**17**, 131 (1910)
A New Electrolyte for the Silver Coulometer—H. S. Carhart, H. H. Willard and W. D. Henderson.....**9**, 375 (1906)
A New Electrolytic Method for the Preparation of Explosive Antimony—R. C. and L. S. Palmer.....**16**, 79 (1909)
A New Method of Measuring Mean Thermal and Electrical Conductivities of Furnace Electrodes—Carl Hering....**16**, 317 (1909)
A New Method for the Electrolytic Winning and Refining of Metals—E. M. Chance.....**17**, 235 (1910)
A New Process for the Treating of Cobalt-Nickel Ores Rich in Silver and Arsenic by Combined Melting and Electrolytic Operations—C. C. Cito **17**, 239 (1910)
A New Radiation Pyrometer—Chas. E. Foster.....**15**, 361 (1909)
A New Radiation Pyrometer—Chas. E. Foster.....**17**, 223 (1910)
A New Secondary Cell—D. J. Block.....**18**, 79 (1910)
A New Type of Ammeter for the Accurate Measurement of Alternating Currents Above 1,000 Amperes—E. F. Northrup, **15**, 303 (1909)
A New Type of Electric Furnace—Carl Hering.....**19**, 255 (1911)
A New Type of Electrolytic Cell—P. G. Salom.....**4**, 101 (1903)
An Experiment on the Electrolytic Determination of the Basicity of Acids—I. J. Moltkehansen.....**4**, 39 (1903)
An Experimental Study of Some Electrode Effects—H. M. Tory and H. T. Barnes **3**, 95 (1903)
An Historical Review of the Storage Battery—H. B. Coho.**3**, 159 (1903)

An Index to Electrochemistry and Its Application—A. L. Voege, **5**, 223 (1904)
An Instructive Laboratory Experiment in Applied Electrochemistry —W. H. Walker **9**, 23 (1906)
Annealing, Electrical Testing of Iron During the—E. E. F. Creighton **13**, 127 (1908)
Annual Election, Report of, **3**, 3 (1903); **5**, 5 (1904); **7**, 9 (1905); **9**, 3 (1906); **11**, 4 (1907); **13**, 3 (1908); **15**, 4 (1909); **17**, 8 (1910); **19**, 2 (1911)
Annual Report of Board of Directors, **1**, 11 1902); **2**, 6 (1902); **3**, 6 (1903); **4**, 4 (1903); **5**, 7 (1904); **6**, 5 (1904); **7**, 8 (1905); **8**, 5 (1905); **9**, 7 (1906); **11**, 11 (1907); **13**, 9 (1908); **15**, 8 (1909); **17**, 24 (1910); **19**, 8 (1911)
Annual Report of Secretary, **3**, 7 (1903); **5**, 9 (1904); **7**, 3 (1905); **9**, 9 (1906); **11**, 12 (1907); **13**, 10 (1908); **15**, 9 (1909); **17**, 25 (1910); **19**, 9 (1911)
Annual Report of Treasurer, **3**, 9 (1903); **5**, 10 (1904); **7**, 2 (1905); **9**, 9 (1906); **11**, 15 (1907); **13**, 13 (1908); **15**, 13 (1909); **17**, 29 (1910); **19**, 12 (1911)
Anode, A Rotating Graphite—J. W. Turrentine.....**17**, 303 (1910)
Anodes, Copper, in Chloride Solutions—Saul Dushman..**13**, 313 (1908)
Anodes, Electrolytic Dissolution of Soluble Metallic—W. McA. Johnson **2**, 171 (1902)
Anodes, Ferromanganese, in Caustic Soda Solutions—G. R. White, **9**, 255 (1906)
An Optical Method of Observing the Diffusion in Electrolytes—C. Hambuechen **7**, 305 (1905)
A Novel Concentration Cell—H. S. Carhart.....**1**, 105 (1902)
Antimony, Explosive—R. C. and L. S. Palmer.....**16**, 79 (1909)
Antimony, Notes on the Electrometallurgy of—A. G. Betts.**8**, 187 (1905)
Appliances for Electric Fusion and Other Work, Some Small Laboratory—S. S. Sadtler.....**10**, 45 (1906)
Application of the Electric Furnace to Siderurgy—E. Stassano, **15**, 63 (1909)
Application of the Lash Process to the Electric Furnace—F. A. J. FitzGerald **15**, 149 (1909)
Applications, Industrial, of Aluminum—E. Blough.....**13**, 165 (1908)
Applications of Electric Smelting Furnaces—M. Ruthenburg, **18**, 185 (1910)
Applications of Electrostatic Separation to Ore Dressing—F. S. MacGregor **18**, 267 (1910)
Applications, Practical, of Over-Voltage Phenomena—C. Hambuechen **18**, 91 (1910)
Applied Electrochemistry, An Instructive Laboratory Experiment in—W. H. Walker.....**9**, 23 (1906)

Applied Electrochemistry, Some Aspects of—W. McA. Johnson, **6** (I), 25 (1904)
A Practical Limitation of Resistance Furnaces; the "Pinch" Phenomenon—C. Hering **11**, 329 (1907)
A Practical Utilization of the Passive State of Iron—C. F. Burgess **4**, 31 (1903)
Aqueous Solution, Deposition of Aluminium from—S. A. Tucker and E. G. Thomssen.....**15**, 497 (1909)
Aqueous Solutions, Free Ions in—W. R. Whitney.....**3**, 101 (1903)
Aqueous Solutions, Single Potentials of Zinc in—H. E. Patten and W. R. Mott.....**3**, 317 (1903)
Arc and Resistance Furnaces for Calcium Carbide, Relative Efficiency of—S. A. Tucker, W. A. Alexander and H. K. Hudson **15**, 411 (1909)
Arc, Electric, Contribution to the Study of—W. S. Weedon.**5**, 171 (1904)
Arc, The Mercury—E. Weintraub.....**7**, 273 (1905)
Arc, The Titanium—W. S. Weedon.....**16**, 217 (1909)
Arcs—W. R. Whitney.....**7**, 291 (1905)
A Replaceable Unit System of Electric Heating Apparatus—M. M. Kohn **19**, 299 (1911)
Armour and Company, Visit to Plant of.....**18**, 2 (1910)
Armstrong, Sir H. E.—*Discussion* **16**, 76 (1909)
A Rotating Graphite Anode—J. W. Turrentine.....**17**, 303 (1910)
Arsem, W. C.—*Discussion* **16**, 301 (1909)
Arsem, W. C.—The Electric Vacuum Furnace.....**9**, 153 (1906)
Arsem, W. C.—Transformation of Other Forms of Carbon into Graphite **20**, 105 (1911)
Arsenic, Alloys of, with Electrolytic Iron—C. F. Burgess and Jas. Aston **15**, 369 (1909)
Arsenic in Pickling Solutions, Some Observations on the Influence of—C. F. Burgess.....**8**, 165 (1905)
Ashcroft, E. A.—Sodium Production; A New Process.....**9**, 123 (1906)
Assistant Secretary, Appointment of.....**19**, 8 (1911)
A Standard Method of Determining the Specific Resistance of Electrolytes—R. Threlfall **8**, 193 (1905)
Aston, James—*Discussion* .....**20**, 223 *et seq.* (1911)
Aston, James and Burgess, C. F.—Observations on Alloys of Electrolytic Iron with Arsenic and Bismuth.....**15**, 369 (1909)
Aston, James and Burgess, C. F.—Physical Properties of Iron-Copper Alloys **16**, 241 (1909)
Aston, James and Burgess, C. F.—Some Alloys for Permanent Magnets **18**, 255 (1910)
Aston, James and Burgess, C. F.—The Electrical Resistance of Iron Alloys **20**, 205 (1911)
Aston, James and Hirsch, Alcan—Alloying of Calcium and Iron, **13**, 143 (1908)
A Strange Observation—I. J. Moltkehansen.....**5**, 273 (1904)

A Study in Heavy Alternating Current Conductors for Electric Furnaces—K. C. Randall.....**17**, 139 (1910)
A Study of the Materials Used in Standard Cells and Their Preparation—H. S. Carhart and G. A. Hulett.**6** (II), 109 (1904)
A Thermodynamical Note on the Theory of the Edison Accumulator —E. F. Roeber **1**, 195 (1902)
A Thermo-Electric Pyrometer for General Industrial Applications —F. F. Schuetz **10**, 81 (1906)
A Thermo-Electric Theory of Concentration Cells—H. S. Carhart, **2**, 123 (1902)
Atom of Electrochemistry—A. Reuterdahl.....**1**, 229 (1902)
Atomic Weights, The Interdependence of, and Electrochemical Equivalents—A. Reuterdahl **7**, 187 (1905)
A Unit of Electrical Quantity for Use in Electrochemical Calculations—A. H. Cowles **2**, 207 (1902)
A University Course in Electrochemistry—J. W. Richards..**1**, 51 (1902)
Autographic Registration of Cooling Curves—E. F. Northrup, **15**, 331 (1909)
Automatic Electric Co., Chicago, Visit to.....**18**, 1 (1910)
Award, Research **11**, 43 (1907)
A Zinc-Bromide Storage Battery—H. H. Dow.....**1**, 127 (1902)
Badger, W. L., and Frary, F. C.—The Preparation of Calcium, **16**, 185 (1909)
Badische Anilin and Soda Fabrik, Manufacture of Air Saltpeter by the Process of—Dr. Schönherr.....**16**, 131 (1909)
Baekeland, L. H.—*Discussions*, **3**, 83, 89, 151, 173, 214 (1903); **11**, 357 (1907); **13**, 259 *et seq.*, 444 (1908); **15**, 612 *et seq.* (1909); **16**, 94, 118 *et seq.*, 223 *et seq.*, 253 *et seq.* (1909); **17**, 101, 326, 338 *et seq.* (1910)
Baekeland, L. H.—*Portrait of* .....*Frontispiece*, **15** (1909)
Baekeland, L. H.—Remarks at Close of Fifteenth General Meeting. **15**, 7 (1909)
Baekeland, L. H.—Remarks on Accepting Election as President, **15**, 5 (1909)
Baekeland, L. H.—Science and Industry—*Presidential Address*, **17**, 37 (1910)
Baekeland, L. H.—The Use of Bakelite for Electrical and Electrochemical Purposes **15**, 593 (1909)
Baily, T. F.—An Electric Furnace for Heating Bars and Billets, **19**, 285 (1911)
Baily, T. F.—*Discussions* .....**19**, 231, 295 *et seq.* (1911)
Bakelite, Use of, for Electrical and Electrochemical Purposes—L. H. Baekeland **15**, 593 (1909)
Baker, C. E.—A New Application of Chlorine in Metallurgy, **12**, 155 (1907)
Baker, C. E.—*Discussions* ....**12**, 161 *et seq.* (1907); **19**, 184 (1911)

Balance, Economic, in Electrolytic Copper Refining—L. Addicks, **5**, 119 (1904)

Bancroft, W. D.—Constant Voltage and Constant Current Separations **3**, 85 (1903)

Bancroft, W. D.—*Discussions*, **1**, 47 *et seq.*, 68, 110, 125 (1902); **2**, 61, 109, 129 *et seq.*, 147, 174, 193 *et seq.*, 215 *et seq.* (1902); **3**, 83, 89 *et seq.*, 123 *et seq.*, 252, 293, 316, 356 *et seq.* (1903); **4**, 54, 80 *et seq.*, 187 (1903); **5**, 122 (1904); **6** (I) 23 *et seq.*, 43 (1904); **6** (II) 52, 65, 84, 106 *et seq.*, 127, 158 (1904); **8**, 55 *et seq.*, 96 *et seq.*, 104, 112 *et seq.*, 124, 132, 135 *et seq.*, 155, 163 *et seq.*, 191, 235, 259 *et seq.*, 286 (1905); **9**, 30 *et seq.*, 63 *et seq.*, 82 *et seq.*, 99 *et seq.*, 119 *et seq.*, 145, 150 *et seq.*, 171 *et seq.*, 196 *et seq.*, 206 *et seq.*, 217 *et seq.*, 238, 246 *et seq.*, 254 *et seq.*, 289, 303 *et seq.*, 314, 327 *et seq.*, 354, 361 *et seq.*, 392 *et seq.* (1906); **10**, 33 *et seq.*, 39 *et seq.*, 54, 60 *et seq.* (1906); **11**, 34, 78, 116, 133, 151, 205, 288, 405 (1907); **13**, 50, 98. 241, 261, 285, 307, 337 (1908); **14**, 93, 112, 166 (1908)

Condenser, Aluminum Electrolytic—C. I. Zimmerman.....**5**, 147 (1904)
Condenser, Aluminum Electrolytic—C. I. Zimmerman.....**7**, 309 (1905)
Condenser Water by Electrolysis, The Separation of Oil from—H. M. Goodwin and R. Ellis.....**17**, 405 (1910)
Conditions of Progress in Electrochemistry—J. W. Richards.**3**, 59 (1903)
Conductance, Practical, of Electrolytes—J. W. Richards and W. S. Landis **16**, 85 (1909)
Conductances, Heat, Through Walls of Furnaces—C. Hering, **14**, 215 (1908)
Conduction and Convection, Thermal, in Gases at Extremely High Temperatures—Irving Langmuir **20**, 225 (1911)

Conduction, Electric—C. P. Steinmetz.....**11**, 81 (1907)
Conduction, Electrolytic—J. W. Richards.....**6** (II), 152 (1904)
Conduction, Electrolytic, Some Phenomena of—C. J. Reed.**2**, 235 (1902)
Conduction, Electrolytic, Without Electrodes—A. B. Marvin.**3**, 347 (1903)
Conduction in Fused and Solid Electrolytes—J. W. Richards.**7**, 71 (1905)
Conductivities, Mean Thermal and Electrical, of Furnace Electrodes—C. Hering **16**, 317 (1909)
Conductivities, Thermal, Method for Determining—Carl Hering, **18**, 213 (1910)
Conductivity and Electrolysis of Cuprous Chloride Solutions—M. deK. Thompson and E. R. Hamilton.....**17**, 287 (1910)
Conductivity, Cast Copper of High Electrical—E. Weintraub, **18**, 207 (1910)
Conductivity, Electrical, Density, and Viscosity of Fused Salts—H. M. Goodwin and R. D. Mailey.....**11**, 211 (1907)
Conductivity, Electrical, of Aluminum-Calcium Alloys, Electrochemical Potentials and—J. M. Breckenridge.....**17**, 367 (1910)
Conductivity, Heat, of Carbon—F. A. J. FitzGerald.....**12**, 165 (1907)
Conductivity, Molecular—C. J. Reed **5**, 103 (1904)
Conductivity of Mixtures of Copper Sulphate and Sulphuric Acid—H. K. Richardson and F. D. Taylor.....**20**, 179 (1911)
Conductivity of Soils, The Effect of Moisture and of Solutions upon the Electric—R. O. E. Davis.....**17**, 391 (1910)
Conductivity, Thermal, of Electrodes—C. A. Hansen.....**16**, 350 (1909)
Conductors, Electrolytic, On the Nature of—L. Kahlenberg, **13**, 265 (1908)
Conductors for Electric Furnaces, A Study of Heavy Alternating Current—K. C. Randall.....**17**, 139 (1910)
Conduit, Electrochemical Corrosion of the Rochester Steel—R. H. Gaines **13**, 55 (1908)
Conservation and Utilization of Natural Sources of Power—J. H. Finney **17**, 55 (1910)
Conservation of Natural Resources, Resolution Concerning.**16**, 3 (1909)
Conservation of Our National Resources, Resolution upon.**14**, 3 (1908)
Conservation of Our Natural Resources, The Electrochemist and—E. G. Acheson **15**, 17 (1909)
Considerations, Theoretical, in the Construction of Resistance Furnaces—F. A. J. FitzGerald **4**, 9 (1903)
Constants of Materials for Furnace Electrodes, Determinations of—C. Hering **17**, 151 (1910)
Constant Voltage and Constant Current Separations—W. D. Bancroft **3**, 85 (1903)
Constitution, Amendments to the.....**5**, 4 (1904); **7**, 7 (1905)
Constitution of the Society **1**, 13 (1902); **16**, 14 (1909)
Construction and Accurate Measurement of Resistances of the Order of One Hundred Thousand Megohms—H. L. Bronson, **13**, 231 (1908)

Construction of Resistance Furnaces, Note on Some Theoretical Considerations in the—F. A. J. FitzGerald.....**4**, 9 (1903)
Continuous Advance of Electrochemistry—J. W. Richards..**5**, 37 (1904)
Continuous Electrolysis of Solutions of Metals—N. S. Keith, **1**, 131 (1902)
Continuous-Flow Electric Calorimetry, Theory and Practice of—H. T. Barnes **2**, 197 (1902)
Continuous Working Electric Furnace, Some Advances in the Closed and—E. R. Taylor.....**2**, 185 (1902)
Contribution to the Discussion of Brown and Oesterle's Paper—W. McA. Johnson **8**, 183 (1905)
Contribution to the Electric Smelting of Iron Ore—E. R. Taylor, **16**, 229 (1909)
Contribution to the Electrochemistry of Barium Compounds—M. M. Haff **2**, 267 (1902)
Contribution to the Study of Electrical Furnaces—C. A. Keller, **15**, 87 (1909)
Contribution to the Study of the Electric Arc—W. S. Weedon, **5**, 171 (1904)
Convection in Gases at Extremely High Temperatures, Thermal Conduction and—Irving Langmuir **20**, 225 (1911)
Cooling Curves and Apparatus for Their Registration—E. F. Northrup **15**, 331 (1909)
Copper Anodes in Chloride Solutions—Saul Dushman...**13**, 313 (1908)
Copper, Cast, of High Electrical Conductivity—E. Weintraub, **18**, 207 (1910)
Copper Cathodes in Nitric Acid—J. W. Turrentine.....**10**, 49 (1906)
Copper, Electrolytic Determination of Minute Quantities of—E. E. Free **12**, 307 (1907)
Copper, Electrolytic Separation of Silver and—H. W. Gillett, **12**, 255 (1907)
Copper, Exhibits of .....**6** (I), 50 (1904)
Copper from Electrolytes Containing Arsenic, The Effect of Organic and Inorganic "Addition Agents" upon the Electro-Deposition of—C. Y. Wen and E. F. Kern.....**20**, 121 (1911)
Copper-Iron Alloys, Physical Properties of—C. F. Burgess and J. Aston **16**, 241 (1909)
Copper Oxide Plate, The Reversible—W. McA. Johnson...**1**, 187 (1902)
Copper Refining, Electrolytic—W. D. Bancroft.....**4**, 55 (1903)
Copper Refining, Electrolytic, Economic Balance in—L. Addicks, **5**, 119 (1904)
Copper Refining, Electrolytic, Notes on Modern—T. Ulke.**3**, 219 (1903)
Copper Refining, Electrolytic, Power for—W. L. Spalding.**16**, 125 (1909)
Copper Refining Solutions, Notes on Economic Temperatures of—C. F. Burgess.....**7**, 51 (1905)
Copper Sulphate and Sulphuric Acid, The Conductivity of Mixtures of—H. K. Richardson and F. D. Taylor.....**20**, 179 (1911)

Copper, The Determination of—F. C. Frary and A. P. Peterson, **17**, 295 (1910)
Copper Voltameter, Some Phenomena Observed in Connection with —I. Adams and B. MacNutt.....**5**, 191 (1904)
Corrosion, Electrochemical, of Rochester Steel Conduit—R. H. Gaines **13**, 55 (1908)
Corrosion, Electrolytic, of Bottom of Oil Tanks—A. A. Knudson, **14**, 189 (1908)
Corrosion, Electrolytic, of Brasses—A. T. Lincoln.....**11**, 43 (1907)
Corrosion, Electrolytic, of Brasses, Experiments on the—A. T. Lincoln and G. C. Bartells, Jr.....**13**, 331 (1908)
Corrosion, Electrolytic, of Electroplated Objects—W. S. Landis, **19**, 59 (1911)
Corrosion, Electrolytic, of Structural Steel—M. Toch.....**9**, 77 (1906)
Corrosion, Electrolytic, of the Bronzes—B. E. Curry.....**9**, 173 (1906)
Corrosion of Aluminum—J. A. Steinmetz.....**3**, 217 (1903)
Corrosion of Iron by Acids, Observations on—C. F. Burgess and S. G. Engle.....**9**, 199 (1906)
Corrosion of Iron, Electrolytic Theory of the—A. S. Cushman, **12**, 403 (1907)
Corrosion of Iron from the Electrochemical Standpoint—C. F. Burgess **13**, 17 (1908)
Corrosion of Iron, *General Discussion on*.....**14**, 151 (1908)
Corrosion of Metallic Food Containers—Causes and Prevention—E. Gudeman **18**, 97 (1910)
Corrosion of Metals by Electrolysis—A. A. Knudson.....**3**, 195 (1903)
Corrosion of Metals, Function of Oxygen in—W. H. Walker, **14**, 175 (1908)
Corrosion of Metals, Over-Voltage as a Factor in—W. R. Mott, **15**, 569 (1909)
Corrosion, Protection of Steel Against—M. Toch **14**, 207 (1908)
Corrosion, Protection of Steel Against—M. Toch **15**, 391 (1909)
Costs, Power—C. E. Lucke.....**11**, 339 (1907)
Coulometer, A Modified Oxy-Hydrogen Gas—J. W. Turrentine, **15**, 515 (1909)
Coulometer, A New Electrolyte for the Silver—H. S. Carhart, H. H. Willard and W. D. Henderson.....**9**, 375 (1906)
Coulometer, Studies on the Silver—L. H. Duschak and G. A. Hulett **12**, 257 (1907)
Couple, Gladstone-Tribe, Note on the—W. D. Bancroft.....**1**, 65 (1902)
Course, University, in Electrochemistry—J. W. Richards....**1**, 41 (1902)
Cowles, A. H.—A Unit of Electrical Quantity for Use in Electrochemical Calculations **2**, 207 (1902)
Cowles, A. H.—*Discussions*, **2**, 170, 204, 215 *et seq.*, 245 *et seq.*, 263 *et seq.* (1902); **3**, 83, 125 *et seq.*, 144 *et seq.*, 294 (1903); **4**, 15 *et seq.*, 23, 189, *et seq.* (1903); **9**, 391 (1906); **15**, 503, 614 (1909); **19**, 122 *et seq.*, 167 *et seq.* (1911)

Crabtree, F.—Possibilities of Cheap Power in the Pittsburgh District **17**, 95 (1910)
Creighton, E. E. F.—*Discussions*, **5**, 166 *et seq.*, 185 *et seq.* (1904); **13**, 131 (1908)
Creighton, E. E. F.—Electrical Testing of Iron During the Annealing **13**, 127 (1908)
Crocker, F. B.—*Discussion* **11**, 189 (1907)
Crocker, F. B.—The Decker Primary Battery.....**10**, 107 (1906)
Crucible Steel Co. of America, Park Works.....**17**, 10 (1910)
Cyanide Process, Clancy Electrochemical—J. C. Clancy...**19**, 137 (1911)
Cryolite-Alumina Mixtures, Melting Points of Some—F. R. Pyne, **10**, 63 (1906)
Crystalline Silicon, Some Physical Properties of—C. I. Zimmerman **15**, 395 (1909)
Crystallization Through Porous Diaphragms—J. H. Walton, Jr., **18**, 109 (1910)
Cuprous Chloride Solutions, The Conductivity and Electrolysis of—M. deK. Thompson and E. R. Hamilton.....**17**, 287 (1910)
Current, Alternating, Dissociation by Means of—W. H. Davis, **5**, 241 (1904)
Current, Alternating, Electrolysis by—J. W. Richards....**1**, 221 (1902)
Current, Alternating, Electrolysis of Sodium Hydroxide by—C. Hambuechen **4**, 105 (1903)
Current Efficiency of an Electrolytic Cell—W. R. Mott...**11**, 195 (1907)
Current Electrochemical Theories—L. Kahlenberg.....**1**, 119 (1902)
Current Separations, Constant—W. D. Bancroft.....**3**, 85 (1903)
Currents, Direct, in Electrolytes Without Electrodes—C. Hering, **13**, 273 (1908)
Curry, B. E.—*Discussions*..**9**, 197 *et seq.*, 207 *et seq.*, 254, 328 (1906)
Curry, B. E.—Electrolytic Corrosion of the Bronzes.....**9**, 173 (1906)
Curry, B. E.—Electrolytic Precipitation of Bronzes.....**9**, 249 (1906)
Curry, B. E., and Carveth, H. R.—Chromium and the Electrolysis of Chromic Acid **7**, 115 (1905)
Cushman, A. S.—*Discussions*, **12**, 409 (1907); **14**, 140, 159 *et seq.*, 203 212 (1908)
Cushman, A. S.—The Electrolytic Theory of the Corrosion of Iron, **12**, 403 (1907)
Cyanides, On the Electrolysis of Some—H. E. Patten and W. R. Mott **18**, 83 (1910)
Dantsizen, C.—*Discussion* .....**20**, 290 *et seq.* (1911)
Dantsizen, C., and Winne, R.—Small Electric Furnace with Heating Element of Ductile Tungsten or Ductile Molybdenum, **20**, 287 (1911)
Davis, R. O. E.—The Effect of Moisture and of Solutions upon the Electrical Conductivity of Soils.....**17**, 391 (1910)
Davis, W. H.—Dissociation by Means of the Alternating Electric Current **5**, 241 (1904)

Decarburization of Ferro-Alloys—G. Gin.....**15**, 225 (1909)
Decker, F. A.—*Discussion* **10**, 120 (1906)
Decker Primary Battery—F. B. Crocker.....**10**, 107 (1906)
Decomposition Pressure of Electrolytes, Relation of Polarization to—O. P. Watts.....**19**, 91 (1911)
Deflocculated Graphite—E. G. Acheson.....**12**, 29 (1907)
Dennis, L. M.—*Discussion* .....**9**, 302 *et seq.* (1906)
Densities, Vapor, Determination of, in an Electric Furnace—W. Nernst **3**, 75 (1903)
Density, Electrical Conductivity and Viscosity of Fused Salts—H. M. Goodwin and R. D. Mailey.....**11**, 211 (1907)
Density, Electrolyte, in Storage Cells—L. Lyndon.....**9**, 67 (1906)
Deposition, Electrolytic, of Lead and Zinc, as Affected by Organic Compounds—S. A. Tucker and E. G. Thomssen....**15**, 477 (1909)
Deposition, Electrolytic, of Nickel-Zinc Alloys—II—E. P. Schoch and A. Hirsch **11**, 135 (1907)
Deposition, Electrolytic, of Platinum—W. J. McCaughey.**15**, 523 (1909)
Deposition of Aluminum from Aqueous Solutions—S. A. Tucker and E. G. Thomssen.....**15**, 497 (1909)
Deposition of Aluminum from Ethyl Bromide Solution—H. E. Patten .....**6** (I), 9 (1904)
Design of a 30-Ton Induction Electric Furnace—Albert Hiorth, **20**, 293 (1911)
Determination, Electrolytic, of the Basicity of Acids—I. J. Moltkehansen **4**, 39 (1903)
Determination, Electrolytic, of Minute Quantities of Copper—E. E. Free **12**, 307 (1907)
Determination of Free Silicon, Electrochemical Methods for the, in the Presence of Silica, Silicates, Oxides, Free Carbon and Silicon Carbide—W. R. Mott.....**12**, 241 (1907)
Determination of Radium, Electroscopic, Present in Some Tufa Deposits from Hot Springs, Ark.—H. Schlundt....**12**, 247 (1907)
Determination of Vapor Densities in an Electric Furnace—W. Nernst **3**, 75 (1903)
Determinations of the Constants of Materials for Furnace Electrodes—C. Hering **17**, 151 (1910)
Development of the Nickel-Plating Industry—I. Adams...**9**, 211 (1906)
Development of Water Power, Motion Concerning.....**16**, 4 (1909)
Developments in Canada, Electrochemical and Electrometallurgical—Saul Dushman **20**, 419 (1911)
Developments in Electro-Metallurgy of Iron and Steel—M. Ruthenburg **2**, 93 (1902)
Diamond and Moissanite—Natural, Meteoric and Artificial—G. F. Kunz.....**12**, 39 (1907)
Diaphragm Cell for Electrolysis of Sodium Chlorid Solutions—C. P. Townsend.....**7**, 63 (1905)
Diaphragm, Rotating—W. D. Bancroft.....**7**, 171 (1905)

Diaphragms, Metallic, Experiments with—W. D. Bancroft. **3**, 133 (1903)
Diaphragms, Metallic, Note on—E. A. Byrnes.....**4**, 135 (1903)
Diaphragms, Porous, Crystallization Through—J. H. Walton, Jr., **18**, 109 (1910)
Difference of Temperature, Thermo-Electromotive Force Without—H. S. Carhart **3**, 137 (1903)
Differences of Potential Between Manganese and Lead Peroxides and Various Aqueous and Non-Aqueous Solutions—L. Kahlenberg and A. S. McDaniel.....**9**, 365 (1906)
Differences of Potential Between Metallic Cadmium and Solutions of Cadmium Iodide in Various Solvents—L. Kahlenberg, **2**, 89 (1902)
Diffusion in Electrolytes, An Optical Method for Observing the—C. Hambuechen **7**, 305 (1905)
Dill, C., and Walker, W. H.—The Effect of Stress upon the E. M. F. of Soft Iron **11**, 153 (1907)
Direct Currents in Electrolytes Without Electrodes—C. Hering, **13**, 273 (1908)
Direct Production of Molybdenum Steel in the Electric Furnace—E. J. Dittus and R. G. Bowman **20**, 355 (1911)
Direct Synthesis of Hydrocyanic Acid—E. W. Smith and R. S. Hutton **13**, 359 (1908)
Directors, Report of Board of, **1**, 11 (1902); **2**, 6 (1902); **3**, 6 (1903); **4**, 4 (1903); **5**, 7 (1904); **6**, 5 (1904); **7**, 8 (1905); **8**, 5 (1905); **9**, 7 (1906); **11**, 11 (1907); **13**, 9 (1908); **15**, 8 (1909); **17**, 24 (1910); **19**, 8 (1911)
Directory of Members, Alphabetical, **1**, 19 (1902); **2**, 9 (1902); **3**, 17 (1903); **5**, 15 (1904); **8**, 7 (1905); **10**, 8 (1906); **12**, 5 (1907); **14**, 8 (1908); **16**, 28 (1909); **18**, 10 (1910); **20**, 12 (1911)
Directory of Members, Geographical, **1**, 30 (1902); **2**, 30 (1902); **3**, 43 (1903); **5**, 28 (1904); **8**, 21 (1905); **10**, 22 (1906); **12**, 20 (1907); **14**, 25 (1908); **16**, 53 (1909); **18**, 38 (1910); **20**, 43 (1911)
Discharge, Self-, of Planté and Faure Storage Batteries—O. W. Brown and W. G. Bowers.....**18**, 69 (1910)
Discharges, Electric, in Gases at Reduced Pressure—L. A. Parsons, **19**, 109 (1911)
Discussion, General, on Electro-Metallurgy of Iron and Steel, **15**, 237 (1909)
Discussion, General, on Recent Improvements in Electrochemical Analysis **11**, 115 (1907)
Discussion, General, on the Corrosion of Iron.....**14**, 151 (1908)
Discussion, General, on the Theory of Electrolytic Dissociation, **4**, 177 (1903)
Discussion of Experiments Made at Sault Ste. Marie on the Electrical Reduction of Iron Ores—J. W. Richards.....**12**, 81 (1907)

Disease, Treatment of, by Ultra-Violet Rays—Hammer, **3**, *Appendix* (1903)
Dish, Graphite Cathode—J. W. Turrentine **15**, 505 (1909)
Disintegration of Carbon, Cathodic, in Fused Sodium Chloride—G. I. Kemmerer **9**, 117 (1906)
Dissociation by Means of the Alternating Electric Current—W. H. Davis **5**, 241 (1904)
Dissociation, Electrolytic, Present Status of the Theory of—W. D. Bancroft **4**, 175 (1903)
Dissociation, Electrolytic, Thermochemistry of—C. J. Reed.**5**, 255 (1904)
Dissolution, Electrolytic, of Soluble Anodes—W. McA. Johnson, **2**, 171 (1902)
Distillation of Turpentine by Electricity—F. T. Snyder...**13**, 371 (1908)
Distilling and Reducing Metals. Closed Electric Furnace for—E. R. Taylor.....**11**, 295 (1907)
Distribution, Some Surface Factors Affecting—H. E. Patten, **10**, 67 (1906)
Dittus, E. J., and Bowman, R. G.—The Direct Production of Molybdenum Steel in the Electric Furnace.....**20**, 355 (1911)
Dodge, N.—*Discussion* **2**, 182 (1902)
Doremus, C. A.—*Discussions*, **1**, 46, 50, 80 *et seq.* (1902); **2**, 110 (1902); **5**, 250 (1904); **8**, 152 *et seq.* (1905); **11**, 37, 113, 118, 183 *et seq.* (1907)
Doremus, C. A.—*Resolutions by* **2**, 3 (1902)
Doremus, C. A.—Robert Hare's Electric Furnace.....**13**, 347 (1908)
Doty, A., Tucker, S. A., and Cauchois, R.—Granular Carbon Resistors **12**, 171 (1907)
Dow, H. H.—A Zinc-Bromide Storage Battery.....**1**, 127 (1902)
Dow, H. H.—*Discussion* .....**7**, 205 *et seq.* (1905)
Dressing, Ore, Applications of Electrostatic Separation to—F. S. MacGregor **18**, 267 (1910)
Drinker, Henry S.—Address of Welcome.....**8**, 1 (1905)
Dross, Tin, Reduction of, in an Electric Furnace—R. S. Wile, **18**, 205 (1910)
Dry Cell, Some Characteristics of the Modern—D. L. Ordway, **17**, 341 (1910)
Dry Cell Testing—W. B. Pritz.....**19**, 31 (1911)
Dry Cell Tests—F. H. Loveridge.....**16**, 109 (1909)
Dry Cells, Appointment of Committee on Testing of, **16**, 121 *et seq.* (1909)
Dry Cells, Certain Characteristics of—C. F. Burgess and C. Hambuechen **16**, 97 (1909)
Dry Cells on Ignition Service, The Use of—J. W. Brown.**13**, 173 (1908)
Dry Electrolytic Process for Caustic Alkalies and Chlorine—C. E. Acker **1**, 165 (1902)
Ductile Molybdenum, Electric Furnace with Heating Element of—R. Winne and C. Dantsizen **20**, 287 (1911)

Ductile Tungsten, Electric Furnace with Heating Element of—R. Winne and C. Dantsizen.....**20**, 287 (1911)
Ductile Tungsten and Molybdenum—C. G. Fink.....**17**, 229 (1910)
Durant, Edward—*Discussion* **13**, 424 (1908)
Duschak, L. H.—*Discussion* **12**, 294 (1907)
Duschak, L. H., and Hulett, G. A.—Studies on the Silver Coulometer **12**, 257 (1907)
Dushman, Saul—Copper Anodes in Chloride Solutions..**13**, 313 (1908)
Dushman, Saul—Electrochemical and Electrometallurgical Developments in Canada.....**20**, 419 (1911)
Dust, Metallic, The Phenomenon of the Formation of, from Cathodes—F. Haber **2**, 189 (1902)
Easterbrooks, F. D.—*Discussion* **8**, 203 (1905)
Easterbrooks, F. D.—Electrolytic *vs.* Sulphuric Acid Parting of Bullion **8**, 125 (1905)
Economic Balance in Electrolytic Copper Refining—L. Addicks, **5**, 119 (1904)
Economic Temperatures of Copper Refining Solutions, Notes on—C. F. Burgess.....**7**, 51 (1905)
Eddy, A. H.—*Discussions*.....**3**, 151, 237 *et seq.*, 252 *et seq.* (1903)
Edison Accumulator, Theory of—E. F. Roeber.....**1**, 195 (1902)
Edison Storage Battery, On the—M. DeK. Thompson and H. K. Richardson **7**, 95 (1905)
Edison Storage Battery, Present Status of—A. E. Kennelly and S. E. Whiting.....**6** (II), 135 (1904)
Edstrom, J. Sigfrid—Electrical Extraction of Nitrogen from the Air .....**6** (II), 17 (1904)
Effect of Moisture and of Solutions upon the Electric Conductivity of Soils—R. O. E. Davis.....**17**, 391 (1910)
Effect of Organic and Inorganic "Addition Agents" upon the Electrodeposition of Copper from Electrolytes Containing Arsenic—Ching Y. Wen and E. F. Kern.....**20**, 121 (1911)
Effect of Stress upon the Electromotive Force of Soft Iron—W. H. Walker and C. Dill **11**, 153 (1907)
Effect of Water in Causing Chemical Reactions—D. Klein.**18**, 113 (1910)
Effects, Electrode, Experimental Study of—H. M. Tory and H. T. Barnes **3**, 95 (1903)
Efficiency, Current, of an Electrolytic Cell—W. R. Mott..**11**, 195 (1907)
Efficiency in the Electrolytic Production of Metallic Calcium—F. C. Frary, H. R. Bicknell and C. A. Tronson....**18**, 117 (1910)
Efficiency of Electric Furnaces—Jos. W. Richards.....**2**, 51 (1902)
Efficiency of the Nickel-Plating Tank—O. W. Brown.....**4**, 83 (1903)
Efficiency, Relative, of Arc and Resistance Furnaces for Calcium Carbide—S. A. Tucker, W. A. Alexander and H. K. Hudson, **15**, 411 (1909)

Election, Report of Tellers of, **3**, 3 (1903); **5**, 5 (1904); **7**, 9 (1905); **9**, 3 (1906); **11**, 4 (1907); **13**, 3 (1908); **15**, 4 (1909); **17**, 8 (1910); **19**, 2 (1911)
Electric Arc, Contribution to the Study of—W. S. Weedon. **5**, 171 (1904)
Electric Calorimetry, Theory and Practice of Continuous-Flow—H. T. Barnes **2**, 197 (1902)
Electric Conduction—C. P. Steinmetz **11**, 81 (1907)
Electric Conductivity of Soils, Effect of Moisture and Solutions upon—R. O. E. Davis **17**, 391 (1910)
Electric Current, Dissociation by Means of the Alternating—W. H. Davis **5**, 241 (1904)
Electric Discharges in Gases at Reduced Pressure—L. A. Parsons, **19**, 109 (1911)
Electric Energy, Formation of Nitric Acid by—C. W. Volney, **3**, 285 (1903)
Electric Furnace and the Lash Steel Process—F. A. J. FitzGerald, **14**, 239 (1908)
Electric Furnace, Application of Lash Process to the—F. A. J. FitzGerald **15**, 149 (1909)
Electric Furnace, Application of the—E. Stassano **15**, 63 (1909)
Electric Furnace at South Chicago, A Few Experiences with the Héroult—C. G. Osborne **19**, 205 (1911)
Electric Furnace, Calculations of the Gin—G. Gin **15**, 215 (1909)
Electric Furnace, Closed—E. R. Taylor **11**, 295 (1907)
Electric Furnace, Closed and Continuous-Working, Some Advances in the—E. R. Taylor **2**, 185 (1902)
Electric Furnace Conversion of Iron Pyrites into a Magnetic Form—O. L. Kowalke **13**, 133 (1908)
Electric Furnace, Design of a 30-Ton Induction—Albert Hiorth, **20**, 293 (1911)
Electric Furnace, Determination of Vapor Densities in an—W. Nernst **3**, 75 (1903)
Electric Furnace, Direct Production of Molybdenum Steel in the—E. J. Dittus and R. G. Bowman **20**, 355 (1911)
Electric Furnace for Heating Bars and Billets—T. F. Baily, **19**, 285 (1911)
Electric Furnace for Obtaining Cooling Curves of Steel .. **15**, 356 (1909)
Electric Furnace for the Manufacture of Iron and Steel—Jas. Lyman **19**, 193 (1911)
Electric Furnace, Fusion of Quartz in the—R. S. Hutton .. **2**, 105 (1902)
Electric Furnace, Gin, Self-Circulating—G. Gin **15**, 205 (1909)
Electric Furnace, Girod, for the Manufacture of Steel—Paul Girod, **15**, 127 (1909)
Electric Furnace, Manufacture of Bisulphide of Carbon in—E. R. Taylor **1**, 115 (1902)
Electric Furnace, New Type of—Carl Hering **19**, 255 (1911)
Electric Furnace Pig Iron in California—P. McN. Bennie. **15**, 35 (1909)

Electric Furnace, Production of Silicon in the—F. J. Tone.**7**, 243 (1905)
Electric Furnace Products, Exhibit of—A. J. Rossi.....**5**, 275 (1904)
Electric Furnace Reduction of Iron Ore—J. W. Richards..**15**, 53 (1909)
Electric Furnace, Reduction of Tin Dross in an—R. S. Wile, **18**, 205 (1910)
Electric Furnace, Robert Hare's—C. A. Doremus.....**13**, 347 (1908)
Electric Furnace, Temperatures in, Use of Carbon for the Study of—F. A. J. FitzGerald.....**6** (I), 31 (1904)
Electric Furnace Treatment of Nickel Ore, and the Development of a Commercial Process—W. L. Morrison.....**20**, 315 (1911)
Electric Furnace with Heating Element of Ductile Tungsten or Ductile Molybdenum—R. Winne and C. Dantsizen.**20**, 287 (1911)
Electric Furnaces, A Study in Heavy Alternating Current Conductors for—K. C. Randall.....**17**, 139 (1910)
Electric Furnaces, Contribution to the Study of—C. A. Keller, **15**, 87 (1909)
Electric Furnaces, Description of.....**11**, 411 (1907)
Electric Furnaces, Efficiency of—J. W. Richards.....**2**. 51 (1902)
Electric Furnaces, Electrode Losses in—E. F. Roeber....**16**, 363 (1909)
Electric Furnaces, Kjellin and Röchling-Rodenhauser — F. A. Kjellin **15**, 173 (1909)
Electric Furnaces, Large, for Iron and Steel—R. Catani..**15**, 159 (1909)
Electric Furnaces, Laws of Electrode Losses in—Carl Hering, **16**, 265 (1909)
Electric Furnaces, Reliability of, for Commercial Work—F. T. Snyder **19**, 185 (1911)
Electric Furnaces, The Condensation of Zinc Vapor from—F. T. Snyder **19**, 317 (1911)
Electric Furnaces, Working Limit in, Due to the "Pinch" Phenomenon—C. Hering **15**, 255 (1909)
Electric Fusion and Other Work, Some Small Laboratory Appliances for—S. S. Sadtler.....**10**, 45 (1906)
Electric Heating Apparatus, Replaceable Unit System of—M. M. Kohn **19**, 299 (1911)
Electric Incandescent Lamp, Thermodynamics of—E. F. Roeber, **8**, 243 (1905)
Electric Manufacture of Steel, Self-Circulating Gin Furnace for—G. Gin **15**, 205 (1909)
Electric Pyrometer for General Industrial Applications, A Thermo—F. F. Schuetz.....**10**, 81 (1906)
Electric Pyrometer, Price Thermo-.....**10**, 101 (1906)
Electric Reduction Co., Products.....**6** (I). 52 (1904)
Electric Resistance Furnace, A New—F. A. J. FitzGerald.**19**, 273 (1911)
Electric Shaft Furnace in Sweden—E. Haanel.....**15**, 25 (1909)
Electric Smelting Experiments for the Manufacture of Ferro-Nickel from Pyrrhotite—E. A. Sjöstedt.....**5**. 233 (1904)

Electric Smelting Furnaces and Their Applications—M. Ruthenburg **18**, 185 (1910)
Electric Smelting of Iron, Notes on the Utilization of Blast-Furnace Gases in Connection with—A. J. Rossi.....**7**, 199 (1905)
Electric Smelting of Iron Ore—E. R. Taylor.....**16**, 229 (1909)
Electric Smelting of Zinc—O. W. Brown and W. F. Oesterle.**8**, 171 (1905)
Electric Steel Furnace, A New—A. L. Queneau.....**17**, 131 (1910)
Electric Steel Furnace at South Chicago.....**18**, 4 (1910)
Electric Steel Furnace, The Héroult—R. Turnbull **15**, 139 (1909)
Electric Steel Furnace, The Hiorth—J. W. Richards....**18**, 191 (1910)
Electric Steel Processes as Competitors of the Bessemer and Open-Hearth—Albert E. Greene.....**19**, 233 (1911)
Electric Tube Furnace—S. A. Tucker.....**11**, 303 (1907)
Electric Vacuum Furnace—W. C. Arsem.....**9**, 153 (1906)
Electric Zinc Furnace, The Johnson—J. W. Richards....**19**, 311 (1911)
Electrical Conductivity and Electrochemical Potentials of Aluminum-Calcium Alloys—J. M. Breckenridge.....**17**, 367 (1910)
Electrical Conductivity, Cast Copper of High—E. Weintraub, **18**, 207 (1910)
Electrical Conductivity, Density and Viscosity of Fused Salts—H. M. Goodwin and R. D. Mailey.....**11**, 211 (1907)
Electrical Conductivity, Mean, of Furnace Electrodes—Carl Hering, **16**, 317 (1909)
Electrical Endosmose, Note on—W. D. Bancroft.....**3**, 261 (1903)
Electrical Extraction of Nitrogen from the Air—J. S. Edstrom, **6** (II), 17 (1904)
Electrical Heating as a Means of Prevention of Superheating of Liquids—J. Howard Mathews.....**19**, 81 (1911)
Electrical Iron Smelting in Sweden, Recent Progress in—Thos. D. Robertson **20**, 375 (1911)
Electrical Manufacture of Steel, Gin Process for—G. Gin..**8**, 105 (1905)
Electrical Nature of Chemical Energy, The Probable—A. H. Patterson **15**, 575 (1909)
Electrical Plant for the Purification of Water by Ozone..**11**, 417 (1907)
Electrical Properties of Sodium, Potassium and Their Alloy, New Data on Some—E. F. Northrup.....**20**, 185 (1911)
Electrical Purposes, Use of Bakelite for—L. H. Baekeland.**15**, 593 (1909)
Electrical Quantity, A Unit of, for Use in Electrochemical Calculations—A. H. Cowles.....**2**, 207 (1902)
Electrical Reduction of Iron Ores, Discussion of Experiments Made at Sault Ste. Marie on—J. W. Richards.....**12**, 81 (1907)
Electrical Reduction of Lead—P. G. Salom.....**1**, 87 (1902)
Electrical Reduction of Titaniferous Iron Ores—G. Gin..**11**, 291 (1907)
Electrical Resistance of Iron Alloys—C. F. Burgess and Jas. Aston, **20**, 205 (1911)
Electrical Resistivity of Iron and Steel.....**15**, 223 (1909)

Electrical Resistivity of Iron and Steel at High Temperatures—G. Gin **8**, 287 (1905)
Electrical Structural Steel, Present Value of—H. D. Hibbard, **15**, 231 (1909)
Electrical Testing of Iron During the Annealing—E. E. F. Creighton **13**, 127 (1908)
Electrically Fused Alumina (Alundum) as a Refractory—L. E. Saunders **19**, 333 (1911)
Electro-Analytical Methods, Comparison of Rapid—I, The Determination of Copper—F. C. Frary and A. P. Peterson.**17**, 295 (1910)
Electro-Cementizing—A. Sang **16**, 257 (1909)
Electrochemical Analysis, *General Discussion on*.....**11**, 115 (1907)
Electrochemical Analysis, Rapid—L. S. Palmer and R. C. Palmer, **15**, 489 (1909)
Electrochemical Analysis, Recent Advances in—E. F. Smith.**16**, 65 (1909)
Electrochemical and Electrometallurgical Developments in Canada —Saul Dushman **20**, 419 (1911)
Electrochemical and Electrometallurgical Industries, Transforming Stations of Niagara—A. J. Jones.....**20**, 455 (1911)
Electrochemical Calculations, A Unit of Electrical Quantity for Use in—A. H. Cowles.....**2**, 207 (1902)
Electrochemical Corrosion of the Rochester Steel Conduit—R. H. Gaines **13**, 55 (1908)
Electrochemical Cyanide Process, The Clancy—J. C. Clancy, **19**, 137 (1911)
Electrochemical Equivalents, Interdependence of Atomic Weights and—A. Reuterdahl **7**, 187 (1905)
Electrochemical Equivalents, Uniformity in—C. Hering...**3**, 291 (1903)
Electrochemical Exhibits at the Louisiana Purchase Exposition, St. Louis, 1904—S. S. Sadtler.....**6** (I), 45 (1904)
Electrochemical Industries of Norway—J. W. Richards..**20**, 403 (1911)
Electrochemical Industries, Power for—John Meyer **13**, 377 (1908)
Electrochemical Industries, Power for—John Meyer **14**, 255 (1908)
Electrochemical Industries, The Advantages of Keokuk, Iowa, for —F. P. H. Knight.....**19**, 345 (1911)
Electrochemical Industries, The Advantages of Maine for—C. Vey Holman **19**, 351 (1911)
Electrochemical Methods for the Qualitative and Quantitative Determination of Free Silicon in the Presence of Silica, Silicates, Oxides, Free Carbon and Silicon Carbide—W. R. Mott **12**, 241 (1907)
Electrochemical Methods in Soil Investigations—F. K. Cameron, **15**, 559 (1909)
Electrochemical Paradox, An—C. Hering.....**2**, 139 (1902)
Electrochemical Patents and Some of the Needs of the United States Patent System—A. B. Marvin.....**13**, 431 (1908)
Electrochemical Polarization—J. W. Langley.....**2**, 255 (1902)

Electrochemical Potentials and Electrical Conductivity of Aluminum-Calcium Alloys—J. M. Breckenridge.....**17**, 367 (1910)
Electrochemical Processes as Station Load Equalizers—E. A. Sperry **9**, 147 (1906)
Electrochemical Processes as Station Load Equalizers—J. Meyer, **11**, 369 (1907)
Electrochemical Processes, Utilization of Power Stations for—E. A. Sperry.....**14**, 259 (1908)
Electrochemical Purposes, The Use of Bakelite for—L. H. Baekeland **15**, 593 (1909)
Electrochemical Series of Metals—L. Kahlenberg....**6** (II), 53 (1904)
Electrochemical Theories—L. Kahlenberg **1**, 119 (1902)
Electrochemist and Metallurgist, Exchange of Transactions for the **4**, 2 (1903)
Electrochemist, The, and the Conservation of Our Natural Resources—E. G. Acheson.....**15**, 17 (1909)
Electrochemistry and Allied Subjects, Bibliography of—P. F. Mottelay **13**, 453 (1908)
Electrochemistry, An Index to, and its Application—A. L. Voege, **5**, 223 (1904)
Electrochemistry, Applied, Laboratory Experiment in—W. D. Bancroft **9**, 23 (1906)
Electrochemistry at the World's Fair, St. Louis—W. E. Goldsborough **2**, 153 (1902)
Electrochemistry, A University Course in—J. W. Richards.**1**, 41 (1902)
Electrochemistry, Card Catalogue of—C. F. Carrier, Jr...**8**, 161 (1905)
Electrochemistry, Chemistry of—W. D. Bancroft.....**8**, 33 (1905)
Electrochemistry, Conditions of Progress in—J. W. Richards.**3**, 59 (1903)
Electrochemistry, Continuous Advance of—J. W. Richards..**5**, 37 (1904)
Electrochemistry in 1904 as Represented at the St. Louis Exposition—C. F. Burgess.....**8**, 205 (1905)
Electrochemistry of Barium Compounds—M. M. Haff.....**2**, 267 (1902)
Electrochemistry of Chemistry—W. D. Bancroft.....**9**, 13 (1906)
Electrochemistry of Light—W. D. Bancroft.....**13**, 243 (1908)
Electrochemistry of Polonium and Other Radioactive Elements—A. R. Johnson.....**18**, 165 (1910)
Electrochemistry, Relation of Surface Action to—H. E. Patten, **19**, 359 (1911)
Electrochemistry, What It Is Accomplishing—J. W. Richards, **17**, 75 (1910)
Electro-Deposits, Structure of—C. F. Burgess and O. P. Watts, **9**, 229 (1906)
Electrode Effects, An Experimental Study of Some—H. M. Tory and H. T. Barnes.....**3**, 95 (1903)
Electrode Losses, Furnace—C. A. Hansen.....**15**, 279 (1909)
Electrode Losses, Furnace—C. A. Hansen.....**16**, 329 (1909)
Electrode Losses in Electric Furnaces—E. F. Roeber....**16**, 363 (1909)

Electrode Losses in Electric Furnaces, Laws of—Carl Hering, **16**, 265 (1909)
Electrodes, Cadmium, Alternating Current Electrolysis with—G. R. White **9**, 305 (1906)
Electrodes, Determinations of the Constants of Materials for Furnace—Carl Hering **17**, 151 (1910)
Electrodes, Direct Currents in Electrolytes Without—C. Hering, **13**, 273 (1908)
Electrodes, Electrolytic Conduction Without—A. B. Marvin.**3**, 347 (1903)
Electrodes, Empirical Laws of Furnace—C. Hering.....**17**, 171 (1910)
Electrodes, Graphite, in Electro-Metallurgical Processes—C. L. Collens, 2nd **1**, 53 (1902)
Electrodes, Mean Thermal and Electrical Conductivities of—C. Hering **16**, 317 (1909)
Electrodes, Migration of Particles Between—C. Hering....**10**, 35 (1906)
Electrodes, On the Testing of Carbon—F. A. J. FitzGerald.**2**, 43 (1902)
Electrodeposition of Copper from Electrolytes Containing Arsenic, Effect of Organic and Inorganic "Addition Agents" upon—C. Y. Wen and E. F. Kern.....**20**, 121 (1911)
Electrodeposition of Lead from Perchlorate Baths—F. C. Mathers, **17**, 261 (1910)
Electrodeposition of Metals on Aluminium, Some Results of Experiments with the—A. Lodyguine.....**7**, 153 (1905)
Electrodeposition of Nickel, Notes on the—W. McA. Johnson, **3**, 255 (1903)
Electrodeposition of Platinum—II—W. J. McCaughey and H. E. Patten **17**, 275 (1910)
Electrodeposition on Rotating Cathodes—J. G. Zimmerman, **3**, 245 (1903)
Electrodeposition of Some Metals from Acetone Solution—H. E. Patten and W. R. Mott.....**15**, 529 (1909)
Electrodeposition of Zinc—R. C. Snowdon.....**11**, 121 (1907)
Electrolysis and Catalysis—W. Ostwald.....**6** (II), 187 (1904)
Electrolysis by an Alternating Current—J. W. Richards..**1**, 221 (1902)
Electrolysis, Continuous, of Solutions of Metals—N. S. Keith, **1**, 131 (1902)
Electrolysis, Corrosion of Metals by—A. A. Knudson.....**3**, 195 (1903)
Electrolysis of Brine, Concentration Changes in the—W. H. Walker **3**, 177 (1903)
Electrolysis of Caustic Soda—J. W. Richards.....**9**, 355 (1906)
Electrolysis of Chromic Acid, Chromium and the—H. R. Carveth and B. E. Curry.....**7**, 115 (1905)
Electrolysis of Cuprous Chloride Solutions, The Conductivity and —M. deK. Thompson and E. R. Hamilton.....**17**, 287 (1910)
Electrolysis of Fused Salts—R. Lorenz .....**6** (II), 160 (1904)
Electrolysis of Nitric Acid Using a Mercury Cathode—J. A. Wilkinson **13**, 309 (1908)

Electrolysis of Sodium Chlorid Solutions, A Diaphragm Cell for—C. P. Townsend.....**7**, 63 (1905)
Electrolysis of Sodium Hydroxide by Alternating Current—C. Hambuechen **4**, 105 (1903)
Electrolysis of Solutions of Metals, Continuous—N. S. Keith, **1**, 131 (1902)
Electrolysis of Some Cyanides—H. E. Patten and W. R. Mott, **18**, 83 (1910)
Electrolysis of Water—J. W. Richards and W. S. Landis..**3**, 105 (1903)
Electrolysis of Water—II—J. W. Richards and W. S. Landis, **4**, 111 (1903)
Electrolysis of Water, Notes on the Industrial—W. S. Landis, **5**, 245 (1904)
Electrolysis of Water Vapor, On the Supposed—F. A. Lidbury, **4**, 127 (1903)
Electrolysis, Preparation of Ferro-Vanadium by—G. Gin.**15**, 227 (1909)
Electrolysis, Reversed—J. W. Turrentine.....**13**, 289 (1908)
Electrolysis, Revisions of the Theory of—H. S. Carhart....**7**, 15 (1905)
Electrolysis, The Work Done in—J. W. Richards.....**11**, 185 (1907)
Electrolysis with Cadmium Electrodes, Alternating Current—G. R. White **9**, 305 (1906)
Electrolyte for the Silver Coulometer, New—H. S. Carhart, H. H. Willard and W. D. Henderson.....**9**, 375 (1906)
Electrolyte Density in Storage Batteries—L. Lyndon.....**9**, 67 (1906)
Electrolytes, Diffusion in, Optical Method for Observing—C. Hambuechen **7**, 305 (1905)
Electrolytes, Conduction in Fused and Solid—J. W. Richards, **7**, 71 (1905)
Electrolytes Containing Arsenic, Effect of Organic and Inorganic "Addition Agents" upon the Electrodeposition of Copper from—C. Y. Wen and E. F. Kern.....**20**, 121 (1911)
Electrolytes, Function of Addition Agents in—E. F. Kern.**15**, 441 (1909)
Electrolytes, Fused and Solid, Conduction in—J. W. Richards, **7**, 71 (1905)
Electrolytes, Fused, Volatic Cells with—E. A. Byrnes....**2**, 113 (1902)
Electrolytes, Polarization in Its Relation to the Decomposition Pressure of—O. P. Watts.....**19**, 91 (1911)
Electrolytes, Practical Conductance of—J. W. Richards and W. S. Landis **16**, 85 (1909)
Electrolytes, Specific Resistance of, Method of Determining—R. Threlfall **8**, 193 (1905)
Electrolytes Without Electrodes, Direct Currents in—C. Hering, **13**, 273 (1908)
Electrolytic and Chemical Action of Ammonium Persulphate on Metals—J. W. Turrentine.....**12**, 297 (1907)
Electrolytic Cell, Current Efficiency of—W. R. Mott....**11**, 195 (1907)
Electrolytic Cell, New Type of—P. G. Salom.....**4**, 101 (1903)

Electrolytic Cell, Whiting—J. Whiting **17**, 327 (1910)
Electrolytic Chromium—M. LeBlanc **9**, 315 (1906)
Electrolytic Condenser, Aluminum—C. I. Zimmerman....**5**, 147 (1904)
Electrolytic Condenser, Aluminum—C. I. Zimmerman.....**7**, 309 (1905)
Electrolytic Conduction—J. W. Richards.....**6** (II), 152 (1904)
Electrolytic Conduction, Some Phenomena of—C. J. Reed.**2**, 233 (1902)
Electrolytic Conduction Without Electrodes—A. B. Marvin.**3**, 347 (1903)
Electrolytic Conductors, On the Nature of—L. Kahlenberg.**13**, 265 (1908)
Electrolytic Copper Refining—W. D. Bancroft.....**4**. 55 (1903)
Electrolytic Copper Refining, Economic Balance in—L. Addicks, **5**, 119 (1904)
Electrolytic Copper Refining, Notes on Modern—T. Ulke..**3**, 219 (1903)
Electrolytic Copper Refining, Power for—W. L. Spalding.**16**, 125 (1909)
Electrolytic Corrosion of Bottom of Oil Tanks and Other Structures—A. A. Knudson.....**14**, 189 (1908)
Electrolytic Corrosion of Brasses—A. T. Lincoln.....**11**, 43 (1907)
Electrolytic Corrosion of Brasses, Experiments on—A. T. Lincoln and G. C. Bartells, Jr.....**13**, 331 (1908)
Electrolytic Corrosion of Electroplated Objects—Walter S. Landis, **19**, 59 (1911)
Electrolytic Corrosion of Structural Steel—M. Toch.....**9**, 77 (1906)
Electrolytic Corrosion of the Bronzes—B. E. Curry.....**9**, 173 (1906)
Electrolytic Deposition of Lead and Zinc as Affected by Addition of Organic Compounds—S. A. Tucker and E. G. Thomssen. **15**. 477 (1909)
Electrolytic Deposition of Nickel-Zinc Alloys—II—E. P. Schoch and A. Hirsch **11**, 135 (1907)
Electrolytic Deposition of Platinum—W. J. McCaughey.**15**, 523 (1909)
Electrolytic Determination of Minute Quantities of Copper—E. E. Free **12**, 307 (1907)
Electrolytic Determination of the Basicity of Acids, An Experiment on—I. J. Moltkehansen.....**4**, 39 (1903)
Electrolytic Dissociation, Present Status of the Theory of—W. D. Bancroft **4**, 175 (1903)
Electrolytic Dissociation, The Thermo-Chemistry of—C. J. Reed, **5**, 255 (1904)
Electrolytic Dissociation, Thermo-Chemistry of the Theory of—J. W. Richards **4**, 137 (1903)
Electrolytic Dissolution of Soluble Metallic Anodes—W. McA. Johnson **2**, 171 (1902)
Electrolytic Furnace Method for Producing Metals—John Woods Beckman **19**, 171 (1911)
Electrolytic Iron—C. F. Burgess and C. Hambuechen.....**5**, 201 (1904)
Electrolytic Iron, Alloys of, with Arsenic and Bismuth—C. F. Burgess and Jas. Aston.....**15**, 369 (1909)
Electrolytic Iron, Chemical Analysis of.....**15**, 370 (1909)

Electrolytic Meter, Mercurous Perchlorate—F. C. Mathers and A. F. O. Germann.....**19**, 69 (1911)
Electrolytic Meter, New Type of—K. Norden.....**1**, 181 (1902)
Electrolytic Method for the Preparation of Explosive Antimony—R. C. and L. S. Palmer.....**16**, 79 (1909)
Electrolytic Paints, Theory of—W. D. Bancroft.....**14**, 143 (1908)
Electrolytic Pickling of Steel—C. J. Reed.....**11**, 181 (1907)
Electrolytic Plants, Pumps and Other Accessories in—D. H. Browne and L. R. Vorce.....**2**, 219 (1902)
Electrolytic Polarization, Reversible and Irreversible—I—W. S. Franklin and L. A. Freudenberger.....**7**, 33 (1905)
Electrolytic Polarization, Reversible and Irreversible—II—W. S. Franklin and L. A. Freudenberger.....**8**, 227 (1905)
Electrolytic Precipitation of Bronzes—B. E. Curry.....**9**, 249 (1906)
Electrolytic Precipitation of Lead from Acetate Solutions—R. C. Snowdon **9**, 223 (1906)
Electrolytic Precipitation of Nickel on Nickel—R. C. Snowdon, **7**, 301 (1905)
Electrolytic Precipitation of Silver—R. C. Snowdon.....**7**, 143 (1905)
Electrolytic Preparation of Calcium—A. R. Johnson.....**18**, 125 (1910)
Electrolytic Preparation of Iodoform from Acetone—G. A. Roush, **8**, 281 (1905)
Electrolytic Preparation of Magnesium—S. A. Tucker and F. L. Jouard **17**, 249 (1910)
Electrolytic Process, Dry, for Caustic Alkalies and Chlorine—C. E. Acker **1**, 165 (1902)
Electrolytic Process for Refining Silver—A. G. Betts.....**8**, 121 (1905)
Electrolytic Processes for Refining of Gold and Silver...**11**, 415 (1907)
Electrolytic Production of Metallic Calcium, Efficiency in the—F. C. Frary, H. R. Bicknell and C. A. Tronson....**18**, 117 (1910)
Electrolytic Production of Metallic Compounds—C. F. Burgess and C. Hambuechen **3**, 299 (1903)
Electrolytic Production of White Lead—John A. Yunck..**15**, 485 (1903)
Electrolytic Production of Zinc from Its Ores—S. S. Sadtler.**1**, 141 (1902)
Electrolytic Purification of Cobalt and Nickel—W. D. Bancroft, **6** (I), 39 (1904)
Electrolytic Rectifier—C. F. Burgess and C. Hambuechen..**1**, 147 (1902)
Electrolytic Reduction of Nitric Acid—H. E. Patten.....**12**, 325 (1907)
Electrolytic Reduction of Nitric Acid—II—H. E. Patten and W. J. McCaughey **15**, 535 (1909)
Electrolytic Reduction of Nitric Acid—III—H. E. Patten and W. J. McCaughey **17**, 377 (1910)
Electrolytic Refining as a Step in the Production of Steel—C. F. Burgess **19**, 181 (1911)
Electrolytic Refining of Composite Metals—Titus Ulke.....**1**, 95 (1902)
Electrolytic Refining of Iron—E. F. Kern.....**13**, 103 (1908)

Electrolytic Resistance, Rapid Measurement of—C. F. Burgess, **11**, 225 (1907)
Electrolytic Separation of Silver and Copper—H. W. Gillett, **12**, 255 (1907)
Electrolytic Switch—W. S. Horry.....**7**, 237 (1905)
Electrolytic System of Amalgamating Gold Ores—E. E. Carey, **19**, 127 (1911)
Electrolytic Theory of the Corrosion of Iron—A. S. Cushman, **12**, 403 (1907)
Electrolytic Transfer, The Mechanism of—J. W. Richards.**19**, 119 (1911)
Electrolytic *vs.* Sulphuric Acid Parting of Bullion—F. D. Easterbrooks **8**, 125 (1905)
Electrolytic White Lead, Preparation of—C. F. Carrier...**5**, 229 (1904)
Electrolytic Winning and Refining of Metals, A New Method for—E. M. Chance.....**17**, 235 (1910)
Electrolytic Work, Ammeters for—L. Addicks.....**8**, 239 (1905)
Electromagnetic Separation of Non-Magnetic Non-Conducting Substances—A. P. Steckel.....**15**, 429 (1909)
Electrometallurgical Developments in Canada, Electrochemical and —Saul Dushman **20**, 419 (1911)
Electrometallurgical Industries, Transforming Stations of Niagara Electrochemical and—A. J. Jones **20**, 455 (1911)
Electrometallurgical Processes, Graphite Electrodes in—C. L. Collens, 2d **1**, 53 (1902)
Electro-Metallurgy, Carbons for—F. A. J. FitzGerald and J. Forssell **11**, 317 (1907)
Electro-Metallurgy of Antimony—A. G. Betts.....**8**, 187 (1905)
Electro-Metallurgy of Gold, Note on the—W. H. Walker...**4**, 47 (1903)
Electro-Metallurgy of Iron and Steel—P. L. T. Héroult, **6** (II), 129 (1904)
Electro-Metallurgy of Iron and Steel, Developments in the—M. Ruthenburg **2**, 93 (1902)
Electro-Metallurgy of Iron and Steel—*General Discussion*.**15**, 237 (1909)
Electro-Metallurgy of Iron and Steel, Large Electric Furnaces in—R. Catani **15**, 159 (1909)
Electro-Metallurgy of Iron Production, Advances in—M. Ruthenburg **4**, 19 (1903)
Electro-Metallurgy of Zinc—W. McA. Johnson.....**11**, 265 (1907)
Electro-Metallurgy of Zinc—G. Gin.....**12**, 117 (1907)
Electromotive Force of Alloys—W. D. Bancroft.....**3**, 297 (1903)
Electromotive Force of Cells, Berthelot's Law Relative to the—C. J. Reed **4**, 151 (1903)
Electromotive Force of Soft Iron, Effect of Stress upon—W. H. Walker and C. Dill.....**11**, 153 (1907)
Electronic Hypothesis and Its Applications—A. Reuterdahl.**2**, 159 (1902)
Electroplated Objects, The Electrolytic Corrosion of—W. S. Landis, **19**, 59 (1911)

Electroplating, Chemistry of—W. D. Bancroft.....**6** (II), 27 (1904)
Electroplating Solutions, Notes on the Composition of—N. S. Keith **3**, 227 (1903)
Electroplating, Some Unsolved Problems in—G. B. Hogaboom, **19**, 53 (1911)
Electroscopic Determination of the Radium Present in Some Tufa Deposits from Hot Springs, Ark.—R. Schlundt...**12**, 247 (1907)
Electrostatic Separation, Applications of, to Ore Dressing—F. S. MacGregor **18**, 267 (1910)
Electrostatic Treatment of Ore—L. I. Blake.....**7**, 211 (1905)
Electrothermal Processes, Utilization of Power Stations for—E. A. Sperry **14**, 259 (1908)
Electrothermic Reduction of Iron Ores—A. E. Greene and F. S. MacGregor **12**, 65 (1907)
Electronic Hypothesis and Its Application—A. Reuterdahl.**2**, 159 (1902)
Electrons, Ions and—L. A. Parsons.....**3**, 265 (1903)
Elliott, A. H.—*Discussions* **16**, 122, 256 (1909)
Ellis, R., and Goodwin, H. M.—The Separation of Oil from Condenser Water by Electrolysis.....**17**, 405 (1910)
Empirical Laws of Furnace Electrodes—Carl Hering....**17**, 171 (1910)
Emrich, H. H.—*Discussions* **11**, 300 (1907); **15**, 475 (1909)
Endosmose, Note on Electrical—W. D. Bancroft.....**3**, 261 (1903)
Energy Changes Accompanying Absorption—H. E. Patten.**11**, 387 (1907)
Energy, Chemical—J. E. Mills.....**14**, 35 (1908)
Energy, Chemical, Probable Electrical Nature of—A. H. Patterson, **15**, 575 (1909)
Energy, Free, of Some Halogen and Oxygen Compounds Computed from the Results of Potential Measurement—M. deK. Thompson **9**, 337 (1906)
Energy, Kinetic Molecular—C. P. Steinmetz.....**13**, 397 (1908)
Energy of Ions—L. A. Parsons **5**, 131 (1904)
Engle, S. G., and Burgess, C. F.—Observations on the Corrosion of Iron by Acids.....**9**, 199 (1906)
Equalizers, Station Load, Electrochemical Processes as—E. A. Sperry **9**, 147 (1906)
Equalizers, Station Load, Electrochemical Processes as—J. Meyer, **11**, 369 (1907)
Equilibria in Standard Cells—G. A. Hulett.....**14**, 65 (1908)
Equivalents, Electrochemical, Interdependence of Atomic Weights and—A. Reuterdahl **7**, 187 (1905)
Equivalents, Electrochemical, Uniformity in—C. Hering..**3**, 291 (1903)
Errors in Pyrometry—E. S. Shepherd.....**9**, 381 (1906)
Estimation of High Temperatures—G. K. Burgess.....**11**, 247 (1907)
Ethyl Alcohol Solutions, Solubility of Boric, Camphoric, Benzoic and Salicylic Acids in Aqueous—A. Seidell.....**13**, 319 (1908)
Ethyl Bromide, On the Heat of Solution of Aluminium Bromide in —H. E. Patten.....**7**, 177 (1905)

Ethyl Bromide Solution, An Analytical Study on the Deposition of Aluminium from—H. E. Patten.....**6** (I), 9 (1904)
Evolution of the Lead Storage Battery—P. G. Salom.....**18**, 51 (1910)
Excited Activity of Thorium, Chemical Separation of—H. Schlundt and R. B. Moore.....**8**, 269 (1905)
Exhibit of Ferro-Metals, Made Electrically, and of other Electric Furnace Products—A. J. Rossi.....**5**, 275 (1904)
Exhibition of Porous Plates—S. S. Sadtler.....**5**, 221 (1904)
Exhibits, Electrochemical, at St. Louis—S. S. Sadtler..**6** (I), 45 (1904)
Experiences with the 15-Ton Héroult Electric Furnace at South Chicago—C. G. Osborne.....**19**, 205 (1911)
Experiment in Applied Electrochemistry, An Instructive Laboratory—W. H. Walker.....**9**, 23 (1906)
Experiment on the Electrolytic Determination of the Basicity of Acids—I. J. Moltkehansen **4**, 39 (1903)
Experimental Study of Some Electrode Effects—H. M. Tory and H. T. Barnes.....**3**, 95 (1903)
Experiments, Discussion of, Made at Sault Ste. Marie on the Electrical Reduction of Iron Ores—J. W. Richards..**12**, 81 (1907)
Experiments with Calcium Alloys as Reducing Agents—O. P. Watts and E. R. Suhm.....**15**, 421 (1909)
Experiments with Fused Sodium Peroxide for the Regeneration of Air for Submarines—G. F. Brindley and R. von Foregger, **9**, 291 (1906)
Experiments with Metallic Diaphragms—W. D. Bancroft..**3**, 133 (1903)
Experiments with the Reduction of Different Oxides of Lead by Electric Current—A. Lodyguine.....**7**, 221 (1905)
Explosive Antimony—R. C. Palmer and L. S. Palmer.....**16**, 79 (1909)
Extraction, Electrical, of Nitrogen from the Air—J. S. Edström, **6** (II), 17 (1904)
Factors Affecting Distribution, Some Surface—H. E. Patten.**10**, 67 (1906)
Fahrig, E.—*Discussion* **8**, 156 (1905)
Fair, Electrochemistry at the World's—W. E. Goldsborough.**2**, 153 (1902)
Faraday Society, Exchange of Transactions with the.....**4**. 2 (1903)
Faraday Society Transactions, Regulations Concerning....**16**, 26 (1909)
Faure and Planté Storage Batteries, Self-Discharge of—O. W. Brown and W. G. Bowers.....**18**, 69 (1910)
Ferro-Alloys, Decarburization of—G. Gin.....**15**, 225 (1909)
Ferromanganese Anodes in Caustic Soda Solutions—G. R. White, **9**, 255 (1906)
Ferro-Metals, Exhibit of—A. J. Rossi **5**, 275 (1904)
Ferro-Nickel, Electric Smelting Experiments for the Manufacture of, from Pyrrhotite—E. A. Sjöstedt.....**5**, 233 (1904)
Ferro-Vanadium, Preparation of, by Electrolysis—G. Gin.**15**, 227 (1909)
Fink, C. G.—*Discussion* .....**17**, 233 *et seq.* (1910)
Fink, C. G.—Ductile Tungsten and Molybdenum.....**17**, 229 (1910)
Finley, Pres. John H.—Address of Welcome to the Society.**14**, 1 (1908)

Finney, J. H.—The Conservation and Utilization of Natural Sources of Power.....**17**, 55 (1910)
Firth-Stirling Steel Co., Demmler, Pa.....**17**, 19 (1910)
FitzGerald, F. A. J.—A New Electric Resistance Furnace.**19**, 273 (1911)
FitzGerald, F. A. J.—*Discussions*, **2**, 49, 110 (1902); **11**, 324 *et seq.* (1907); **12**, 169 (1907); **14**, 246 *et seq.*, 265 (1908); **15**, 155 *et seq.*, 246 *et seq.*, 278 (1909); **19**, 191, 284, 339 (1911); **20**, 275, 313, 372 *et seq.*, 493 (1911)
FitzGerald, F. A. J.—Note on an Unsuccessful Furnace Experiment **20**, 281 (1911)
FitzGerald, F. A. J.—Note on Some Theoretical Considerations in the Construction of Resistance Furnaces.....**4**, 9 (1903)
FitzGerald, F. A. J.—On the Heat Conductivity of Carbon, **12**, 165 (1907)
FitzGerald, F. A. J.—On the Testing of Carbon Electrodes.**2**, 43 (1902)
FitzGerald, F. A. J.—*Presentation of* Paper by R. Turnbull, **15**, 139 (1909)
FitzGerald, F. A. J.—The Application of the Lash Process to the Electric Furnace **15**, 149 (1909)
FitzGerald, F. A. J.—The Lash Steel Process and the Electric Furnace **14**, 239 (1908)
FitzGerald, F. A. J.—The Use of Carbon for the Study of Temperature in the Electric Furnace.....**6** (I), 31 (1904)
FitzGerald, F. A. J.—*Translation of* Paper by E. Stassano.**15**, 63 (1909)
FitzGerald, F. A. J., and Forssell, J.—On Carbons for Electro-Metallurgy **11**, 317 (1907)

Function of Addition Agents in Electrolytes—E. F. Kern.**15**, 441 (1909)
Function of Oxygen in the Corrosion of Metals—W. H. Walker, **14**, 175 (1908)
Furnace, Arc **11**, 413 (1907)
Furnace Design, Some Principles of Resistor—C. L. Collens, 2nd, **9**, 31 (1906)
Furnace, Electric, Advances in the Closed and Continuous-Working —E. R. Taylor.....**2**, 185 (1903)
Furnace, Electric, A Few Experiences with the 15-Ton Héroult, at South Chicago—C. G. Osborne.....**19**, 205 (1911)
Furnace, Electric, and the Lash Steel Process—F. A. J. Fitz-Gerald **14**, 239 (1908)
Furnace, Electric, Application of, to Siderurgy—E. Stassano, **15**, 63 (1909)
Furnace, Electric, Application of Lash Process to—F. A. J. Fitz-Gerald **15**, 149 (1909)
Furnace, Electric, Calculations of Gin—G. Gin.....**15**, 215 (1909)
Furnace, Electric, Closed—E. R. Taylor **11**, 295 (1907)
Furnace, Electric, Closed and Continuous-Working, Some Advances in—E. R. Taylor **2**, 185 (1902)
Furnace, Electric, Conversion of Iron Pyrites into a Magnetic Form—O. L. Kowalke **13**, 133 (1908)
Furnace, Electric, Determination of Vapor Densities in an—W. Nernst **3**, 75 (1903)
Furnace, Electric, Direct Production of Molybdenum Steel in—E. J. Dittus and R. G. Bowman.....**20**, 355 (1911)
Furnace, Electric, for Heating Bars and Billets—T. F. Baily, **19**, 285 (1911)

Furnace, Electric, for the Manufacture of Iron and Steel—Jas. Lyman **19**, 193 (1911)
Furnace, Electric, Fusion of Quartz in the—R. S. Hutton..**2**, 105 (1902)
Furnace, Electric, Gin Self-Circulating—G. Gin.....**15**, 215 (1909)
Furnace, Electric, Manufacture of Bisulphide of Carbon in—E. R. Taylor **1**, 115 (1902)
Furnace, Electric, Pig Iron in California—P. McN. Bennie.**15**, 35 (1909)
Furnace, Electric Induction, Design of a 30-Ton—A. Hiorth, **20**, 293 (1911)
Furnace, Electric, New Type of—C. Hering **19**, 255 (1911)
Furnace, Electric, Production of Silicon in—F. J. Tone....**7**, 243 (1905)
Furnace, Electric, Reduction of Iron Ore—J. W. Richards.**15**, 53 (1909)
Furnace, Electric, Reduction of Tin Dross in—R. S. Wile.**18**, 205 (1910)
Furnace, Electric Shaft, at Ludvika, Sweden—E. Haanel..**15**, 25 (1909)
Furnace, Electric Tube, for Temperature Measurements—S. A. Tucker **11**, 303 (1907)
Furnace, Electric Vacuum—W. C. Arsem.....**9**, 153 (1906)
Furnace, Electric, with Heating Element of Ductile Tungsten or Ductile Molybdenum—R. Winne and C. Dantsizen..**20**, 287 (1911)
Furnace Electrode Losses—C. A. Hansen.....**15**, 279 (1909)
Furnace Electrode Losses—C. A. Hansen.....**16**, 329 (1909)
Furnace Electrodes, Determinations of the Constants of Materials for—Carl Hering **17**, 151 (1910)
Furnace Electrodes, Empirical Laws of—Carl Hering....**17**, 171 (1910)
Furnace Electrodes, Mean Conductivities of—C. Hering..**16**, 317 (1909)
Furnace Experiment, Note on an Unsuccessful—F. A. J. FitzGerald, ...**20**, 281 (1911)
Furnace, Gin Self-Circulating, for the Electric Manufacture of Steel—G. Gin **15**, 205 (1909)
Furnace, Girod Electric, for Manufacture of Steel—P. Girod, **15**, 127 (1909)
Furnace, Héroult Electric Steel—R. Turnbull.....**15**, 139 (1909)
Furnace, Hiorth Electric Steel—J. W. Richards.....**18**, 191 (1910)
Furnace, Induction **11**, 411 (1907)
Furnace, Induction, Mathematics of the—G. Gin.....**12**, 97 (1907)
Furnace, Johnson Electric Zinc—J. W. Richards.....**19**, 311 (1911)
Furnace, Kryptol **11**, 411 (1907)
Furnace Method, An Electrolytic, for Producing Metals—J. W. Beckman **19**, 171 (1911)
Furnace, New Electric Resistance—F. A. J. FitzGerald..**19**, 273 (1911)
Furnace, New Electric Steel—A. L. Queneau **17**, 131 (1910)
Furnace, Note on a Laboratory—B. MacNutt.....**3**, 367 (1903)
Furnace Progress, Induction—T. Rowlands.....**17**, 103 (1910)
Furnace, Resistance **11**, 413 (1907)
Furnace, Resistance, of Granular Carbon—S. A. Tucker.**11**, 307 (1907)
Furnace, Resistor, Design—C. L. Collens, 2d.....**9**, 31 (1906)
Furnace, Robert Hare's Electric—C. A. Doremus.....**13**, 347 (1908)

Furnace, Tube, An Electric—S. A. Tucker.....**11**, 303 (1907)
Furnace Walls, The Flow of Heat Through—F. T. Snyder.**18**, 235 (1910)
Furnaces, Arc and Resistance, Relative Efficiency of, for Calcium Carbide—S. A. Tucker, W. A. Alexander and A. K. Hudson, **15**, 411 (1909)
Furnaces, Electric, A Study in Heavy Alternating Current Conductors for—K. C. Raudall.....**17**, 139 (1910)
Furnaces, Electric, Condensation of Zinc Vapor from—F. T. Snyder **19**, 317 (1911)
Furnaces, Electric, Contribution to the Study of—C. A. Keller, **15**, 87 (1909)
Furnaces, Electric, Description of.....**11**, 411 (1907)
Furnaces, Electric, Efficiency of—J. W. Richards.....**2**, 51 (1902)
Furnaces, Electric, Electrode Losses in—E. F. Roeber...**16**, 363 (1909)
Furnaces, Electric, Kjellin and Röchling-Rodenhauser — F. A. Kjellin **15**, 173 (1909)
Furnaces, Electric, Large, for Iron and Steel—R. Catani.**15**, 159 (1909)
Furnaces, Electric, Laws of Electrode Losses in—Carl Hering, **16**, 265 (1909)
Furnaces, Electric, Reliability of, for Commercial Work—F. T. Snyder **19**, 185 (1911)
Furnaces, Electric Smelting, and Their Appliances—M. Ruthenburg **18**, 185 (1910)
Furnaces, Electrical, Working Limit in, Due to "Pinch" Phenomenon—C. Hering.....**15**, 255 (1909)
Furnaces, Heat Conductances Through Walls of—C. Hering, **14**, 215 (1908)
Furnaces, Note on Some Theoretical Considerations in the Construction of Resistance—F. A. J. FitzGerald.....**4**, 9 (1903)
Furnaces, Resistance, A Practical Limitation of: "Pinch" Phenomenon—C. Hering **11**, 329 (1907)
Furnaces, Resistance, Laboratory—G. R. White.....**9**, 143 (1906)
Furnaces, Resistance, Theoretical Considerations in the Construction of—F. A. J. FitzGerald.....**4**, 9 (1903)
Further Experiments with Calcium Alloys as Reducing Agents—O. P. Watts and E. R. Suhm.....**15**, 421 (1909)
Fused Alumina (Alundum) as a Refractory—L. E. Saunders, **19**, 333 (1911)
Fused and Solid Electrolytes, Conduction in—J. W. Richards.**7**, 71 (1905)
Fused Electrolytes, Voltaic Cells with—E. A. Byrnes.....**2**, 113 (1902)
Fused Magnesium Oxide, Physical Properties of—H. M. Goodwin and R. D. Mailey **9**, 89 (1906)
Fused Salts, Density, Electrical Conductivity and Viscosity of—H. M. Goodwin and R. D. Mailey.....**11**, 211 (1907)
Fused Salts, Electrolysis of—R. Lorenz.....**6** (II), 160 (1904)
Fused Sodium Chloride, Cathodic Disintegration of Carbon in—G. I. Kemmerer **9**, 117 (1906)

Fused Sodium Peroxide for the Regeneration of Air for Submarines—G. F. Brindley and R. von Foregger.....**9**, 291 (1906)
Fusion and Other Work, Some Small Laboratory Appliances for—S. S. Sadtler.....**10**, 45 (1906)
Fusion of Quartz in the Electric Furnace—R. S. Hutton..**2**, 105 (1902)
Gahl, R.—*Discussions*, **4**, 96 *et seq.*, 123 *et seq.* (1903); **5**, 82 98 *et seq.*, 116 *et seq.* (1904)
Gaines, Richard H.—*Discussion* **14**, 164 (1908)
Gaines, Richard H.—Electrochemical Corrosion of the Rochester Steel Conduit **13**, 55 (1908)
Galvanizing Wire in Zinc-Dust—Alfred Sang.....**20**, 259 (1911)
Ganz, A. F.—*Discussions* .....**14**, 161 *et seq.*, 212 (1908)
Ganz, A. F.—*Opening of General Discussion on* "The Corrosion of Iron" **14**, 151 (1908)
Gary Steel Works, Visit to Plant of.....**18**, 3 (1910)
Gas Coulometer, Oxy-Hydrogen, A Modified—J. W. Turrentine, **15**, 515 (1909)
Gaseous Ionization, The Unit Charge In—R. A. Millikan.**18**, 283 (1910)
Gases in Steel, Presence and Influences of—P. L. T. Héroult, **17**, 135 (1910)
Gas Pressures, On the Measurement of Very Small—C. F. Hale, **20**, 243 (1911)
Gases at Extremely High Temperatures, Thermal Conduction and Convection in—Irving Langmuir.....**20**, 225 (1911)
Gases at Reduced Pressure, Electric Discharges in—L. A. Parsons, **19**, 109 (1911)
Gaster, L.—*Discussion* **11**, 381 (1907)
General Discussion on the Corrosion of Iron.....**14**, 151 (1908)
General Discussion on the Electro-Metallurgy of Iron and Steel, **15**, 237 (1909)
General Discussion on Recent Improvements in Electrochemical Analysis **11**, 115 (1907)
General Discussion on the Theory of Electrolytic Dissociation, **4**, 177 (1903)
Geographical List of Members, **1**, 30 (1902); **2**, 30 (1902); **3**, 43 (1903); **5**, 28 (1904); **8**, 21 (1905); **10**, 22 (1906); **12**, 20 (1907); **14**, 25 (1908); **16**, 53 (1909); **18**, 38 (1910); **20**, 43 (1911)
Geological Survey Testing Station, United States.....**17**, 1 (1910)

Inorganic "Addition Agents" upon the Electro-Deposition of Copper from Electrolytes Containing Arsenic, The Effect of Organic and—C. Y. Wen and E. F. Kern.....**20**, 121 (1911)
Instructive Laboratory Experiment in Applied Chemistry—W. H. Walker **9**, 23 (1906)
Insulating Materials—A Field for the Chemist—Max von Recklinghausen **3**, 153 (1903)
Insulating Paints—Maximilian Toch **8**, 133 (1905)
Interdependence of the Atomic Weights and the Electrochemical Equivalents—A. Reuterdahl **7**, 187 (1905)
International Committee on Units, Appropriation for.....**19**, 8 (1911)
International Electrical Congress **5**, 9 (1904)
Introductory Remarks—J. W. Richards.....**1**, 1 (1902)
Invention, Storage Battery—H. Rodman **2**, 177 (1902)
Iodide of Cadmium, Differences of Potential Between Cadmium and—L. Kahlenberg **2**, 89 (1902)
Iodoform, Electrolytic Preparation of, from Acetone—G. A. Roush, **8**, 281 (1905)
Ionization, Gaseous, The Unit Charge in—R. A. Millikan.**18**, 283 (1910)
Ions and Electrons—L. A. Parsons.....**3**, 265 (1903)
Ions, Energy of—L. A. Parsons **5**, 131 (1904)
Ions, Free, in Aqueous Solutions—W. R. Whitney **3**, 101 (1903)
Ions, Free, Theoretical Properties of, in Solutions—E. F. Roeber, **4**, 159 (1903)
Ions, Relative Velocities of, in Solutions of Silver Nitrate in Pyridine and Acetonitrile—H. Schlundt.....**1**, 177 (1902)
Iron Alloys, The Electrical Resistance of—C. F. Burgess and Jas. Aston **20**, 205 (1911)
Iron and Calcium, Alloying of—Alcan Hirsch and Jas. Aston, **13**, 143 (1908)
Iron and Steel, Developments in Electro-Metallurgy of—M. Ruthenburg **2**, 93 (1902)
Iron and Steel, Electrical Resistivity of **15**, 223 (1909)
Iron and Steel, Electric Furnaces as Applied to the Manufacture of—C. A. Keller **15**, 87 (1909)
Iron and Steel, Electro-Metallurgy of—*General Discussion*.**15**, 237 (1909)
Iron and Steel, Electro-Metallurgy of—P. L. T. Héroult, **6**, (II), 129 (1904)
Iron and Steel, Electro-Metallurgy of, Large Electric Furnaces in —R. Catani **15**, 159 (1909)
Iron and Steel, Electric Furnace for the Manufacture of—Jas. Lyman **19**, 193 (1911)

Iron and Steel, Electrical Resistivity of, at High Temperatures—G. Gin **8**, 287 (1905)
Iron and Steel, Titanium in—Chas. V. Slocum.....**20**, 265 (1911)
Iron-Copper Alloys, Physical Properties of—C. F. Burgess and Jas. Aston **16**, 241 (1909)
Iron, Corrosion of, by Acids, Observations on—C. F. Burgess and S. G. Engle **9**, 199 (1906)
Iron, Corrosion of, Electrolytic Theory of the—A. S. Cushman, **12**, 403 (1907)
Iron, Corrosion of, from the Electrochemical Standpoint—C. F. Burgess **13**, 17 (1908)
Iron, Corrosion of, *General Discussion*—A. F. Ganz.....**14**, 151 (1908)
Iron, Electric Smelting of, Utilization of Blast Furnace Gases in Connection with—A. J. Rossi.....**7**, 199 (1905)
Iron, Electrical Testing of, During the Annealing—E. E. F. Creighton **13**, 127 (1908)
Iron, Electrolytic—C. F. Burgess and C. Hambuechen....**5**, 201 (1904)
Iron, Electrolytic, Alloys of, with Arsenic and Bismuth—C. F. Burgess and Jas. Aston.....**15**, 369 (1909)
Iron, Electrolytic, Chemical Analysis of.....**15**, 370 (1909)
Iron, Electrolytic Refining of—E. F. Kern.....**13**, 103 (1908)
Iron, Metallic, Protective Action of Zinc Chloride on—C. J. Reed, **3**, 149 (1903)
Iron Ore, Electric Furnace Reduction of—J. W. Richards.**15**, 53 (1909)
Iron Ore, Electric Smelting of—E. R. Taylor.....**16**, 229 (1909)
Iron Ores, Electrical Reduction of, Discussion of the Experiments Made at Sault Ste. Marie on—J. W. Richards.....**12**, 81 (1907)
Iron Ores, Electrothermic Reduction of—A. E. Greene and F. S. MacGregor **12**, 65 (1907)
Iron Ores, Titaniferous, Electrical Reduction of—G. Gin.**11**, 291 (1907)
Iron, Passive State of, Practical Utilization of the—C. F. Burgess, **4**, 31 (1903)
Iron, Pig, Electric Furnace, in California—P. McN. Bennie.**15**, 35 (1909)
Iron Production, Advances in Electro-Metallurgy of—M. Ruthenburg **4**, 19 (1903)
Iron Pyrites, Electric Furnace Conversion of, into a Magnetic Form—O. L. Kowalke.....**13**, 133 (1908)
Iron Smelting in Sweden, Recent Progress in Electrical—Thos. D. Robertson **20**, 375 (1911)
Iron, Soft, Effect of Stress upon the E. M. F. of—W. H. Walker and C. Dill **11**, 153 (1907)
Irons, Exhibits of .....**6** (I), 52 (1904)
Irreversible and Reversible Electrolytic Polarization—I—W. S. Franklin and L. A. Freudenberger.....**7**, 33 (1905)
Irreversible and Reversible Electrolytic Polarization—II—W. S. Franklin and L. A. Freudenberger.....**8**, 227 (1905)
Isabella Furnaces, of Carnegie Steel Co.....**17**, 10 (1910)

Isakovics, A. von—*Discussions* **1**, 173 (1902); **11**, 37 (1907)
Jackson, H. A.—*Discussion* .....**5**, 264 *et seq.* (1904)
Johnson, A. R.—*Discussions* .....**18**, 153 *et seq.*, 168 *et seq.* (1910)

Mean Conductivities of Furnace Electrodes—C. Hering...**16**, 317 (1909)
Means of Prevention of Superheating of Liquids, Electric Heating as a—J. Howard Mathews.....**19**, 81 (1911)
Measurement of Resistances of the Order of One Hundred Thousand Megohms, The Construction and Accurate—H. L. Bronson **13**, 231 (1908)
Measurement of Temperatures. An Electric Tube Furnace for—S. A. Tucker **11**, 303 (1907)
Measurement of Very Small Gas Pressures, On the—C. F. Hale, **20**, 243 (1911)
Measurement, Rapid, of Electrolytic Resistance—C. F. Burgess, **11**, 225 (1907)

Mechanical Tests of Electric Furnace Steel, **15**, 119, 133, 178, 190, 191, 192, 204 (1909)
Mechanism of Electrolytic Transfer—J. W. Richards...**19**, 119 (1911)
Meetings, Proceedings of, **1**, 3, 7 (1902); **2**, 1 (1902); **3**, 1 (1903); **4**, 1 (1903); **5**, 1 (1904); **6**, 1 (1904); **7**, 1 (1905); **8**, 1 (1905); **9**, 1 (1906); **10**, 1 (1906); **11**, 1 (1907); **12**, 1 (1907); **13**, 1 (1908); **14**, 1 (1908); **15**, 1 (1909); **16**, 1 (1909); **17**, 1 (1910); **18**, 1 (1910); **19**, 1 (1911); **20**, 1 (1911)
Mellencamp, F. J., and Carhart, H. S.—A Further Contribution to the Study of Concentration Cells.....**12**, 399 (1907)
Melting Points of Some Cryolite-Alumina Mixtures—F. R. Pyne, **10**, 63 (1906)
Members, Alphabetical List, **1**, 19 (1902); **2**, 9 (1902); **3**, 17 (1903); **5**, 15 (1904); **8**, 7 (1905); **10**, 8 (1906); **12**, 5 (1907); **14**, 8 (1908); **16**, 28 (1909); **18**, 10 (1910); **20**, 12 (1911)
Members and Guests Registered at Meetings, **14**, 6 (1908); **15**, 13 (1909); **16**, 5 (1909); **17**, 30 (1910); **18**, 6 (1910); **19**, 12 (1911); **20**, 8 (1911)
Members at Eighteenth General Meeting, *Photograph of, Frontispiece*, **18** (1910)
Members at Fourteenth General Meeting, *Photograph of, Frontispiece*, **14** (1908)
Members at Sixteenth General Meeting, *Photograph of, Frontispiece*, **16** (1909)
Members, Geographical List, **1**, 30 (1902); **2**, 30 (1902); **3**, 43 (1903); **5**, 28 (1904); **8**, 21 (1905); **10**, 22 (1906); **12**, 20 (1907); **14**, 25 (1908); **16**, 53 (1909); **18**, 38 (1910); **20**, 43 (1911)
Members Qualified and Elected, **2**, 6 (1902); **3**, 14 (1903); **4**, 6 (1903); **5**, 12 (1904); **6**, 6 (1904); **7**, 13 (1905); **8**, 6 (1905); **9**, 11 (1906); **10**, 7 (1906); **11**, 15 (1907); **12**, 3 (1907); **13**, 14 (1908); **16**, 8 (1909); **17**, 33 (1910); **18**, 8 (1910); **19**, 15 (1911); **20**, 10 (1911)
Members Visiting Carnegie Steel Works, Homestead Pa., Photograph of **17**, 17 (1910)
Membership Certificates **16**, 27 (1909)
Membership, Condition of the Society in 1910 as to.....**19**, 10 (1911)
Memoir on the Methods of Treatment of Simple and Complex Ores of Molybdenum, Tungsten, Uranium, Vanadium—G. Gin. Part I, Molybdenum, **12**, 411 (1907); Part II, Tungsten, **13**, 481 (1908); Part III, Vanadium, **16**, 393 (1909)
Mercurous Perchlorate Electrolytic Meter—F. C. Mathers and A. F. O. Germann.....**19**, 69 (1911)
Mercury Arc—E. Weintraub **7**, 273 (1905)

Mercury Cathode and Rotating Anode, Determination of Zinc with the Aid of—Lily G. Kollock and E. F. Smith.....**14**, 59 (1908)
Mercury Cathode, Electrolysis of Nitric Acid Using a—J. A. Wilkinson **13**, 309 (1908)
Mercury Cathode, Use of, in the Determination of Metals—A. H. Porter and F. C. Frary.....**14**, 51 (1908)
Metal Depositing, Phenomena of—A. G. Betts.....**8**, 63 (1905)
Metal Sulphides, Reduction of—O. W. Brown.....**9**, 109 (1906)
Metallic Anodes, Electrolytic Dissolution of Soluble—W. McA. Johnson **2**, 171 (1902)
Metallic Cadmium and Solutions of Cadmium Iodide in Various Solvents, Differences of Potential Between—L. Kahlenberg, **2**, 89 (1902)
Metallic Compounds, Electrolytic Production of—C. F. Burgess and C. Hambuechen **3**, 299 (1903)
Metallic Diaphragms, Experiments with—W. D. Bancroft.**3**, 133 (1903)
Metallic Diaphragms, Note on—E. A. Byrnes **4**, 135 (1903)
Metallic Dust from Cathodes, The Phenomenon of the Formation of—F. Haber **2**, 189 (1902)
Metallic Food Containers, Corrosion of, Causes and Prevention—E. Gudeman **18**, 97 (1910)
Metals, A New Method for the Electrolytic Winning and Refining of—E. M. Chance **17**, 235 (1910)
Metals, An Electrolytic Furnace Method for Producing—John Woods Beckman **19**, 171 (1911)
Metals, Composite, Electrolytic Refining of—T. Ulke.....**1**, 95 (1902)
Metals, Continuous Electrolysis of Solutions of—N. S. Keith, **1**, 131 (1902)
Metals, Corrosion of, by Electrolysis—A. A. Knudson....**3**, 195 (1903)
Metals, Corrosion of, Over-Voltage as a Factor in—W. R. Mott, **15**, 569 (1909)
Metals, Electrodeposition of, from Acetone Solution—H. E. Patten and W. R. Mott **15**, 529 (1909)
Metals, Electrochemical Series of the—L. Kahlenberg.**6** (II), 53 (1904)
Metals, Function of Oxygen in the Corrosion of—W. H. Walker, **14**, 175 (1908)
Metals in Order of Their Boiling Points—O. P. Watts....**12**, 141 (1907)
Metals, Relative Basicity of the—L. Kahlenberg.....**18**, 103 (1910)
Metals, Reducing and Distilling in a Closed Electric Furnace—E. R. Taylor.....**11**, 295 (1907)
Metals, Use of a Mercury Cathode in the Determination—A. H. Porter and F. C. Frary.....**14**, 51 (1908)
Metallurgy, Chlorine in—H. Goldschmidt.....**6** (II), 85 (1904)
Metallurgy, Chlorine in, New Applications of—C. E. Baker, **12**, 155 (1907)
Meter, Electrolytic, Mercurous Perchlorate—F. C. Mathers and A. F. O. Germann **19**, 69 (1911)

Meter, Electrolytic, New Type of—K. Norden **1**, 181 (1902)
Method of Electrolytic Production of Zinc from Its Ores—S. S. Sadtler **1**, 141 (1902)
Method for Determining Thermal Conductivities—C. Hering, **18**, 213 (1910)
Metric Equivalents to Be Given in These Transactions.....**19**, 8 (1911)
Meyer, John—Electrochemical Processes as Station Load Equalizers **11**, 369 (1907)
Meyer, John—Power for Electrochemical Industries **13**, 377 (1908)
Meyer, John—Power for Electrochemical Industries **14**, 255 (1908)
Microstructure of Silicon and Alloys Containing Silicon—A. B. Albro **7**, 251 (1905)
Migration and Flocculation of Colloids Considered as an Absorption Phenomenon—H. E. Patten.....**9**, 277 (1906)
Migration of Particles Between Electrodes, Visible—Carl Hering, **10**, 35 (1906)
Migration Velocities, Changes of Concentration and—C. J. Reed, **11**, 169 (1907)
Miller, W. Lash—*Discussions* ..**4**, 184 (1903); **9**, 196, 246, 254 (1906)
Millett, K. B.—*Discussion* **15**, 612 (1909)
Millikan, R. A.—*Discussion* **18**, 287 (1910)
Millikan, R. A.—The Unit Charge in Gaseous Ionization.**18**, 283 (1910)
Mills, J. E.—Chemical Energy **14**, 35 (1908)
Mills, J. E.—*Discussion* **15**, 586 (1909)
Mineral Resources of Ontario—Thos. W. Gibson.....**20**, 447 (1911)
Mint, Electrolytic Refining of Gold and Silver at Philadelphia, **11**, 415 (1907)
Minutes of Meetings of the Board of Directors, **1**, 11 (1902); **2**, 6 (1902); **3**, 6 (1903); **4**, 4 (1903); **5**, 7 (1904); **6**, 5 (1904); **7**, 8 (1905); **8**, 5 (1905); **9**, 7 (1906); **11**, 11 (1907); **13**, 9 (1908); **15**, 8 (1909); **17**, 24 (1910); **19**, 8 (1911)
Minutes of Meetings of the Society, **1**, 3, 7 (1902); **2**, 1 (1902); **3**, 1 (1903); **4**, 1 (1903); **5**, 1 (1904); **6**, 1 (1904); **7**, 1 (1905); **8**, 1 (1905); **9**, 1 (1906); **10**, 1 (1906); **11**, 1 (1907); **12**, 1 (1907); **13**, 1 (1908); **14**, 1 (1908); **15**, 1 (1909); **16**, 1 (1909); **17**, 1 (1910); **18**, 1 (1910); **19**, 1 (1911); **20**, 1 (1911)
Mixtures, Melting Points of Some Cryolite-Alumina—F. R. Pyne, **10**, 63 (1906)
Modern Electrolytic Copper Refining, Notes on—Titus Ulke.**3**, 219 (1903)
Modified Oxy-Hydrogen Gas Coulometer—J. W. Turrentine, **15**, 515 (1909)
Moissan, Henri—G. F. Kunz **11**, 233 (1907)
Moissanite and Diamond, Natural, Meteoric and Artificial—G. F. Kunz **12**, 39 (1907)

Moisture and of Solutions upon the Electric Conductivity of Soils, The Effect of—R. O. E. Davis.....**17**, 391 (1910)
Moldenke, R.—*Discussions* **15**, 51, 247 (1909); **20**, 272 (1911)
Moldenke, R.—The Heræus "Le Chatelier" Pyrometer.....**10**, 97 (1906)
Molecular Conductivity—C. J. Reed **5**, 103 (1904)
Molecular Energy, Kinetic—Chas. P. Steinmetz.....**13**, 397 (1908)
Moltkehansen, I. J.—A Strange Observation **5**, 273 (1904)
Moltkehansen, I. J.—An Experiment on the Electrolytic Determination of the Basicity of Acids **4**, 39 (1903)
Molybdenum, Ductile Tungsten and—C. G. Fink.....**17**, 229 (1910)
Molybdenum, Electric Furnace with Heating Element of Ductile—R. Winne and C. Dantsizen **20**, 287 (1911)
Molybdenum, Methods of Treatment of Simple and Complex Ores of—G. Gin **12**, 411 (1907)
Molybdenum, Silicide of, New—O. P. Watts.....**9**, 105 (1906)
Molybdenum Steel in the Electric Furnace, The Direct Production of—E. J. Dittus and R. G. Bowman.....**20**, 355 (1911)
Monox—H. N. Potter **12**, 215 (1907)
Monox, The Production of—H. N. Potter.....**12**, 223 (1907)
Monoxide, Silicon—H. N. Potter.....**12**, 191 (1907)
Moore, R. B., and Schlundt, H.—On the Chemical Separation of the Excited Activity of Thorium.....**8**, 269 (1905)
Moore, R. B., and Schlundt, H.—On the Radioactivity of Some Natural Waters of Missouri **8**, 291 (1905)
Morden, G. W.—*Discussion* **14**. 141 (1908)
Morden, G. W.—Formation of Nitric Oxide from the Air by Means of a Current of Electricity of Low Voltage.....**14**, 113 (1908)
Morehead, J. T.—*Discussion* .....**12**, 77 *et seq.* (1907)
Morrison, W. L.—*Discussions* **20**, 203, 290 (1911)
Morrison, W. L.—Electric Furnace Treatment of Nickel Ore, and the Development of a Commercial Process.....**20**, 315 (1911)
Morse, E. K.—Address of Welcome **17**, 3 (1910)
Moses, R. P.—*Discussion* **11**, 360 (1907)
Motion Concerning Water Power Development.....**16**, 4 (1909)
Mott, W. R.—*Discussions*, **3**, 129, 254 (1903); **7**, 331 (1905); **11**, 168, 172, 184, 190, 206 (1907); **15**, 502, 532 *et seq.* (1909)
Mott, W. R.—Electrochemical Methods for the Qualitative and Quantitative Determination of Free Silicon in the Presence of Silica, Silicates, Oxides, Free Carbon and Silicon Carbide **12**, 241 (1907)
Mott, W. R.—Over-Voltage as a Factor in the Corrosion of Metals, **15**, 569 (1909)

Mott, W. R., and Patten, H. E.—Single Potentials of Zinc in Aqueous Solutions **3**, 317 (1903)
Mottelay, P. F.—Bibliography of Electrochemistry and Allied Subjects **13**, 453 (1908)
Namba, M.—*Discussion* **11**, 324 (1907)
Nascent State—C. J. Reed.....**1**, 69 (1902)
National Carbon Co., Products .....**6** (I), 49 (1904)
National Resources, Resolution upon the Conservation of...**14**, 3 (1908)
Natural Resources, Conservation of—E. G. Acheson.....**15**, 17 (1909)
Natural Resources, Resolutions Concerning **16**, 3 (1909)
Nature of Chemical Energy, The Probable Electrical—A. H. Patterson **15**, 575 (1909)
Nature of Electrolytic Conductors—L. Kahlenberg.....**13**, 265 (1908)
Navigation, Forestry, Water Storage, Power and—Edward R. Taylor **13**, 385 (1908)
Needham, Address of President **5**, 1 (1904)
Nernst, W.—Determination of Vapor Densities in an Electric Furnace **3**, 75 (1903)
Nernst, W.—*Discussion* **3**, 83 (1903)
Nernst Filaments, Notes on—C. I. Zimmerman **7**, 79 (1905)
Nernst Lamp Company, Pittsburgh, Pa. **17**, 15 (1910)
Neutralization, Heat of, Remarks on Prof. Richards' Theory of—G. M. Westman **5**, 127 (1904)
New Data on Some Electrical Properties of Sodium, Potassium and Their Alloy—Edwin F. Northrup **20**, 185 (1911)
New Electric Resistance Furnace—F. A. J. FitzGerald...**19**, 273 (1911)
New Electrolyte for the Silver Coulometer—H. S. Carhart, H. H. Willard and W. D. Henderson **9**, 372 (1906)
New Gin Process for the Electrical Manufacture of Steel—G. Gin, **8**, 105 (1905)
New Members, Elected and Qualified, **2**, 6 (1902); **3**, 14 (1903); **4**, 6 (1903); **5**, 12 (1904); **6**, 6 (1904); **7**, 13 (1905); **8**, 6 (1905); **9**, 11 (1906); **10**, 7 (1906); **11**, 15 (1907); **12**, 3 (1907); **13**, 14 (1908); **16**, 8 (1909); **17**, 33 (1910); **18**, 8 (1910); **19**, 5 (1911); **20**, 10 (1911)
New Silicide of Molybdenum—O. P. Watts.....**9**, 105 (1906)
New Type of Electric Furnace—Carl Hering **19**, 255 (1911)
New Type of Electrolytic Cell—P. G. Salom.....**4**, 101 (1903)
New Type of Electrolytic Meter—K. Norden **1**, 18 (1902)
Niagara Electrochemical and Electrometallurgical Industries, Transforming Stations of—A. J. Jones **20**, 455 (1911)
Niagara Electrochemical Co., Products.....**6** (I), 47 (1904)
Nickel and Cobalt, Electrolytic Purification of—W. D. Bancroft, **6** (I), 39 (1904)

Nickel Anode, Behavior of, and Its Bearing on Passivity—E. P. Schoch **14**, 99 (1908)
Nickel, Electrodeposition of, Notes on the—W. McA. Johnson, **3**, 255 (1903)
Nickel on Nickel, The Electrolytic Precipitation of—R. C. Snowdon, **7**, 301 (1905)
Nickel Ore and the Development of a Commercial Process, Electric Furnace Treatment of—W. L. Morrison.....**20**, 315 (1911)
Nickel-Plating Industry, Development of the—Isaac Adams.**9**, 211 (1906)
Nickel-Plating Tank, Efficiency of the—O. W. Brown.....**4**, 83 (1903)
Nickel-Zinc Alloys, Electrodeposition of—II—E. P. Schoch and A. Hirsch **11**, 135 (1907)
Nitrate of Silver Solutions, Polarization Voltages of—J. A. Wilkinson and H. W. Gillett.....**11**, 173 (1907)
Nitric Acid, Copper Cathodes in—J. W. Turrentine.....**10**, 49 (1906)
Nitric Acid, Electrolysis of, Using a Mercury Cathode—J. A. Wilkinson **13**, 309 (1908)
Nitric Acid, Electrolytic Reduction of—H. E. Patten....**12**, 325 (1907)
Nitric Acid, Electrolytic Reduction of—II—H. E. Patten and W. J. McCaughey **15**, 535 (1909)
Nitric Acid, Electrolytic Reduction of—III—H. E. Patten and W. J. McCaughey **17**, 377 (1910)
Nitric Acid, On the Formation of, by Electric Energy—C. W. Volney **3**, 285 (1903)
Nitric Oxide, Formation of, by Low Voltage Current—G. W. Morden **14**, 113 (1908)
Nitrogen, Electrical Extraction of, from the Air—J. S. Edstrom, **6** (II), 17 (1904)
Noble Electric Steel Co.'s Plant—D. A. Lyon.....**15**, 39 (1909)
Non-Conducting, Non-Magnetic, Substances, Electromagnetic Separation of—A. P. Steckel **15**, 429 (1909)
Non-Magnetic, Non-Conducting Substances, Electromagnetic Separation of—A. P. Steckel.....**15**, 429 (1909)
Norden, K.—*Discussion* **1**, 105 (1902)
Norden, K.—On a New Type of Electrolytic Meter.....**1**, 181 (1902)
Northrup, E. F.—A New Type of Ammeter for the Accurate Measurement of Alternating Currents Above 1,000 Amperes, **15**, 303 (1909)
Northrup, E. F.—Cooling Curves and a New Type of Apparatus for Their Autographic Registration **15**, 331 (1909)
Northrup, E. F.—*Discussions*, **15**, 277, 532, 613 (1909); **20**, 104, 204, 222, 237, 290 *et seq.*, 493 (1911)
Northrup, E. F.—New Data on Some Electrical Properties of Sodium, Potassium and Their Alloy **20**, 185 (1911)
Norton Emery Wheel Co., Products.....**6** (I), 48 (1904)
Norway, The Electrochemical Industries of—J. W. Richards, **20**, 403 (1911)

Note on a Laboratory Furnace—B. MacNutt **3**, 367 (1903)
Note on an Unsuccessful Furnace Experiment—F. A. J. FitzGerald **20**, 281 (1911)
Note on Corrosion of Aluminum—J. H. Steinmetz.....**3**, 217 (1903)
Note on Electrical Endosmose—W. D. Bancroft.....**3**, 261 (1903)
Note on Metallic Diaphragms—E. A. Byrnes.....**4**, 135 (1903)
Note on Some Theoretical Considerations in the Construction of Resistance Furnaces—F. A. J. FitzGerald.....**4**, 9 (1903)
Note on the Electrical Resistivity of Iron and Steel at High Temperatures—G. Gin **8**, 287 (1905)
Note on the Electro-Metallurgy of Gold—W. H. Walker....**4**, 47 (1903)
Note on the Gladstone-Tribe Couple—W. D. Bancroft.....**1**, 65 (1902)
Note upon the Manufacture of Silico-Vanadium—G. Gin.**15**, 229 (1909)
Notes on Carbon—C. A. Hansen.....**15**, 295 (1909)
Notes on Economic Temperatures of Copper Refining Solutions—C. F. Burgess.....**7**, 51 (1905)
Notes on Electrical Endosmose—W. D. Bancroft.....**3**, 361 (1903)
Notes on Modern Electrolytic Copper Refining—T. Ulke...**3**, 219 (1903)
Notes on Nernst Filaments—C. I. Zimmermann.....**7**, 79 (1905)
Notes on the Composition of Electroplating Solutions—N. S. Keith **3**, 227 (1903)
Notes on the Electrodeposition of Nickel—W. McA. Johnson, **3**, 255 (1903)
Notes on the Electro-Metallurgy of Antimony—A. G. Betts:**8**, 187 (1905)
Notes on the Industrial Electrolysis of Water—W. S. Landis, **5**, 245 (1904)
Notes on the Use of Aluminum as a Reducing Agent—O. P. Watts, **8**, 101 (1905)
Notes on the Utilization of Blast-Furnace Gases in Connection with the Electric Smelting of Iron—A. J. Rossi....**7**, 199 (1905)
Notes on Tribo-Luminescence—S. L. Andrews **18**, 279 (1910)
Novel Concentration Cell—H. S. Carhart.....**1**, 105 (1902)
Obituary Notice, Chas. T. Childs.....**1**, 246 (1902)
Obituary Record **3**, 42 (1903)
Observations on Alloys of Electrolytic Iron with Arsenic and Bismuth—C. F. Burgess and Jas. Aston.....**15**, 369 (1909)
Observations on Laboratory Production of Aluminium—H. K. Richardson **19**, 159 (1911)
Observations on the Corrosion of Iron by Acids—C. F. Burgess and S. G. Engle.....**9**, 199 (1906)
Observations on the Influence of Arsenic in Pickling Solutions—C. F. Burgess **8**, 165 (1905)
Observations on the Preparation of Electrolytic White Lead—C. F. Carrier, Jr.....**5**, 229 (1904)
Oesterle, W. F., and Brown, O. W.—The Electric Smelting of Zinc **8**, 171 (1905)

Oil from Condenser Water by Electrolysis, The Separation of—H. M. Goodwin and R. Ellis.....**17**, 405 (1910)
Oil Tanks, Electrolytic Corrosion of Bottoms of—A. A. Knudson, **14**, 189 (1908)
Oleic Acid and Its Salts, On the Specific Inductive Capacity of—L. Kahlenberg **7**, 167 (1905)
On a New Type of Electrolytic Meter—K. Norden.....**1**, 181 (1902)
On Billitzer's Method for Determining Absolute Potential Difference—H. M. Goodwin and R. B. Sosman.....**7**, 83 (1905)
On Carbons for Electro-Metallurgy—F. A. J. FitzGerald and J. Forssell **11**, 317 (1907)
Ontario, The Mineral Resources of—Thos. W. Gibson.....**20**, 447 (1911)
On the Chemical Separation of the Excited Activity of Thorium—H. Schlundt and R. B. Moore.....**8**, 269 (1905)
On the Density, Electrical Conductivity and Viscosity of Fused Salts—H. M. Goodwin and R. D. Mailey.....**11**, 211 (1907)
On the Direct Synthesis of Hydrocyanic Acid—E. W. Smith and R. S. Hutton **13**, 359 (1908)
On the Edison Storage Battery—M. deK. Thompson and H. K. Richardson **7**, 95 (1905)
On the Effect of Water in Causing Chemical Reactions—D. Klein, **18**, 113 (1910)
On the Electrical Reduction of Titaniferous Iron Ores—G. Gin, **11**, 291 (1907)
On the Electrolysis of Fused Salts—R. Lorenz.....**6** (II), 160 (1904)
On the Electrothermic Reduction of Iron Ores—A. E. Greene and F. S. MacGregor **12**, 65 (1907)
On the Electrolysis of Some Cyanides—H. E. Patten and W. R. Mott **18**, 83 (1910)
On the Electrolytic Reduction of Nitric Acid—H. E. Patten, **12**, 325 (1907)
On the Electrolytic Reduction of Nitric Acid—II—H. E. Patten and W. J. McCaughey.....**15**, 535 (1909)
On the Electrolytic Reduction of Nitric Acid—III—H. E. Patten and W. J. McCaughey.....**17**, 377 (1910)
On the Estimation of High Temperatures—G. K. Burgess.**11**, 247 (1907)
On the Formation of Nitric Acid by Electric Energy—C. W. Volney **3**, 285 (1903)
On the Fusion of Quartz in the Electric Furnace—R. S. Hutton, **2**, 105 (1902)
On the Heat Conductivity of Carbon—F. A. J. FitzGerald.**12**, 165 (1907)
On the Heat of Solution of Aluminium Bromide in Ethyl Bromide—H. E. Patten.....**7**, 177 (1905)
On the Measurement of Very Small Gas Pressures—C. F. Hale, **20**, 243 (1911)
On the Nature of Electrolytic Conductors—L. Kahlenberg.**13**, 265 (1908)

On the Radioactivity of Some Natural Waters of Missouri—R. B. Moore and H. Schlundt.....**8**, 291 (1905)
On the Relation of Surface Action to Electrochemistry—H. E. Patten **19**, 359 (1911)
On the Relative Basicity of the Metals as Shown by Their Power to Replace One Another in Chemical Compounds—L. Kahlenberg **18**, 103 (1910)
On the Relative Velocities of the Ions in Solutions of Silver Nitrate in Pyridine and Acetonitrile—H. Schlundt.....**1**, 177 (1902)
On the Specific Inductive Capacity of Oleic Acid and Its Salts—L. Kahlenberg **7**, 167 (1905)
On the Supposed Electrolysis of Water Vapor—F. A. Lidbury, **4**, 127 (1903)
On the Testing of Carbon Electrodes—F. A. J. FitzGerald..**2**, 43 (1902)
Open Hearth, Electric Steel Processes as Competitors of Bessemer and—Albert E. Greene.....**19**, 233 (1911)
Operations, Efficiency of Electric Furnace—Jos. W. Richards.**2**, 51 (1902)
Optical Method for Observing the Diffusion in Electrolytes—C. Hambuechen **7**, 305 (1905)
Ordway, D. L.—*Discussion* **17**, 366 (1910)
Ordway, D. L.—Some Characteristics of the Modern Dry Cell, **17**, 341 (1910)
Ore Dressing, Applications of Electrostatic Separation to—F. S. MacGregor **18**, 267 (1910)
Ore, Electrostatic Treatment of—L. I. Blake.....**7**, 211 (1905)
Ore, Iron, Electric Smelting of—E. R. Taylor.....**16**, 229 (1909)
Ore, Nickel, Electric Furnace Treatment of—W. L. Morrison, **20**, 315 (1911)
Ores, Gold, Electrolytic System of Amalgamating—Elmer E. Carey **19**, 127 (1911)
Ores, Reducing and Distilling Metals from, Closed Electric Furnace for—E. R. Taylor.....**11**, 295 (1907)
Ores, Titaniferous Iron, Electrical Reduction of—G. Gin.**11**, 291 (1907)
Organic and Inorganic "Addition Agents" upon the Electro-Deposition of Copper from Electrolytes Containing Arsenic, The Effect of—Ching Yu Wen and Edward F. Kern.**20**, 121 (1911)
Organic Compounds, Effect of Addition of, on Deposition of Lead and Zinc—S. A. Tucker and E. G. Thomssen.....**15**, 477 (1909)
Osborne, C. G.—A Few Experiences with the 15-Ton Héroult Electric Furnace at South Chicago.....**19**, 205 (1911)
Osborne, C. G.—*Discussion* .....**19**, 222 *et seq.* (1911)
Ostwald, W.—Electrolysis and Catalysis.....**6** (II), 187 (1904)

Potter, H. N.—Silicon Monoxide **12**, 191 (1907)
Potter, H. N.—The Production of "Monox," a New Electric Furnace Product **12**, 223 (1907)
Power and Navigation, Forestry, Water Storage—Edward R. Taylor **13**, 385 (1908)
Power, Conservation and Utilization of Natural Sources of—J. H. Finney **17**, 55 (1910)
Power Costs—C. E. Lucke **11**, 339 (1907)
Power for Electrochemical Industries—John Meyer **13**, 377 (1908)
Power for Electrochemical Industries—John Meyer **14**, 255 (1908)
Power for Electrolytic Copper Refining—W. L. Spalding.**16**, 125 (1909)
Power in the Pittsburgh District, Possibilities of Cheap—F. Crabtree **17**, 95 (1910)
Power Stations, Utilization of, for Electrochemical Processes—E. A. Sperry **14**, 259 (1908)
Power, Water, Motion Concerning Development of.....**16**, 4 (1909)
Practical Applications of Over-Voltage Phenomena, Some—C. Hambuechen **18**, 91 (1910)
Practical Utilization of the Passive State of Iron—C. F. Burgess, **4**, 31 (1903)
Practice and Theory of Continuous-Flow Electric Calorimetry—H. T. Barnes **2**, 197 (1902)
Practical Conductance of Electrolytes—J. W. Richards and W. S. Landis **16**, 85 (1909)
Precipitation of Bronzes, Electrolytic—B. E. Curry.....**9**, 249 (1906)
Precipitation of Colloidal Solutions by Centrifugal Force—W. S. Franklin and L. A. Freidenberger.....**8**, 29 (1905)
Precipitation of Lead, Electrolytic, from Acetate Solutions—R. C. Snowdon **9**, 223 (1906)
Precipitation of Nickel on Nickel, Electrolytic—R. C. Snowdon, **7**, 301 (1905)
Precipitation of Silver, Electrolytic—R. C. Snowdon.....**7**, 143 (1905)
Preparation and Properties of Calcium Carbide—M. deKay Thompson **16**, 197 (1909)
Preparation and Properties of Metallic Cerium—A. Hirsch.**20**, 57 (1911)
Preparation and Properties of Pure Boron—E. Weintraub.**16**, 165 (1909)
Preparation of Calcium—F. C. Frary and W. L. Badger..**16**, 185 (1909)
Preparation of Calcium Alloys for Aluminothermic Work—O. P. Watts and J. M. Breckenridge.....**13**, 153 (1908)
Preparation of Calcium, Electrolytic—A. R. Johnson....**18**, 125 (1910)
Preparation of Electrolytic White Lead—C. F. Carrier....**5**, 229 (1904)
Preparation of Explosive Antimony, Electrolytic Method for—R. C. Palmer and L. S. Palmer.....**16**, 79 (1909)
Preparation of Ferro-Vanadium by Electrolysis—G. Gin.**15**, 227 (1909)
Preparation of Iodoform, Electrolytic, from Acetone—G. A. Roush, **8**, 281 (1905)

Preparation of Magnesium, Electrolytic—S. A. Tucker and F. L. Jouard **17**, 249 (1910)
Preparation of Materials for Standard Cells and Their Construction—H. S. Carhart and G. A. Hulett.....**5**, 59 (1904)
Preparation of Silundum—S. A. Tucker, H. F. Kudlich and E. M. Heumann **16**, 207 (1909)
Presence and Influences of Gases in Steel—P. L. T. Héroult, **17**, 135 (1910)
Present Status of Ozone with Reference to Air Purification—R. D. Small **18**, 171 (1910)
Present Status of the Edison Storage Battery—A. E. Kennelly and S. E. Whiting.....**6** (II), 135 (1904)
Present Status of the Electrolytic Dissociation Theory—W. D. Bancroft **4**, 175 (1903)
Present Value of Electrical Structural Steel—H. Hibbard.**15**, 231 (1909)
Presidential Address, Acheson, E. G., The Electrochemist and the Conservation of Our Natural Resources.....**15**, 17 (1909)
Presidential Address, Baekeland, L. H., Science and Industry, **17**, 37 (1910)
Presidential Address, Bancroft, W. D., The Electrochemistry of Chemistry **9**, 13 (1906)
Presidential Address, Burgess, C. F., The Corrosion of Iron from the Electrochemical Standpoint **13**, 17 (1908)
Presidential Address, Carhart, H. S., Revisions of the Theory of Electrolysis **7**, 15 (1905)
Presidential Address, Hering, Carl, The American Electrochemical Society **11**, 17 (1907)
Presidential Address, Richards, J. W., Conditions of Progress in Electrochemistry **3**, 59 (1903)
Presidential Address, Richards, J. W., The Continuous Advance of Electrochemistry **5**, 37 (1904)
Presidential Address, Walker, Wm. H., Chemical Research and Industrial Progress **19**, 17 (1911)
Pressures, Gas, Measurement of Very Small—C. F. Hale.**20**, 243 (1911)
Prevention and Causes of Corrosion of Metallic Food Containers—E. Gudeman **18**, 97 (1910)
Prevention of Superheating of Liquids, Electrical Heating as a Means of—J. Howard Mathews **19**, 81 (1911)
Primary Battery, The Decker—F. B. Crocker.....**10**, 107 (1906)
Principles Involved in the Selection and Definition of the Fundamental Units to be Proposed for International Adoption—F. A. Wolff **13**, 213 (1908)
Principles of Resistor Furnace Design—C. L. Collens, 2nd..**9**, 31 (1906)
Pritz, W. B.—Dry Cell Testing.....**19**, 31 (1911)
Prize Offered by A. B. Frenzel.....**3**, 10 (1903)
Problems in Electroplating, Some Unsolved—Geo. Hogaboom, **19**, 53 (1911)

Proceedings of Meetings, **1**, 3, 7 (1902); **2**, 1 (1902); **3**, 1 (1903); **4**, 1 (1903); **5**, 1 (1904); **6**, 1 (1904); **7**, 1 (1905); **8**, 1 (1905); **9**, 1 (1906); **10**, 1 (1906); **11**, 1 (1907); **12**, 1 (1907); **13**, 1 (1908); **14**, 1 (1908); **15**, 1 (1909); **16**, 1 (1909); **17**, 1 (1910); **18**, 1 (1910); **19**, 1 (1911); **20**, 1 (1911)

Process, Amalgam, Influence of Some Impurities in Salt upon the Yield of Caustic Soda by—J. W. Walker and C. S. Paterson, **3**, 185 (1903)

Process, Electrolytic, for Refining Silver—A. G. Betts.....**8**, 121 (1905)

Process, Gin, for the Electrical Manufacture of Steel—G. Gin, **8**, 105 (1905)

Process for the Treating of Cobalt-Nickel Ores Rich in Silver and Arsenic by Combined Melting and Electrolytic Operations—C. C. Cito **17**, 239 (1910)

Processes, Electrometallurgical, Graphite Electrodes in—C. L. Collens, 2d **1**, 53 (1902)

Producing Metals, An Electrolytic Furnace Method for—John Woods Beckman **19**, 171 (1911)

Production of Aluminium, Some Observations on the Laboratory—H. K. Richardson **19**, 159 (1911)

Production of Metallic Calcium, Electrolytic—F. C. Frary, H. R. Bicknell and C. A. Tronson.....**18**, 117 (1910)

Production of Metallic Compounds, Electrolytic—C. F. Burgess and C. Hambuechen **3**, 299 (1903)

Production of "Monox," A New Electric Furnace Product—H. N. Potter **12**, 223 (1907)

Production of Silicon in the Electric Furnace—F. J. Tone.**7**, 243 (1905)

Production of Steel, Electrolytic Refining as a Step in the—C. F. Burgess **19**, 181 (1911)

Production of White Lead, Electrolytic—John A. Yunck.**15**, 485 (1909)

Production of Zinc, Electrolytic, from Its Ores—S. S. Sadtler, **1**, 141 (1902)

Progress, Induction Furnace—T. Rowlands **17**, 103 (1910)

Progress, Industrial, Chemical Research and—W. H. Walker, **19**, 17 (1911)

Progress in Electrochemistry, Conditions of—J. W. Richards.**3**, 59 (1903)

Properties, Theoretical, of Free Ions in Solutions—E. F. Roeber, **4**, 159 (1903)

Proposed Card Catalogue of Electrochemistry—C. F. Carrier, Jr., **8**, 161 (1905)

Protection of Steel Against Corrosion—M. Toch **14**, 207 (1908)

Protection of Steel Against Corrosion—M. Toch.....**15**, 391 (1909)

Protective Action of Zinc Chloride on Metallic Iron—C. J. Reed, **3**, 149 (1903)

Pumps and Other Accessories in Electrolytic Plants—D. H. Browne and L. R. Vorce **2**, 219 (1902)

Purification, Electrolytic, of Cobalt and Nickel—W. D. Bancroft, **6** (I), 39 (1904)
Purification of Air by Ozone—R. D. Small.....**18**, 171 (1910)
Purification of Water by Ozone, Electrical Plant for.....**11**, 417 (1907)
Pyne, F. R.—Melting Points of Some Cryolite-Alumina Mixtures, **10**, 63 (1906)
Pyrites into a Magnetic Form, Electric Furnace Conversion of Iron —O. L. Kowalke **13**, 133 (1908)
Pyrometer, A New Radiation—C. E. Foster.....**15**, 361 (1909)
Pyrometer, A New Radiation—C. E. Foster.....**17**, 223 (1910)
Pyrometer for General Industrial Applications, A Thermo-Electric —F. F. Schuetz **10**, 81 (1906)
Pyrometer, The Heræus "Le Chatelier"—R. Moldenke.....**10**, 97 (1906)
Pyrometers—E. F. Roeber **10**, 75 (1906)
Pyrometry, Errors in—E. S. Shepherd **9**, 381 (1906)
Pyroxyline, The Use of, in Storage Batteries—E. A. Sperry.**3**, 169 (1903)
Pyrrhotite, Electric Smelting Experiments for the Manufacture of Ferro-Nickel from—E. A. Sjöstedt.....**5**, 233 (1904)
Quantity, A Unit of Electrical, for Use in Electrochemical Calculations—A. H. Cowles.....**2**, 207 (1903)
Quartz, On the Fusion of, in the Electric Furnace—R. S. Hutton, **2**, 105 (1902)
Queneau, A. L.—A New Electric Steel Furnace.....**17**, 131 (1910)
Queneau, A. L.—*Discussions*, **17**, 133 *et seq.*, 210 (1910); **19**, 230, 268, 315, 343 *et seq.* (1911)
Radiation Pyrometer, A New—C. E. Foster.....**15**, 361 (1909)
Radiation Pyrometer, A New—C. E. Foster.....**17**, 223 (1910)
Radioactive Elements, Electrochemistry of Polonium and Other —A. R. Johnson **18**, 165 (1910)
Radioactive Emanations, The Absorption of, by Charcoal—R. W. Boyle **13**, 429 (1908)
Radio-Activity of Some Natural Waters of Missouri—R. B. Moore and H. Schlundt **8**, 291 (1905)
Radium and Other Radioactive Substances with a Consideration of Phosphorescent and Fluorescent Substances. The Properties and Applications of Selenium and the Treatment of Disease by the Ultra-Violet Light—W. J. Hammer, **3**, *Appendix* (1903)
Radium, Electroscopic Determination of, Present in Some Tufa Deposits from Hot Springs, Ark.—H. Schlundt....**12**, 247 (1907)
Raegener, Louis C.—*Discussion* .....**13**, 442 *et seq.* (1908
Randall, K. C.—A Study in Heavy Alternating Current Conductors for Electric Furnaces **17**, 139 (1910)
Randall, K. C.—*Discussion* **17**, 150 (1910)
Rapid Electrochemical Analysis; a Comparison of Several Methods—L. S. Palmer and R. C. Palmer.....**15**, 489 (1909)

Rapid Measurement of Electrolytic Resistance—C. F. Burgess, **11**, 225 (1907)
Rare Metals, Prize Offered for Work on the—A. B. Frenzel. **3**, 10 (1903)
Reber, Samuel—*Discussion* **5**, 118 (1904)
Recent Advances in Electrochemical Analysis—E. F. Smith. **16**, 65 (1909)
Recent Improvements in Electrochemical Analysis—*General Discussion* **11**, 115 (1907)
Recent Progress in Electrical Iron Smelting in Sweden—T. D. Robertson **20**, 375 (1911)
Recklinghausen, Max von—Insulating Materials—A Field for the Chemist **3**, 153 (1903)
Rectifier, Aluminum—W. D. Bancroft ..... **6** (I), 13 (1904)
Rectifier, Electrolytic—C. F. Burgess and C. Hambuechen.. **1**, 147 (1902)
Reduced Pressure, Electric Discharges in Gases at—L. A. Parsons, **19**, 109 (1911)
Reducing Agent, Use of Aluminum as—O. P. Watts..... **8**, 101 (1905)
Reducing Agents, Further Experiments with Calcium Alloys as—O. P. Watts and E. R. Suhm..... **15**, 421 (1909)
Reducing Metals, Closed Electric Furnace for—E. R. Taylor, **11**, 295 (1907)
Reduction, Cathodic—A. T. Weightman **2**, 65 (1902)
Reduction, Electrical, of Iron Ores, Discussion of the Experiments Made at Sault Ste. Marie—J. W. Richards..... **12**, 81 (1907)
Reduction, Electrical, of Lead—P. G. Salom..... **1**, 87 (1902)
Reduction, Electrical, of Titaniferous Iron Ores—G. Gin. **11**, 291 (1907)
Reduction, Electrolytic, of Nitric Acid—H. E. Patten .. **12**, 325 (1907)
Reduction, Electrolytic, of Nitric Acid—II—H. E. Patten and W. J. McCaughey **15**, 535 (1909)
Reduction, Electrolytic, of Nitric Acid—III—H. E. Patten and W. J. McCaughey **17**, 377 (1910)
Reduction, Electrothermic, of Iron Ores—A. E. Greene and F. S. MacGregor **12**, 65 (1907)
Reduction of Different Oxides of Lead by Electric Current, Experiments with the—A. Lodyguine **7**, 221 (1905)
Reduction of Iron Ore, Electric Furnace—J. W. Richards.. **15**, 53 (1909)
Reduction of Metal Sulphides—O. W. Brown **9**, 109 (1906)
Reduction of Tin Dross in an Electric Furnace—R. S. Wile, **18**, 205 (1910)
Reduction of Titaniferous Ores, Some Results of Experiments with the—A. Lodyguine **7**, 157 (1905)
Reduction Temperature of Zinc Oxide—W. McA. Johnson. **5**, 211 (1904)
Reed, C. J.—Berthelot's Law Relative to the Electromotive Forces of Cells Based on the Reciprocal Action of Saline Solutions and Soluble Electrolytes **4**, 151 (1903)
Reed, C. J.—Changes of Concentration and Migration Velocities, **11**, 169 (1907)

Reed, C. J.—*Discussions*, **1**, 83, 90 *et seq.*, 109 *et seq.*, 128, 138, 184, 223 *et seq.* (1902); **2**, 78, 87, 100, 119 *et seq.*, 132, 145, 182, 194 *et seq.*, 205, 216 *et seq.*, 250 (1902); **3**, 90 *et seq.*, 121 *et seq.*, 146 *et seq.*, 151 *et seq.*, 174 *et seq.*, 215, 237 *et seq.*, 251 *et seq.*, 278, 358 *et seq.* (1903); **4**, 20 *et seq.*, 36, 97 *et seq.*, 104, 121 *et seq.*, 177 *et seq.* (1903); **5**, 58, 72, 97 *et seq.*, 117 *et seq.*, 142 *et seq.*, 209, 218, 251 (1904); **6** (II), 49 (1904); **8**, 49 (1905); **11**, 36 *et seq.*, 171 *et seq.*, 183 *et seq.*, 188 *et seq.*, 263, 288, 298, 336 (1907)
Reed, C. J.—Electrolytic Pickling of Steel **11**, 181 (1907)
Reed, C. J.—Molecular Conductivity **5**, 103 (1904)
Reed, C. J.—*Portrait of* .....*Frontispiece*, **6** (1904)
Reed, C. J.—Some Phenomena of Electrolytic Conduction.**2**, 235 (1902)
Reed, C. J.—The Nascent State **1**, 69 (1902)
Reed, C. J.—The Protective Action of Zinc Chloride on Metallic Iron **3**, 149 (1903)
Reeve, A. G.—*Discussion* **15**, 475 (1909)
Refining, Electrolytic, as a Step in the Production of Steel—C. F. Burgess **19**, 181 (1911)
Refining, Electrolytic, of Composite Metals—T. Ulke **1**, 95 (1902)
Refining, Electrolytic, of Copper—W. D. Bancroft **4**, 55 (1903)
Refining, Electrolytic, of Copper, Economic Balance in—L. Addicks. **5**, 119 (1904)
Refining, Electrolytic, of Copper, Notes on Modern—Titus Ulke, **3**, 219 (1903)
Refining, Electrolytic, of Copper, Power for—W. L. Spalding, **16**, 125 (1909)
Refining, Electrolytic, of Gold and Silver.....**11**, 415 (1907)
Refining, Electrolytic, of Iron—Edward F. Kern **13**, 103 (1908)
Refining of Metals, A New Method for the Electrolytic Winning and—E. M. Chance **17**, 235 (1910)
Refining of Silver, Electrolytic Process for—A. G. Betts...**8**, 121 (1905)
Refractory, Electrically Fused Alumina (Alundum) as a—L. E. Saunders **19**, 333 (1911)
Regeneration of Air for Submarines, Report of Experiments with Fused Sodium Peroxide for the—G. F. Brindley and R. von Foregger **9**, 291 (1906)
Regulations Concerning Local Sections.....**16**, 24 (1909)
Relation of Polarization to Decomposition Pressure of Electrolytes—Oliver P. Watts **19**, 91 (1911)
Relation of the Hypothesis of Compressible Atoms to Electrochemistry—T. W. Richards .....**6** II), 7 (1904)
Relation of Surface Action to Electrochemistry—H. E. Patten, **19**, 359 (1911)
Relative Basicity of the Metals—L. Kahlenberg **18**, 103 (1910)

Relative Efficiency of Arc and Resistance Furnace for the Manufacture of Calcium Carbide—S. A. Tucker, W. A. Alexander and H. K. Hudson **15**, 411 (1909)
Relative Velocities of the Ions in Solutions of Silver Nitrate in Pyridine and Acetonitrile—H. Schlundt **1**, 177 (1902)
Reliability of Electric Furnaces for Commercial Work—F. T. Snyder **19**, 185 (1911)
Remarks on Prof. Richards' Theory of Heat of Neutralization as Presented to the Society, September 19, 1903—G. M. Westman **5**, 127 (1904)
Replaceable Unit System of Electric Heating Apparatus—M. M. Kohn **19**, 299 (1911)
Report of Board of Directors, **1**, 11 (1902); **2**, 6 (1902); **3**, 6 (1903); **4**, 4 (1903); **5**, 7 (1904); **6**, 5 (1904); **7**, 8 (1905); **8**, 5 (1905); **9**, 7 (1906); **11**, 11 (1907); **13**, 9 (1908); **15**, 8 (1909); **17**, 24 (1910); **19**, 8 (1911)
Report of Committee on Papers **7**, 7 (1905)
Report of Committee on Papers and Meetings **1**, 11 (1902)
Report of Committee on Publication **7**, 6 (1905)
Report of Experiments with Fused Sodium Peroxide for the Regeneration of Air for Submarines—G. F. Brindley and R. von Foregger **9**, 291 (1906)
Report of Membership Committee **1**, 110 (1902)
Report of Secretary, Annual, **3**, 7 (1903); **5**, 9 (1904); **7**, 3 (1905); **9**, 9 (1906); **11**, 12 (1907); **13**, 10 (1908); **15**, 9 (1909); **17**, 25 (1910); **19**, 9 (1911)
Report of the Special Committee on Improvement of Standard of Papers **20**, 2 (1911)
Report of Tellers of Election, **3**, 3 (1903); **5**, 5 (1904); **7**, 9 (1905); **9**, 3 (1906); **11**, 4 (1907); **13**, 3 (1908); **15**, 4 (1909); **17**, 8 (1910); **19**, 2 (1911)
Report of Treasurer, Annual, **3**, 9 (1903); **5**, 10 (1904); **7**, 2 (1905); **9**, 9 (1906); **11**, 15 (1907); **13**, 13 (1908); **15**, 13 (1909); **17**, 29 (1910); **19**, 12 (1911)
Report on the Proposed Card Catalogue of Electrochemistry—C. F. Carrier, Jr.....**8**, 161 (1905)
Research Apparatus, German Scientific .....**6** (I), 45, 46 (1904)
Research Award, 1906 .....**11**, 43 (1907)
Research, Chemical, and Industrial Progress—W. H. Walker, **19**, 17 (1911)
Resistance and Arc Furnaces for the Manufacture of Calcium Carbide, Relative Efficiency of—S. A. Tucker, W. A. Alexander and H. K. Hudson.....**15**, 411 (1909)
Resistance, Electrolytic, Rapid Measurement of—C. F. Burgess **11**, 225 (1907)
Resistance Furnace **11**, 413 (1907)
Resistance Furnace, A Granular Carbon—S. A. Tucker..**11**, 307 (1907)

Resistance Furnace, A New Electric—F. A. J. FitzGerald, **19**, 273 (1911)
Resistance Furnaces, A Practical Limitation of—C. Hering, **11**, 329 (1907)
Resistance Furnaces, Laboratory—G. R. White.....**9**, 143 (1906)
Resistance Furnaces, Note on Some Theoretical Considerations in the Construction of—F. A. J. FitzGerald.....**4**, 9 (1903)
Resistance of Iron Alloys, The Electrical—C. F. Burgess and Jas. Aston **20**, 205 (1911)
Resistance, Specific, of Electrolytes, Method of Determining—R. Threlfall **8**, 193 (1905)
Resistances of the Order of One Hundred Thousand Megohms, The Construction and Accurate Measurement of—Howard L. Bronson **13**, 231 (1908)
Resistivity, Electrical, of Iron and Steel.....**15**, 222 (1909)
Resistivity, Electrical, of Iron and Steel at High Temperatures—G. Gin **8**, 287 (1905)
Resistor Furnace Design, Some Principles of—C. L. Collens, 2nd, **9**, 31 (1906)
Resistors, Granular Carbon—S. A. Tucker, A. Doty and R. W. Cauchois **12**, 171 (1907)
Resolution of Ladies Attending the Boston Meeting.....**7**, 12 (1905)
Resolution of Voltages, Composition and—J. W. Richards..**5**, 89 (1904)
Resolution upon the Conservation of Our National Resources. **14**, 3 (1908)
Resolutions Adopted at Sixteenth General Meeting.....**16**, 3 (1909)
Resolutions Passed Concerning Louisiana Purchase Exposition, **2**, 156 (1902)
Resolutions Presented by Mr. E. R. Taylor.....**20**, 5 (1911)
Resources, Natural, The Electrochemist and the Conservation of—E. G. Acheson **15**, 17 (1909)
Resources of Ontario, The Mineral—T. W. Gibson.....**20**, 447 (1911)
Resources, Resolution Concerning Conservation of.....**16**, 3 (1909)
Reuterdahl, A.—*Discussion* **7**, 197 (1905)

Steel Process, Lash, and the Electric Furnace—F. A. J. FitzGerald, **14**, 239 (1908)
Steel Processes, Electric, as Competitors of the Bessemer and Open Hearth—Albert E. Greene.....**19**, 233 (1911)
Steel, Protection of, Against Corrosion—M. Toch.....**14**, 207 (1908)
Steel, Protection of, Against Corrosion—M. Toch.....**15**, 391 (1909)
Steel, Structural, Electrolytic Corrosion of—M. Toch.....**9**, 77 (1906)
Steel, Structural, Present Value of Electrical—H. Hibbard.**15**, 231 (1909)
Steel, Titanium in Iron and—Chas. V. Slocum.....**20**, 265 (1911)
Steinmetz, C. P.—*Discussions*, **11**, 189 *et seq.*, 257 (1907); **13**, 132, 427, 443 (1908)
Steinmetz, C. P.—Electric Conduction **11**, 81 (1907)
Steinmetz, C. P.—Kinetic Molecular Energy.....**13**, 397 (1908)
Steinmetz, J. A.—Note on Corrosion of Aluminum.....**3**, 217 (1903)
St. Louis, Electrochemical Exhibits at the Louisiana Purchase Exposition, 1904—S. S. Sadtler.....**6** (I), 45 (1904)
St. Louis, Electrochemistry at the World's Fair at—W. E. Goldsborough **2**, 153 (1902)
St. Louis Exposition, Electrochemistry as Represented at.**8**, 205 (1905)

Storage Batteries, Self-Discharge of Planté and Faure—O. W. Brown and W. G. Bowers.....**18**, 69 (1910)
Storage Batteries, Use of Pyroxiline in—E. A. Sperry....**3**, 169 (1903)
Storage Battery, Edison, On the—M. deK. Thompson and H. K. Richardson **7**, 95 (1905)
Storage Battery, Edison, Present Status of the—A. E. Kennelly and S. E. Whiting .....**6** (II), 135 (1904)
Storage Battery Elements, Treatment of, Before Putting Them Out of Commission—O. W. Brown and R. R. Sayers...**12**, 311 (1907)
Storage Battery, Historical Review of the—H. B. Coho....**3**, 159 (1903)
Storage Battery Invention—H. Rodman.....**2**, 177 (1902)
Storage Battery, Lead, Evolution of—P. G. Salom.....**18**, 51 (1910)
Storage Battery, Zinc Bromide—H. H. Dow.....**1**, 127 (1902)
Storage Batteries, Electrolyte Density in—Lamar Lyndon..**9**, 67 (1906)
Stress, Effect of, upon the E. M. F. of Soft Iron—W. H. Walker and C. Dill **11**, 153 (1907)
Strong, A. H.—*Discussions*.....**19**, 268 (1911); **20**, 307 (1911)
Structural Steel, Electrical, Present Value of—H. D. Hibbard, **15**, 231 (1909)
Structural Steel, Electrolytic Corrosion of—M. Toch.....**9**, 77 (1906)
Structure of Electro-Deposits—C. F. Burgess and O. P. Watts, **9**, 229 (1906)
Studies on the Silver Coulometer—L. H. Duschak and G. A. Hulett **12**, 257 (1907)
Study in Heavy Alternating Current Conductors for Electric Furnaces—K. C. Randall.....**17**, 139 (1910)
Study of Some Electrode Effects, Experimental—H. M. Tory and H. T. Barnes **3**, 95 (1903)
Study of the Electric Arc, Contribution to—W. S. Weedon.**5**, 171 (1904)
Study of the Materials Used in Standard Cells and Their Preparation—H. S. Carhart and G. A. Hulett....**6** (II), 109, 118 (1904)
Suhm, E. R., and Watts, O. P.—Further Experiments with Calcium Alloys as Reducing Agents.....**15**, 421 (1909)
Sulphides, Reduction of Metal—O. W. Brown.....**9**, 109 (1906)
Sulphuric Acid, Conductivity of Mixtures of Copper Sulphate and—H. K. Richardson and F. D. Taylor.....**20**, 179 (1911)
Sulphuric Acid *vs.* Electrolytic Parting of Bullion—F. D. Easterbrooks **8**, 125 (1905)
Superheating of Liquids, Electrical Heating as a Means of Prevention of—J. Howard Mathews **19**, 81 (1911)
Surface Action, Relation of, to Electrochemistry—H. E. Patten, **19**, 359 (1911)
Surface Factors Affecting Distribution, Some—H. E. Patten.**10**, 67 (1906)
Surface Film Formed on Aluminum, Nature of—H. T. Barnes and G. W. Shearer **13**, 169 (1908)
Surface Properties of Aluminum and Zinc— W. J. Hammer, **11**, 383 (1907)

Suspensions, Settling of—E. Buckingham **9**, 265 (1906)
Sweden, Electric Shaft Furnace at Ludviga—E. Haanel...**15**, 25 (1909)
Sweden, Recent Progress in Electrical Iron Smelting in—Thos. D. Robertson **20**, 375 (1911)
Swinburne, Jas.—Chlorine in Metallurgy.....**6** (II), 80 (1904)
Switchboard, Lecture-Room—W. D. Bancroft.....**9**, 333 (1906)
Switch, Electrolytic—W. S. Horry **7**, 237 (1905)
System of Amalgamating Gold Ores, The Electrolytic—Elmer E. Carey **19**, 127 (1911)
System, Replaceable Unit, of Electric Heating Apparatus—M. M. Kohn **19**, 299 (1911)
Taggart, W. T.—*Discussions*, **2**, 196 (1902); **3**, 254 (1903); **14**, 56 (1908)
Tanks, Electrolytic Corrosion of Bottoms of—A. A. Knudson, **14**, 189 (1908)
Tate, A. O.—*Discussion* **19**, 52 (1911)
Tate, A. O.—The Tate Bifunctional Accumulator Plate...**19**, 47 (1911)
Tate Bifunctional Accumulator Plate—A. O. Tate.....**19**, 47 (1911)
Taylor, E. R.—A Closed Electric Furnace for Reducing and Distilling Metals from Their Ores.....**11**, 295 (1907)
Taylor, E. R.—Appointment as Representative to the Governor's Conference **15**, 9 (1909)
Taylor, E. R.—The Manufacture of Bisulphide of Carbon in the Electric Furnace **1**, 115 (1902)
Taylor, E. R.—Contribution to the Electric Smelting of Iron Ore, **16**, 229 (1909)
Taylor, E. R.—*Discussions*, **1**, 117 (1902); **7**, 204 (1905); **11**, 298 *et seq.*, 373 (1907); **14**, 261 *et seq.* (1908); **16**, 234 *et seq.* (1909)
Taylor, E. R.—Forestry, Water Storage, Power and Navigation, **13**, 385 (1908)
Taylor, E. R.—Resolution **14**, 3 (1908)
Taylor, E. R.—Resolution of Thanks **11**, 10 (1907)
Taylor, E. R.—Some Advances in the Closed and Continuous Working Electric Furnace **2**, 185 (1902)
Taylor, F. D., and Richardson, H. K.—The Conductivity of Mixtures of Copper Sulphate and Sulphuric Acid.....**20**, 179 (1911)
Tellers of Election, Report of, **3**, 3 (1903); **5**, 5 (1904); **7**, 9 (1905); **9**, 3 (1906); **11**, 4 (1907); **13**, 3 (1908); **15**, 4 (1909); **17**, 8 (1910); **19**, 2 (1911)
Temperature, Difference of, Thermo-Electromotive Force Without —H. S. Carhart **3**, 137 (1903)
Temperature Formula for the Weston Standard Cell—F. A. Wolff, **13**, 187 (1908)
Temperature Measurements, Electric Tube Furnace for—S. A. Tucker **11**, 303 (1907)

Temperatures, Automatic Registration of—E. F. Northrup, **15**, 331 (1909)
Temperatures, Economic, of Copper Refining Solutions—C. F. Burgess **7**, 51 (1905)
Temperatures, High, Action of Carbon on Magnesia at—O. P. Watts **11**, 279 (1907)
Temperatures, High, Estimation of—G. K. Burgess.....**11**, 247 (1907)
Temperatures, High, Electrical Resistivity of Iron and Steel at—G. Gin **8**, 287 (1905)
Temperatures, High, Measurements of, in an Electric Tube Furnace—S. A. Tucker **11**, 303 (1907)
Temperatures, High, Thermal Conduction and Convection in Gases at—I. Langmuir **20**, 225 (1911)
Temperatures in the Electric Furnace, The Use of Carbon for the Study of—F. A. J. FitzGerald.....**6** (I), 31 (1904)
Testing of Carbon Electrodes—F. A. J. FitzGerald.....**2**, 43 (1902)
Testing of Dry Cells—W. B. Pritz.....**19**, 31 (1911)
Testing of Iron During the Annealing, Electrical—E. E. F. Creighton **13**, 127 (1908)
Tests of Dry Cells—F. H. Loveridge.....**16**, 109 (1909)
Thatcher, C. J.—*Discussions*, **8**, 266 *et seq.* (1905); **10**, 41, 61 (1906)
The Absorption of the Radio-Active Emanations by Charcoal—R. W. Boyle **13**, 429 (1908)
The Action of Carbon on Magnesia at High Temperature—O. P. Watts **11**, 279 (1907)
The Advantages of Keokuk, Iowa, for Electrochemical Industries—Frank P. H. Knight **19**, 345 (1911)
The Advantages of Maine for Electrochemical Industries—C. Vey Holman **19**, 351 (1911)
The Alloying of Calcium and Iron—A. Hirsch and J. Aston, **13**, 143 (1908)
The Aluminum Electrolytic Condenser—C. I. Zimmerman.**5**, 147 (1904)
The Aluminum Electrolytic Condenser—C. I. Zimmerman.**7**, 309 (1905)
The Aluminum Rectifier—W. D. Bancroft.....**6** (I), 13 (1904)
The American Electrochemical Society—Carl Hering **11**, 17 (1907)
The American Electrochemical Society—J. W. Richards.....**1**, 1 (1902)
The Analysis of Silicon Compounds—A. B. Albro.....**12**, 229 (1907)
The Application of the Electric Furnace to Siderurgy—E. Stassano, **15**, 63 (1909)
The Atom of Electrochemistry—A. Reuterdahl.....**1**, 229 (1902)
The Behavior of the Nickel Anode and Its Bearing on Passivity—E. P. Schoch **14**, 99 (1908)
The Cadmium Standard Cell—G. A. Hulett.....**9**, 239 (1906)
The Carbon Cell—F. Haber and L. Bruner.....**6** (II), 44 (1904)
The Chemistry of Electrochemistry—W. D. Bancroft.....**8**, 33 (1905)
The Chemistry of Electroplating—W. D. Bancroft....**6** (II), 27 (1904)

The Clancy Electrochemical Cyanide Process—John C. Clancy, **19**, 137 (1911)
The Composition and Resolution of Voltages—J. W. Richards, **5**, 89 (1904)
The Condensation of Zinc Vapor from Electric Furnaces—Fred. T. Snyder **19**, 317 (1911)
The Conductivity and Electrolysis of Cuprous Chloride Solutions—M. deK. Thompson and E. R. Hamilton **17**, 287 (1910)
The Conductivity of Mixtures of Copper Sulphate and Sulphuric Acid—H. K. Richardson and F. D. Taylor **20**, 179 (1911)
The Conservation and Utilization of Natural Sources of Power—J. H. Finney **17**, 55 (1910)
The Construction and Accurate Measurement of Resistances of the Order of 100,000 Megohms—H. L. Bronson **13**, 231 (1908)
The Continuous Advance of Electrochemistry—J. W. Richards, **5**, 37 (1904)
The Corrosion of Iron from the Electrochemical Standpoint—C. F. Burgess **13**, 17 (1908)
The Corrosion of Iron—*General Discussion* **14**, 151 (1908)
The Corrosion of Metallic Food Containers—Causes and Prevention—E. Gudeman **18**, 97 (1910)
The Current Efficiency of an Electrolytic Cell—W. R. Mott. **11**, 195 (1907)
The Decker Primary Battery—F. B. Crocker **10**, 107 (1906)
The Deposition of Aluminium from Aqueous Solutions—S. A. Tucker and E. G. Thomssen **15**, 497 (1909)
The Determination of Zinc with the Aid of the Mercury Cathode and Rotating Anode—L. G. Kollock and E. F. Smith. **14**, 59 (1908)
The Development of the Nickel-Plating Industry—I. Adams. **9**, 211 (1906)
The Diamond and Moissanite; Natural, Meteoric and Artificial—G. F. Kunz **12**, 39 (1907)
The Direct Production of Molybdenum Steel in the Electric Furname—E. J. Dittus and R. G. Bowman **20**, 355 (1911)
The Early Work of Joseph Henry—J. F. McElroy **13**, 339 (1908)
The Economic Balance in Electrolytic Copper Refining—L. Addicks, **5**, 119 (1904)
The Effect of Moisture and of Solutions upon the Electrical Conductivity of Soils—R. O. E. Davis **17**, 391 (1910)
The Effect of Organic and Inorganic "Addition Agents" upon the Electro-Deposition of Copper from Electrolytes Containing Arsenic—Ching Yu Wen and Edward F. Kern **20**, 121 (1911)
The Effect of Stress upon the Electromotive Force of Soft Iron—W. H. Walker and C. Dill **11**, 153 (1907)
The Efficiency of Electric Furnaces—J. W. Richards **2**, 51 (1902)
The Electric Furnace for the Manufacture of Iron and Steel—Jas. Lyman **19**, 193 (1911)
The Electric Furnace Reduction of Iron Ore—J. W. Richards, **15**, 53 (1909)

The Electric Shaft Furnace of the Aktiebolaget Elektrometall, Ludviga, Sweden—E. Haanel **15**, 25 (1909)
The Electric Smelting of Zinc—O. W. Brown and W. F. Oesterle, **8**, 171 (1905)
The Electric Vacuum Furnace—W. C. Arsem.....**9**, 153 (1906)
The Electrical Reduction of Lead—P. G. Salom.....**1**, 87 (1902)
The Electrical Resistance of Iron Alloys—Chas. F. Burgess and Jas. Aston **20**, 205 (1911)
The Electrochemical Exhibits at St. Louis—S. S. Sadtler.**6** (I), 45 (1904)
The Electrochemical Industries of Norway—J. W. Richards, **20**, 403 (1911)
The Electrochemical Series of Metals—L. Kahlenberg.**6** (II), 53 (1904)
The Electrochemist and the Conservation of Our Natural Resources —E. G. Acheson **15**, 17 (1909)
The Electrochemistry of Chemistry—W. D. Bancroft.....**9**, 13 (1906)
The Electrochemistry of Light—W. D. Bancroft.....**13**, 243 (1908)
The Electrodeposition of Platinum—II—W. J. McCaughey and H. E. Patten **17**, 275 (1910)
The Electrolysis of Caustic Soda—J. W. Richards.....**9**, 355 (1906)
The Electrolysis of Water—J. W. Richards and W. S. Landis, **3**, 105 (1903)
The Electrolysis of Water—II—J. W. Richards and W. S. Landis, **4**, 111 (1903)
The Electrolytic Corrosion of Brasses—A. T. Lincoln.....**11**, 43 (1907)
The Electrolytic Corrosion of Electro-Plated Objects—Walter S. Landis **19**, 59 (1911)
The Electrolytic Deposition of Nickel-Zinc Alloys—II—E. P. Schoch and A. Hirsch.....**11**, 135 (1907)
The Electrolytic Deposition of Platinum—W. J. McCaughey, **15**, 523 (1909)
The Electrolytic Determination of Minute Quantities of Copper—E. E. Free **12**, 307 (1907)
The Electrolytic Dissolution of Soluble Metallic Anodes—W. McA. Johnson **2**, 171 (1902)
The Electrolytic Precipitation of Nickel on Nickel—R. C. Snowdon, **7**, 301 (1905)
The Electrolytic Precipitation of Silver—R. C. Snowdon...**7**, 143 (1905)
The Electrolytic Preparation of Calcium—A. R. Johnson.**18**, 125 (1910)
The Electrolytic Preparation of Iodoform from Acetone—G. A. Roush **8**, 281 (1905)
The Electrolytic Preparation of Magnesium—S. A. Tucker and F. L. Jouard **17**, 249 (1910)
The Electrolytic Production of White Lead—John A. Yunck, **15**, 485 (1909)
The Electrolytic Purification of Cobalt and Nickel—W. D. Bancroft .....**6** (I), 39 (1904)

The Electrolytic Rectifier—C. F. Burgess and C. Hambuechen, **1**, 147 (1902)
The Electrolytic Separation of Silver and Copper—H. W. Gillett, **12**, 255 (1907)
The Electrolytic System of Amalgamating Gold Ores—E. E. Carey. **19**, 127 (1911)
The Electrolytic Theory of the Corrosion of Iron—A. S. Cushman, **12**, 403 (1907)
The Electro-Metallurgy of Iron and Steel—*General Discussion*, **15**, 237 (1909)
The Electro-Metallurgy of Iron and Steel—P. L. T. Héroult. **6** (II), 129 (1904)
The Electro-Metallurgy of Zinc—G. Gin.....**12**, 117 (1907)
The Electro-Metallurgy of Zinc and Its Relation to Present Practice—W. McK. Johnson **11**, 265 (1907)
The Electronic Hypothesis and Its Applications—A. Reuterdahl, **2**, 159 (1902)
The Electrostatic Treatment of Ore—L. I. Blake.....**7**, 211 (1905)
The Energy of Ions—L. A. Parsons.....**5**, 131 (1904)
The Evolution of the Lead Storage Battery—P. G. Salom.**18**, 51 (1910)
The Flow of Heat Through Furnace Walls—F. T. Snyder.**18**, 235 (1910)
The Formation of Nitric Oxide from the Air by Means of a Current of Electricity of Low Voltage—G. W. Morden.....**14**, 113 (1908)
The Free Energy of Some Halogen and Oxygen Compounds Computed from the Results of Potential Measurements—M. deK. Thompson **9**, 337 (1906)
The Function of Addition Agents in Electrolytes—E. F. Kern. **15**. 441 (1909)
The Function of Oxygen in the Corrosion of Metals—W. H. Walker **14**, 175 (1908)
The Girod Electric Furnace for the Manufacture of Steel—Paul Girod **15**, 127 (1909)
The Helion Lamp—H. C. Parker.....**11**, 375 (1907)
The Heraeus "Le Chatelier Pyrometer"—R. Moldenke.....**10**. 97 (1906)
The Héroult Electric Steel Furnace—R. Turnbull.....**15**, 139 (1909)
The Hiorth Electric Steel Furnace—J. W. Richards.....**18**. 191 (1910)
The Influence of Some Impurities in Salt upon the Yield of Caustic Soda by the Amalgam Process—J. W. Walker and C. S. Paterson **3**, 185 (1903)
The Interdependence of the Atomic Weights and the Electrochemical Equivalents—A. Reuterdahl **7**, 187 (1905)
The Johnson Electric Zinc Furnace—J. W. Richards....**19**, 311 (1911)
The Kjellin and Röchling-Rodenhauser Electric Furnaces—F. A. Kjellin **15**, 173 (1909)
The Lash Steel Process and the Electric Furnace—F. A. J. Fitz-Gerald **14**, 239 (1908)

The Latent Heat of Vaporization of Metals and Other Substances —J. W. Richards **13**, 447 (1908)
The Lead Voltameter—A. G. Betts and E. F. Kern....**6** (II), 67 (1904)
The Manufacture of Air-Saltpeter by the Process of the Badische Anilin and Soda-Fabrik—Dr. Schönherr.....**16**, 131 (1909)
The Manufacture of Bisulphide of Carbon in the Electric Furnace —E. R. Taylor **1**, 115 (1902)
The Mechanism of Electrolytic Transfer—J. W. Richards.**19**, 119 (1911)
The Mercury Arc—E. Weintraub **7**, 273 (1905)
The Metals in Order of Their Boiling Points, as Arranged from Moissan's Experiments in the Distillation of Metals and Alloys—O. P. Watts **12**, 141 (1907)
The Microstructure of Silicon and Alloys Containing Silicon—A. B. Albro **7**, 251 (1905)
The Migration and Flocculation of Colloids Considered as an Absorption Phenomenon—H. E. Patten **9**, 277 (1906)
The Mineral Resources of Ontario—Thos. W. Gibson....**20**, 447 (1911)
The Nascent State—C. J. Reed.....**1**, 69 (1902)
The Nature of the Surface Film Formed on Aluminum, and the Aluminum-Magnesium Cell—H. T. Barnes and G. W. Shearer **13**, 169 (1908)
The Noble Electric Steel Co.'s Plant—D. A. Lyon.....**15**, 39 (1909)
Theoretical Considerations, Note on Some, in the Construction of Resistance Furnaces—F. A. J. FitzGerald.....**4**, 9 (1903)
Theoretical Properties of Free Ions in Solutions—E. F. Roeber, **4**, 159 (1903)
Theories, Current Electrochemical—L. Kahlenberg **1**, 119 (1902)
Theory and Practice of Continuous-Flow Electric Calorimetry— H. T. Barnes **2**, 197 (1902)
Theory of Concentration Cells, A Thermo-Electric—H. S. Carhart, **2**, 123 (1902)
Theory of Electrolysis, Revisions of—H. S. Carhart.....**7**, 15 (1905)
Theory of Electrolytic Dissociation, *General Discussion of*.**4**, 177 (1903)
Theory of Electrolytic Dissociation, Present Status of the—W. D. Bancroft **4**, 175 (1903)
Theory of Electrolytic Dissociation, Thermochemistry of the—J. W. Richards **4**, 137 (1903)
Theory of Electrolytic Paints—W. D. Bancroft.....**14**, 143 (1908)
Theory of Heat of Neutralization, Remarks on Prof. Richards'— G. M. Westman **5**, 127 (1904)
Theory of the Corrosion of Iron, Electrolytic—A. S. Cushman, **12**, 403 (1907)
Theory of the Edison Accumulator—E. F. Roeber.....**1**, 195 (1902)
The Phenomenon of the Formation of Metallic Dust from Cathodes —F. Haber **2**, 189 (1902)
The Practical Conductance of Electrolytes—J. W. Richards and W. S. Landis **16**, 85 (1909)

The Precipitation of Colloidal Solutions by Centrifugal Force—W. S. Franklin and L. A. Freudenberger.....**8**, 29 (1905)
The Preparation and Properties of Metallic Cerium—Alcan Hirsch, **20**, 57 (1911)
The Preparation of Calcium—F. C. Frary and W. L. Badger, **16**, 185 (1909)
The Preparation of Calcium Alloys for Aluminothermic Work—O. P. Watts and J. M. Breckenridge.....**13**, 153 (1908)
The Preparation of Silundum—S. A. Tucker, H. F. Kudlich and E. M. Heumann **16**, 207 (1909)
The Presence and Influences of Gases in Steel—P. L. T. Héroult, **17**, 135 (1910)
The Present Status of Ozone with Reference to Air Purification—R. D. Small **18**, 171 (1910)
The Present Status of the Edison Storage Battery—A. E. Kennelly and S. E. Whiting.....**6** (II), 135 (1904)
The Present Value of Electric Structural Steel—H. D. Hibbard, **15**, 231 (1909)
The Principles Involved in the Selection and Definition of the Fundamental Units to be Proposed for International Adoption—F. A. Wolff **13**, 213 (1908)
The Probable Electrical Nature of Chemical Energy—A. H. Patterson **15**, 575 (1909)
The Production of "Monox," A New Electric Furnace Product—H. N. Potter **12**, 223 (1907)
The Protection of Steel Against Corrosion—M. Toch.....**14**, 207 (1908)
The Protective Action of Zinc Chloride on Metallic Iron—C. J. Reed **3**, 149 (1903)
The Reduction of Metal Sulphides—O. W. Brown.....**9**, 109 (1906)
The Relation of the Hypothesis of Compressible Atoms to Electrochemistry—T. W. Richards .....**6** (II), 7 (1904)
The Reliability of Electric Furnaces for Commercial Work—F. T. Snyder **19**, 185 (1911)
The Reversible Copper Oxide Plate—W. McA. Johnson....**1**, 187 (1902)
Thermal Conduction and Convection in Gases at Extremely High Temperatures—Irving Langmuir **20**, 225 (1911)
Thermal Conductivities, Method of Determining—C. Hering, **18**, 213 (1910)
Thermal Conductivity, Mean, of Furnace Electrodes—Carl Hering, **16**, 317 (1909)
Thermal Conductivity of Electrodes—C. A. Hansen.....**16**, 350 (1909)
Thermochemistry of Electrolytic Dissociation—C. J. Reed..**5**, 255 (1904)
Thermochemistry of the Theory of Electrolytic Dissociation—J. W. Richards **4**, 137 (1903)
Thermodynamical Note on the Theory of the Edison Accumulator—E. F. Roeber **1**, 195 (1902)

Thermodynamics of the Electric Incandescent Lamp—E. F. Roeber, **8**, 243 (1905)
Thermodynamics of the Weston Standard Cell—G. A. Hulett, **15**, 435 (1909)
Thermo-Electric Determinations of the Reduction Temperature of Zinc Oxide—W. McA. Johnson **5**, 211 (1904)
Thermo-Electric Pyrometer for General Industrial Applications—E. F. Schuetz **10**, 81 (1906)
Thermo-Electric Theory of Concentration Cells—H. S. Carhart, **2**, 123 (1902)
Thermo-Electromotive Force Without Difference of Temperature—H. S. Carhart **3**, 137 (1903)
The Rotating Diaphragm—W. D. Bancroft.....**7**, 171 (1905)
The Self-Circulating Gin Furnace for the Electric Manufacture of Steel—G. Gin **15**, 205 (1909)
The Self-Discharge of Planté and Faure Storage Batteries—O. W. Brown and W. G. Bowers.....**18**, 69 (1910)
The Separation of Oil from Condenser Water by Electrolysis—H. M. Goodwin and R. Ellis.....**17**, 405 (1910)
The Settling of Suspensions—E. Buckingham **9**, 265 (1906)
The Silver Voltameter—K. E. Guthe.....**6** (II), 96 (1904)
The Solubilities of Boric, Camphoric, Benzoic and Salicylic Acids in Aqueous Ethyl Alcohol Solutions at 25°—A. Seidell, **13**, 319 (1908)
The Standard Cell—F. A. Wolff, Jr.....**5**, 49 (1904)
The Tate Bifunctional Accumulator Plate—A. O. Tate....**19**, 47 (1911)

Zinc, Determination of, with the Aid of the Mercury Cathode and Rotating Anode—L. G. Kollock and E. F. Smith...**14**, 59 (1908)
Zinc-Dust, Galvanizing Wire in—A. Sang **20**, 259 (1911)
Zinc, Electrodeposition of—R. C. Snowdon.....**11**, 121 (1907)
Zinc, Electrolytic Deposition of Lead and, as Affected by the Addition of Certain Organic Compounds—S. A. Tucker and E. G. Thomssen **15**, 477 (1909)
Zinc, Electrolytic Production of, from Its Ores—S. S. Sadtler, **1**, 141 (1902)
Zinc, Electric Smelting of—O. W. Brown and W. F. Oesterle, **8**, 171 (1905)
Zinc, Electro-Metallurgy of—G. Gin **12**, 117 (1907)
Zinc, Electro-Metallurgy of, and Its Relation to Present Practice—W. McK. Johnson **11**, 265 (1907)
Zinc Furnace, Johnson Electric—J. W. Richards.....**19**, 311 (1911)
Zinc, Latent Heat of Vaporization of—W. McA. Johnson.**14**, 251 (1908)

Zinc-Nickel Alloys, Electrolytic Deposition of—II—E. P. Schoch and A. Hirsch **11**, 135 (1907)
Zinc Oxide, Reduction Temperature of—W. McA. Johnson.**5**, 211 (1904)
Zinc, Single Potentials of, in Aqueous Solutions—H. E. Patten and W. R. Mott **3**, 317 (1903)
Zinc, Surface Properties of Aluminum and—W. J. Hammer, **11**, 383 (1907)
Zinc Vapor, Condensation of, from Electric Furnaces—F. T. Snyder **19**, 317 (1911)
